New York Times–bestselling author Tilly Bagshawe continues the enduring legacy of beloved suspense author Sidney Sheldon with a new tale of glamour, suspense, and unexpected twists A young American au pair, Charlotte Clancy, vanishes without a trace in Mexico City. The case is left cold, but its legacy will be devastating. A decade later, LA is shaken by a spate of violent murders. Psychologist Nikki Roberts is the common link between the victims, her patients at the heart of this treacherous web. When someone makes an attempt on Nikki's life, it's clear she is a marked woman. Nikki makes a living out of reading people, drawing out their secrets, but the key to this shocking pattern eludes her. With the police at a dead end Nikki drafts in Derek Williams, a PI who isn't afraid to put his hand into the hornet's nest. Williams was thwarted in the notorious Charlotte Clancy case all those years ago, but what he unearths in LA—and the mention of one name in particular—leaves him cold, and takes him on a dangerous path into the past. A shadowy manipulator has brought his deadly game to the streets of LA. In a crime spanning generations, it seems Nikki Roberts knows all too much—and a ruthless killer knows the price of her silence. In this crooked city, where enemies and friends are one and the same, Nikki must be the master of her own escape...

Action Research for Professional Development Three Rivers Press

A significant body of knowledge is the basis for a holistic, caring and scientific evidence-based nursing education in practice for professional development. Quality teaching leads to good learning and both aspects are two of the main issues of quality assurance in nursing education today. To begin with, not all nursing students have the same levels of motivation or learning abilities. It is with cognisance of providing quality care for patients that the role of the nurse educator has to be to enhance nursing students' learning using scientific evidence based teaching. Research around teaching and learning processes is an important part of the delivery of quality education, which in turn impacts on students' learning results and experiences, thereby, ensuring holistic biopsychosocial care to patients. The main aim of teaching and learning in nursing, at all levels, is to enhance the nurses' contribution to assist the individuals, families and communities in promoting and preserving health, well-being and to efficiently respond to illnesses. We hope that this book can be used as a resource to increase the body of knowledge in teaching and learning in nursing, thereby enhancing the role and contribution of health care professionals to clinical practice.

From the preeminent writer of Taiwanese nativist fiction and the leading translator of Chinese literature come these poignant accounts of everyday life in rural and small-town Taiwan. Huang is frequently cited as one of the most original and gifted storytellers in the Chinese language, and these selections reveal his genius. In "The Two Sign Painters," TV reporters ambush two young workers from the country taking a break atop a twenty-four-story building. "His Son's Big Doll" introduces the tortured soul inside a walking advertisement, and in "Xiaoqi's Cap" a dissatisfied pressure-cooker salesman is fascinated by a young schoolgirl. Huang's characters—generally the uneducated and disadvantaged who must cope with assaults on their traditionalism, hostility from their urban brethren and, of course, the debilitating effects of poverty—come to life in all their human uniqueness, free from idealization.

"During World War II every psychologist had a job to do. His contributions sometimes were made in uniform and sometimes in whatever vestless and cuffless suit was available. Whether in uniform or not, the psychologist's work was related to the war effort or to the essential war functions of the nation. When the war ended, the psychologist found that his responsibilities were no less urgent. For the future his prospects seem to be even heavier burdens and a neverending path. Since the years 1940 and 1941, the psychologist has shown himself capable of performing duties not previously allotted to him, or, for that matter, not previously delegated to anyone else. There has grown up a better understanding of the potential functions of the psychologist, an understanding which creates new assignments for him. Instead of a reluctance to intrust to him problems in human behavior,

there is today an insistence that he attempt problems with which perhaps he is not yet prepared to deal. Clearly these past few years have been an era of great change in psychology, as they have in many other fields. It is unfortunate that during these dramatic and eventful times, there were few professional meetings and little time or opportunity for the discussion of professional problems. With the return of the possibility of holding professional meetings, it occurred to us that a symposium on current trends in psychology would be most timely and desirable. With the cordial support of the administrative officials of the University, we were able to hold at the University of Pittsburgh, on March 5 and 6, 1947, a conference on current trends in psychology. The present volume contains the papers delivered then. In planning our program we attempted to include in it discussions of recent advances and of probable future developments in several fields of psychology. There necessarily was a limit to the number of fields which could be included. In each chosen area of psychology we selected a speaker who is now active in that field"--Preface. EBOOK: New Perspectives on Bullying Pearson Education India

