This book is concerned with dictionary-making and dictionary-research carried out in Romania. The outcome of extensive, hands-on experience in dictionary making and dictionary research, the volume addresses a range of culture-specific topics related to both dictionary-as-process and dictionary-as-product. It

reflects the interests and concerns of all the stakeholders on the lexicographic continuum: theorists, practitioners, and dictionary users. The topics covered here encompass a number of macro- and micro-structural aspects relating to paper and online, monolingual and bilingual, general and specialized reference works. They create a composite picture of the lexicographic landscape in Romania set against a wider sociocultural backdrop. It is this ecology of dictionary making that helps explain the priorities, influences, pressures, and challenges that have shaped the local dictionary culture. The book will also provide researchers, practitioners, teachers and students with a clearer view of the peculiarities of the

dictionary.

"Audiovisual Translation: Subtitling" is an introductory textbook which provides a solid overview of the world of subtitling. Based on sound research and first-hand experience in the field, the book focuses on generally accepted practice but identifies current points of contention, takes regional and medium-bound variants into consideration, and traces new

developments that may have an influence on the evolution of the profession. The individual chapters cover the rules of good subtitling practice, the linguistic and semiotic dimensions of subtitling, the professional environment, technical considerations, and key concepts and conventions, providing access to the core skills and knowledge needed to subtitle for television, cinema and DVD. Also included are graded exercises covering core skills. "Audiovisual Translation: Subtitling" can be used by teachers and students as a coursebook for the classroom or for self-learning. It is also aimed at translators and other language professionals wishing to expand their sphere of activity. While the working language of the book is English, an accompanying DVD contains sample film material in Dutch, English, French, Italian and Spanish, as well as a range of dialogue lists and a key to some of the exercises. The DVD also includes WinCAPS, SysMedia's professional subtitling preparation software package, used for broadcast television around the world and for many of the latest multinational DVD releases of major Hollywood projects.

The Routledge Handbook of Language and Humor presents the first ever comprehensive, in-depth treatment of all the sub-fields of the linguistics of humor, broadly conceived as the intersection of the study of language and humor. The reader will find a thorough historical, terminological, and theoretical introduction to the field, as well as detailed treatments of the various approaches to language and humor. Deliberately comprehensive and wide-ranging, the handbook includes chapter-long treatments on the traditional topics covered by language and humor (e.g., teasing, laughter, irony, psycholinguistics, discourse analysis, the major linguistic theories of humor, translation) but also cutting-edge treatments of internet humor, cognitive linguistics, relevance theoretic, and corpus-assisted models of language and humor. Some chapters, such as the variationist sociolinguistics, stylistics, and politeness are the first-ever syntheses of that particular subfield. Clusters of related chapters, such as conversation analysis, discourse analysis

and corpus-assisted analysis allow multiple perspectives on complex trans-disciplinary phenomena. This handbook is an indispensable reference work for all researchers interested in the interplay of language and humor, within linguistics, broadly conceived, but also in neighboring disciplines such as literary studies, psychology, sociology, anthropology, etc. The authors are among the most distinguished scholars in their fields.

Translating Children's Literature is an exploration of the many developmental and linguistic issues related to writing and translating for children, an audience that spans a period of enormous intellectual progress and affective change from birth to adolescence. Lathey looks at a broad range of children's literature, from prose fiction to poetry and picture books. Each of the seven chapters addresses a different aspect of translation for children, covering:

- Narrative style and the challenges of translating the child's voice;
- The translation of cultural markers for young readers;
- Translation of the modern picture book;
- Dialogue, dialect and street language in modern children's literature;
- Read-aloud qualities, wordplay, onomatopoeia and the translation of children's poetry;
- Retranslation, retelling and reworking;
- The role of translation for children within the global publishing and translation industries.

