We increasingly reflect on history from a position which no longer privileges Europe or the West, and from a global perspective which ranges from the Pacific Rim to the Balkans, and from Latin America to the Middle East. Compiled by an international team of contributors, area editors and general editors, The Cambridge Dictionary of Modern World History provides a much needed guide to the main global events, personalities and themes from the eighteenth century to the present. Major themes of war, politics, society and religion are covered, alongside more recent subjects within the discipline; from globalization and the environment to transnational social movements and human rights. This is an essential new work of reference not only for scholars and students but also for the wider general public.

The quotations are drawn from a huge variety of international sources - literary, scholarly, technical, popular - and represent authors as disparate as Geoffrey Chaucer and Erica Jong, William Shakespeare and Raymond Chandler, Charles Darwin and John Le Carré. There are now numerous introductory books on the subject, and others on particular aspects of it. This book provides something new: It studies the Citizen’s Basic Income proposal from a variety of different disciplinary perspectives: the economics of Citizen’s Basic Income, the sociology of Citizen’s Basic Income, the politics of Citizen’s Basic Income, and so on. Each chapter discusses the academic discipline, and relevant aspects of the debate, and asks how the discipline enhances our understanding, and how the Citizen’s Basic Income debate might contribute to the academic discipline.

How did a single genre of text have the power to standardise the English language across time and region, rival the Bible in notions of authority, and challenge our understanding of objectivity, prescription, and description? Since the first monolingual dictionary appeared in 1604, the genre has sparked evolution, innovation, devotion, plagiarism, and controversy. This comprehensive volume presents an overview of essential issues pertaining to dictionary style and content and a fresh narrative of the development of English dictionaries throughout the centuries. Essays on the regional and global nature of English lexicography (dictionary making) explore its power in standardising varieties of English and defining nations seeking independence from the British Empire: from Canada to the Caribbean. Leading scholars and lexicographers historically contextualise an array of dictionaries and pose urgent theoretical and methodological questions relating to their role as tools of standardisation, prestige, power, education, literacy, and national identity.
