The development of the information technology (IT) industry in the Asia Pacific region faces two challenges. Firstly, can its established physical, technical, regional and governance infrastructures be adapted to meet the challenges embedded in the set of products and processes created by the IT industry? Secondly, as this adaptation evolves, which cities and regions will be best suited to connect to or lead global responses to these challenges? The chapters in this book have set out to explore these questions, providing details of change in a range of aspects of the IT industry such as mobile phones, software services, and flat screen design in regions in Japan, Korea, Taiwan, India, China and Australia. The book also outlines the policy responses of national

and regional governments in Singapore, India and China and India. These case studies provide a basis to understand effective strategies which could be formulated for the future. This book's originality emerges from the fine detail provided about firms, in particular regions and cities, from research carried out by young scholars in the past two years. This makes it very useful for readers keen to understand the recent changes in this dynamic industry in a fast growth part of the world, and it will also help to shape thinking by policy makers on policy settings that can be applied.

Thought-leaders contributing to this volume include Tommy Koh, Tan Tai Yong, Kishore Mahbubani, Bilahari Kausikan, Han Fook Kwang, and more! This volume comprises essays by Singapore thought-leaders republished from various issues of *Commentary*, the annual journal of the National University of Singapore Society. In the first section, chapters have been curated to provide historical context and analyses of Singapore's foreign policy. The second section presents views on the orientation, values and interests the new, fourth generation of national leaders might have to adopt as they address the emerging challenges in this

policy domain so critical to the city-state's survival. These highly accessible essays provide the general reader valuable grounding and frameworks for thinking about Singapore's approach in navigating the geopolitical shifts in its Asian neighbourhood.

This is an important and worthwhile book that should be read by anyone seeking to understand the history and evolution of political violence in Southeast Asia, including the origins of contemporary militant Islamist terrorism. Paul J. Smith,

Contemporary Southeast Asia This very fine collection shows how and why Southeast Asia has been afflicted with terrorism from the end of World War II to the present time. No other volume tells us as much about the period and area. Anyone interested in the general theory and practice of terrorism and insurgency will find it indispensable. David C. Rapoport, University of California, Los Angeles, US and Editor of Journal of Terrorism and Political Violence This stimulating collection of essays underlines how Southeast Asia has again, as at the height of the Cold War, been pushed towards the top of the list of world conflict zones by the collision between long-standing regional problems and more recent external frictions. Anyone needing to learn more

about the relationship between the war on terror and Southeast Asia, particularly regarding terrorism in Thailand, Indonesia and the Philippines, will need to consult this work. Brian P. Farrell, National University of Singapore, and author of The Defence and Fall of Singapore 1940 1942 This book is an excellent addition to the literature on political violence in Southeast Asia providing a wealth of detail on terrorism, guerilla insurgency, and the use of terror and repression by governments. The book is especially valuable for the broad coverage of many different groups (not just Islamic ones), inclusion of the activities of governments, and a variety of opinions and views on terrorism and political violence. This book should be one of the essential resources for

academics, policymakers, or anyone else interested in terrorism, insurgency, and political violence in the region. It is an extremely valuable tool for one and all. James M. Lutz, Indiana University Purdue University, US and co-author of *Global Terrorism*, with Brenda Lutz This is an excellent volume, which is very well conceived and balanced in its treatment of the problem of terrorism and insurgency in Southeast Asia. This volume will greatly advance our empirical understanding of conflict and violence in this pivotal region. The book contains many insightful contributions and, overall, the Handbook will serve as a standard reference on the subject matter for years to come. M.L.R. Smith, King's College, University of London, UK This timely and significant book seeks to

explain the deep-seated complexities of terrorism and insurgency in Southeast Asia. In the aftermath of 9/11, this region has been designated by the United States to be the second front in the war on terrorism. Yet despite the emergence of this new global terrorism, the authors argue that armed rebellion in Southeast Asia is a phenomenon that predates Al Qaeda and the global Jihadist movement and that much can be learned from the motivations behind it. Written by a group of leading Western and emerging Southeast Asian scholars, this extensive volume demonstrates the difficulty and diversity of rebellion in Southeast Asia, and explores its intricate historical, political, social and economic roots. The book will serve as an excellent reference and educational text, providing an

empirical and regional guide to the complex problem of insurgency in Southeast Asia. It will also contribute to a more educated understanding that could provide the basis for appropriate counter-terrorism strategies in this important part of the world.