"This book provides a useful round-up of studies that help the reader understand what constitutes bullying (a much-debated point), the characteristics of bullies and children who are targeted, patterns of behaviour and common outcomes for the children involved, as well as what inhibits many schools from formulating effective policy." Children & Young People Now What is bullying? What can we learn from research findings? What are the risk factors for bullying or being bullied? How can we take account of the voice of the child? How can educators, policy-makers, health professionals and parents work together with children and young people to prevent and reduce bullying? This book provides a valuable resource for anyone responsible for the emotional health and well-being of children and young people. The authors focus on the importance of fostering positive relationships in the school community as a whole, so that young people and adults feel empowered to challenge bullying when they encounter it and protect those involved. Using case studies of real experiences, innovative practice, key research findings and perspectives from children and young people themselves, the authors provide perceptive insights into the positive ways of relating to others that are essential if we are to address the issue of bullying successfully. The material outlined in the book is directly linked to the new agenda for change in meeting the needs of the child, empowering children to be consulted and to take responsibility for issues that affect them. It explores a range of effective interventions that can counteract bullying - including restorative approaches; peer mediation; narrative approaches; and cyber support. Key features include: Chapter overviews Examples of effective practice Summaries of key research findings Children's views and experiences Learning points at the end of each chapter List of related organisations, websites and resources to support interventions against bullying Practical guidance based on sound evaluation is provided - as well as an insight into international perspectives on bullying - to help develop a positive school environment and disseminate good practice. *New Perspectives on Bullying* is an indispensable resource for teachers, researchers, health professionals, social workers and parents.

This is a new edition of one of our best-selling textbooks. The authors have thoroughly updated the fourth edition and included more text on current developments in research practice, action research, developments in ICT, questionnaire design, ethnographic research, conducting needs analysis, constructing and using tests, observational methods, reliability and validity, ethical issues and curriculum research. The entire text has been redesigned to cater for the increasingly sophisticated needs of the educational researcher. The new edition is more comprehensive, up-to-date and user-friendly, with increased accessibility. The authors, who are experienced teachers in the field, have produced a better written book (if that's possible) containing readable and realistic views of research and methodology, and show how to interpret the data.

Meet Hedgemond the Hunter - a brave and stubborn little hedgehog. Down in the wild woods he proudly tends his beloved house, but there are some animals who just can't understand what the fuss is about. Find out just how Hedgemond proves to the grumpy bear and the greedy boar that there is no place like home. Hedgehog's Home is a story about caring for the place you call home. Set in the unspoilt environment of the 'wild woods', we find the wild creatures arguing about what home means: is it simply a place we should take for granted or is it something to be cherished and protected? Despite the persuasions of charming Miss Fox and the jeers of the angry wolf,

Hedgemond steadfastly proves that his home is his castle, reminding us all to be true to ourselves and safeguard what we care for.

The Unauthorized Story of McDonald's Chicken House

The internet as a platform for facilitating human organization without the need for organizations has, through social media, created new challenges for cultural heritage institutions. Challenges include but are not limited to: how to manage copyright, ownership, orphan works, open data access to heritage representations and artefacts, crowdsourcing, cultural heritage amateurs, information as a commodity or information as public domain, sustainable preservation, attitudes towards openness and much more. Participatory Heritage uses a selection of international case studies to explore these issues and demonstrates that in order for personal and community-based documentation and artefacts to be preserved and included in social and collective histories, individuals and community groups need the technical and knowledge infrastructures of support that formal cultural institutions can provide. In other words, both groups need each other. Divided into three core sections, this book explores: - Participants in the preservation of cultural heritage; exploring heritage institutions and organizations, community archives and group - Challenges; including discussion of giving voices to communities, social inequality, digital archives, data and online sharing - Solutions; discussing open access and APIs, digital postcards, the case for collaboration, digital storytelling and co-designing heritage practice. Readership: This book will be useful reading for individuals working in cultural institutions such as libraries, museums, archives and historical societies. It will also be of interest to students taking library, archive and cultural heritage courses.

Generative Phonology: Description and Theory provides a basic understanding of the fundamental concepts of generative phonology and the applications of these concepts in further study of phonological structure. This book is composed of 10 chapters and begins with a survey of phonology in the overall model of generative grammar and introduces the principles of phonetics to. The subsequent chapters introduce the fundamental concept of a phonological rule that relates an underlying representation to a phonetic representation and this concept is applied to the analysis of morphophonemic alternation. These topics are followed by a presentation of phonological sketches of four diverse languages in terms of rules relating underlying and phonetic representations, as well as the major corpus-internal principles and techniques of phonological analysis. The discussion then shifts to the theoretical aspects of phonology, the various degrees of abstractness, and the proposals to limit the divergence between underlying and phonetic representation. Other chapters deal with some of the issues revolving around the representation of sounds and the various hypotheses as to how phonological rules apply to convert the underlying representation to the phonetic representation, particularly the kinds of considerations that motivate rule-ordering statements. The last chapters explore the major notational devices commonly employed in the formulation of phonological rules and the role of syntactic and lexical information in controlling the application of phonological rules. This book is intended primarily for linguistics and phonologists.