This is the first practical guide to address all aspects of translating children's literature, featuring extracts from commentaries and

interviews with published translators of children's literature, as well as examples and case studies across a range of languages and texts. Each chapter includes a set of questions and exercises for students. *Translating Children's Literature* is essential reading for professional translators, researchers and students on courses in translation studies or children's literature.

A Handbook of Translation Studies

A&C Black

This book provides a theoretical and practical framework for researchers and practitioners who focus on the construction, interpretation and retextualisation of audiovisual texts. It defines translation as a communicative and interpretative process, with translators seen as cross-cultural mediators who make the denotative-semantic and connotative-pragmatic dimensions of source scripts accessible to target receivers, prompting equivalent perlocutionary effects, while still respecting the original illocutionary force. While existing research on audiovisual translation generally adopts a product-based perspective, examining the lexico-semantic and syntactic features of source and target versions, this book proposes an "Interactive Model", in order to explore what happens in the translators' minds, as well as the influence of the interaction between the linguistic and extralinguistic

dimensions in the construction and interpretation of audiovisual texts. The application of this Model to the analysis of a corpus of humorous films, TV series and video games foregrounds the integration between the analysis of the source-text features and the knowledge of the target linguacultural backgrounds in the creation of pragmalinguistic equivalent scripts. At the same time, this book also provides valuable insights into the audience's reception of these translations, by submitting close-ended and open-ended questionnaires to subjects representing empirical receivers, thus helping to evaluate the degree of linguistic and functional equivalence of target versions.

Translation, Wordplay and Resistance in Chicano Poetry, pp 141-160 Tace Hedrick

(Comparative Literature, Penn State Harrisburg, USA) This paper examines the nature of contemporary bilingual Chicano poetry from the 1970s to the present, particularly in terms of the poetic use of bilingual wordplay and the questions it raises about the uses and possibilities of translation. Using Walter Benjamin's essay 'The Task of the Translator' as a touchstone, and positing a metaphorical link between translation and transfer, the paper looks at bilingual wordplay as a kind of bridging-over or translation of one language into the other, crossing and breaking down borders and hierarchies between the two languages. To illustrate this, cultural practices and uses of bilingualism are examined from both a sociolinguistic and a poetic point of view, with examples of how puns, (mis)pronunciations, slang, loanwords, and mixtures of Spanish and English are used in bilingual poetry for formal and polemical effect. Meaningful Literary Names: Their Forms and Functions, and their Translation, pp 161-178 Luca Manini (Montalto, Italy) Proper nouns, which have a special status within the language system as opposed to common nouns, can

be used as characterizing devices in literary texts and so become a meaningful element in the texture of such works. Names can in this way be endowed with an extra semantic load that makes them border on wordplay. The presence of meaningful literary names is likely to cause problems when the text is to be translated, the question being not only whether the transposition of such names in the target language is technically possible, but also to what extent this would be viewed as an appropriate procedure. This paper, which reflects research in progress, explores the issue by analyzing a two-part corpus of texts: The first part consists of twentieth-century Italian translations of English Restoration comedies and the second of Italian translations of Dickens's novels. There are occasional references to other English literary texts from the medieval and Renaissance periods as well. Technical problems of translating proper nouns are taken into consideration, along with other factors which may influence the translator's choices, such as genre, intended audience, cultural tradition and general norms of translation. The Pitfalls of

Metalingual Use in Simultaneous Interpreting, pp 179-198 Sergio Viaggio (United Nations, Vienna, Austria) For the simultaneous interpreter, puns and other instances of metalingual use, involving as they do an interplay of form, content and pragmatic intention, may represent a formidable challenge. The interpreter's most efficient tool is his or her adroitness at determining the pun's or the metalingual comment's relevance on the basis of an instant analysis of the communication situation, with particular attention to the speaker's pragmatic intention and intended sense, as well as the audience's needs and expectations. Actual examples from United Nations meetings are used to illustrate the different factors affecting the rendition of wordplay and metalanguage and some suggestions are made towards improving the training of interpreters. Caught in the Frame: A Target-Culture Viewpoint on Allusive Wordplay, pp 199-218 Ritva Leppihalme (University of Helsinki, Finland) Allusive wordplay-stretches of preformed linguistic material (or frames) that have undergone lexical, grammatical, or situational modification - is so culture-specific that it