Comprehensive and engaging, this volume will find widespread appeal amongst researchers, students and policymakers interested in terrorism, international relations and Asian studies and will also be an invaluable tool for studies into political violence and security.

What challenges are posed by the world

economy for governments and businesses, and what changes are needed if we are to survive and prosper in the future? The strength of the world economy affects everyone. From Thessalonika to Shanghai, Indonesia to Illinois, the prosperity and economic security of billions of people is now bound together more closely than ever before. Overall, the economic news for the last two decades has been positive. Billions of people in traditionally poorer parts of the world are climbing out of poverty – but everyone’s economic future is uncertain. As the world emerges from the largest economic crisis in peace time, it is painfully clear that economic cycles and shocks can be frequent, complex and severe. The book provides essential facts about the global

economy, its regions and prospects. It also outlines current and future economic challenges, how they arose and why they matter, as well as demographic trends and key country strategic economic/business outlooks. Above all, the book highlights what changes are needed to improve the global economy and what corporations need to do to survive and prosper in the new post-crisis world.

Since independence in 1965, Singapore has developed its own unique approach to managing the diversity of Race, Religion, Culture, Language, Nationality, and Age among its citizens. This approach is a consequence of many factors, including its very distinct ethnic makeup compared with its neighbours, its ambitions as a globally oriented city-state, and its small physical size. Each of these factors and many others have presented Singapore society with a range of challenges and opportunities, and will in all likelihood continue to do so for the foreseeable future. In the writing of this book, the author team set themselves the task of projecting the impact of current domestic and

international social trends into the future, to anticipate what Singapore society might look like by around 2040. In doing so, they analyse the particular path that Singapore has taken since independence, in comparison with other multicultural societies and with regard to the balance between the necessity of forging a new national identity after British rule and departure from Malaysia, and the need to ensure that Singapore's ethnic minority populations remain socially enfranchised. They further consider how current trends may develop over the next couple of decades, what new challenges this may present to Singapore society, and what might be the likely responses to such challenges. In this book, Singapore is a case study of a global city facing the

challenges of developed-world modernity in frequently acute ways. Commentary On Singapore, Volume 1: Foreign Policy, Governance And Leadership Marshall Cavendish International Asia Pte Ltd Known for a tradition of Confucian filial piety, East Asian societies have some of the oldest and most rapidly aging populations on earth. Today these societies are experiencing unprecedented social challenges to the filial tradition of adult children caring for aging parents at home. Marshalling mixed methods data, this volume explores the complexities of aging and caregiving in contemporary East Asia. Questioning romantic visions of a senior's paradise, chapters examine emerging cultural meanings of and

social responses to population aging, including caregiving both for and by the elderly. Themes include traditional ideals versus contemporary realities, the role of the state, patterns of familial and non-familial care, social stratification, and intersections of caregiving and death. Drawing on ethnographic, demographic, policy, archival, and media data, the authors trace both common patterns and diverging trends across China, Hong Kong, Taiwan, Singapore, Japan, and Korea.

Religion and religio-political forces have become potent influences in the domestic politics of many countries irrespective of geographical location, stages of economic growth, and systems of governance. The growing importance of religion as a marker of identity and a tool of political mobilization is reshaping the political landscape in an unprecedented manner, and South Asia, which contains the world's largest populations of Muslims and Hindus with significant number of Buddhists, is no exception to this fact. This book presents a comprehensive analysis of the interaction of religion and politics in Afghanistan, Bangladesh, India, Nepal,

Pakistan and Sri Lanka. Although the specific circumstances of each country are different, in recent decades, religion, religio-political parties, and religious rhetoric have become dominant features of the political scenes in all six countries. The contributors offer a thorough examination of these developments by presenting each country's political system and the socio-economic environment within which the interactions are taking place. The analysis of the various factors influencing the process of the interactions between religion and politics, and their impact on the lives of the people of the region and global

politics constitute the core of the chapters.
