Length Formulas | BBS Calculation | Quantity Surveying Civil Engineering Estimation Formula The formula for factored unit cost estimation is as follows: where  $C_i$  is the purchase cost of a major component  $i$  and  $f_i$  be a factor accounting for the cost variation of the item,  $n$  is the number of components included in the construction project. Formula Based on Labor, Material and Equipment. Suppose that a construction project is decomposed into  $n$  tasks. UNIT COST METHOD OF ESTIMATE | CIVIL ENGINEERING Estimating and Costing are closely the same things. The estimate is defined as the process of calculating or computing the various quantities and the expected expenditure to be incurred on a particular work or project. The estimate gives the probable cost of the work. Estimating and Costing | Estimating and costing in civil ...