is not only hard for translators working from a foreign language to translate but easy for them to miss altogether. This paper discusses examples of allusive wordplay in English fiction and journalism and reports on an experiment designed to investigate the recognition of frames and carried out on twenty-one Finnish university students of English. Student translations of some of the examples are also discussed. It is argued that a translator who wants to produce a coherent target text and to avoid 'culture bumps' (Archer 1986) must above all pay attention to the function of the wordplay in the relevant context. Passages that include modified frames will often need to be rewritten, as attempts to evoke source-culture frames are unlikely to work with target-culture readers to whom such frames are unfamiliar. Target-culture frames, on the other hand, may be puzzling in a text which is set in the source-culture context. 'Curiouser and Curiouser': Hebrew Translation of Wordplay in 'Alice's Adventures in Wonderland', pp 219-234 Rachel Weissbrod (The Open University of Israel) In 'Alice's Adventures in Wonderland', wordplay has a central role

in producing an ambivalent text, that is, one which can function at one and the same time in children's literature and in adult literature. This paper examines, from a norm-oriented approach, how instances of wordplay were treated in three Hebrew translations. The first translation, published in 1923, was subject to a norm which required acceptability at the socio-cultural level. Instances of wordplay were accordingly replaced by completely new ones that were rooted in Jewish tradition. In the second translation, published in 1951, the treatment of wordplay was determined by a different norm, one which required a rephrasing of Carroll's work in an elevated style. Only in the third translation, published in 1987, was the translator sufficiently free from socio-cultural and stylistic dictates to cope with Carroll's wordplay with all the means available. In this last translation, elements which are foreign to Carroll's world or style are introduced only insofar as they helped the translator replace the original wordplay. Translating Jokes for Dubbed Television Situation Comedies, pp 235-257 Patrick Zabalbeascoa (Universitat Pompeu Fabra, Barcelona, Spain) This paper

examines Catalan and Spanish dubbed versions of English TV comedy series such as 'Yes, Minister', with special attention to wordplay as a particular instance of the more general problem of translating comedy for television. The objective is to show that producing foreign-language dubbed versions of audiovisual texts has enough in common with other types of translating assignments to be included within translation studies, as well as to contribute to the area of quality assessment and evaluation of translations by proposing that the criteria for judging a translation should be clear, flexible and realistic, and should take into account the translator's limitations and working environment. The paper also proposes a classification of jokes, with further examples from translations of British situation comedy into Catalan, and presents the concept of 'stylebook' as a helpful bridge between general statements about translation and specific contextualized translating assignments. Dante's Puns in English and the Question of Compensation, pp 259-276 Edoardo Crisafulli (University College, Dublin, Ireland) After a comparative analysis of

the source and target texts, this paper attempts to put forward an explanation to account for H. F. Cary's avoidance policy as he deals with Dante's puns in his early nineteenth-century translation of the 'Divina Commedia'. The aim is to consider the findings of the analysis in relation to the issue of compensation. No discussion of translation can avoid dealing with this issue, but there is evidence that compensation cannot be called upon to account for all the foregrounding devices in the target text. In particular, the relationship between compensation and the translator's ideology must be taken into account. The paper concludes by suggesting some conditions which might make it easier to identify instances of compensation. Harvey's (1995) descriptive framework is employed with a view to improving its explanatory power. No-Man's Land on the Common Borders of Linguistics, Philosophy & Sinology: Polysemy in the Translation of Ancient Chinese Texts, pp 277-304 Seán Golden (Universitat Autònoma de Barcelona, Spain) This paper treats polysemy as the driving force of ancient Chinese rhetoric, inherent in the language and its system of

writing, not just as an embellishment but as the very basis of discourse, and intrinsic to the multiple meanings expressed by the text; in this way, text may represent a worldview that is radically different from the Western one and that is encoded syntactically, semantically, rhetorically, and visually (in the case of the Chinese written character) in the language. This challenges the comprehension of ancient Chinese texts by translators and their reproduction in languages that share neither the worldview nor the multiple codes involved. From the no-man's land on the common borders of linguistics, philosophy and sinology, the translator may glimpse the horizon of understanding within which the original operates, while knowing that the readership of a translation is looking at a different horizon. Better understanding of this fact by the translator should contribute to a better interpretation of the multiple meanings contained in the original and to a translation that maintains as many meanings as possible. It is all too often assumed that humour is the very effect of a text. But humour is not a perlocutionary effect in its own right, nor is laughter. The humour of a text may be as general a characteristic as a serious text's seriousness. Like serious texts, humorous texts have many different purposes and effects. They can be subdivided into specific subgenres, with

their own perlocutionary effects, their own types of laughter (or even other reactions). Translation scholars need to be able to distinguish between various kinds of humour (or humorous effect) when comparing source and target texts, especially since the notion of "effect" pops up so frequently in the evaluation of humorous texts and their translations. In this special issue of *The Translator*, an attempt is made to delineate types of humorous effect, through careful linguistic and cultural analyses of specific examples and/or the introduction of new analytical tools. For a translator, who is both a receiver of the source text and sender of the target text, such analyses and tools may prove useful in grasping and pinning down the perlocutionary effect of a source text and devising strategies for producing comparable effects in the target text. For a translation scholar, who is a receiver of both source and target texts, the contributions in this issue will hopefully provide an analytical framework for the comparison of source and target perlocutionary effects.

How to Tell a Joke John Benjamins Publishing

A New York Times Notable Book for 2011 One of The Economist's 2011 Books of the Year People speak different languages, and always have. The Ancient Greeks took no notice of anything unless it was said in Greek; the Romans made everyone speak Latin; and in India, people learned their neighbors' languages—as did many ordinary Europeans in times past (Christopher Columbus knew Italian, Portuguese, and Castilian Spanish as well as the classical languages). But today, we all use translation to cope with the diversity of languages. Without translation there would be no world news, not much of a reading list in any subject at college,

no repair manuals for cars or planes; we wouldn't even be able to put together flat-pack furniture. Is That a Fish in Your Ear? ranges across the whole of human experience, from foreign films to philosophy, to show why translation is at the heart of what we do and who we are. Among many other things, David Bellos asks: What's the difference between translating unprepared natural speech and translating Madame Bovary? How do you translate a joke? What's the difference between a native tongue and a learned one? Can you translate between any pair of languages, or only between some? What really goes on when world leaders speak at the UN? Can machines ever replace human translators, and if not, why? But the biggest question Bellos asks is this: How do we ever really know that we've understood what anybody else says—in our own language or in another? Surprising, witty, and written with great joie de vivre, this book is all about how we comprehend other people and shows us how, ultimately, translation is another name for the human condition.

All too often, this brilliant novel of thwarted love and revenge miscarried has been read for its political implications. Now, a quarter century after The Joke was first published and several years after the collapse of the Soviet-imposed Czechoslovak regime, it becomes easier to put such implications into perspective in favor of valuing the book (and all Kundera's work) as what it truly is: great, stirring literature that sheds new light on the eternal themes of human existence. The present edition provides English-language readers an important further means toward reevaluation of The Joke. For reasons he describes in his Author's Note, Milan Kundera devoted much time to creating (with the assistance of his American publisher-editor) a completely revised translation that reflects his original as closely as any translation possibly can: reflects it in its fidelity not only to the words and syntax but also to the characteristic dictions and tonalities of the novel's narrators. The result is nothing less than the restoration of a classic.
