Give Customers a Reason to Choose You Over Your Competitors Cram101

Why should I do business with you... and not your competitor? Whether you are a retailer, manufacturer, distributor, or service provider – if you cannot answer this question, you are surely losing customers, clients and market share. This eye-opening book reveals how identifying your competitive advantages and trumpeting them to the marketplace is the most surefire way to close deals, retain clients, and stay miles ahead of the competition. The five fatal flaws of most companies: ? They don't have a competitive advantage but think they do ? They have a competitive advantage but don't know what it is—so they lower prices instead ? They know what their competitive advantage is but neglect to tell clients about it ? They mistake “strengths” for competitive advantages ? They don't concentrate on competitive advantages when making strategic and operational decisions The good news is that you can overcome these costly mistakes – by identifying your competitive advantages and creating new ones. Consultant, public speaker, and competitive advantage expert Jaynie Smith will show you how scores of small and large companies substantially increased their sales by focusing on their competitive advantages. When advising a CEO frustrated by his salespeople's inability to close deals, Smith discovered that his company stayed on schedule 95 percent of the time – an achievement no one else in his industry could claim. By touting this and other competitive advantages to customers, closing rates increased by 30 percent—and so did company revenues. Jack Welch has said, “If you don't have a competitive advantage, don't compete.” This straight-to-the-point book is filled with insightful stories and specific steps on how to pinpoint your competitive advantages, develop new ones, and get the message out about them. “The biggest marketing flaw in most companies is their failure to fully reap the benefits of their competitive advantages. Either they think they have a competitive advantage but don't. Or they have one and don't realize it. Or they know they have a strong competitive advantage but fail to promote it adequately to their customers and prospects. “In my research with middle-market companies, I found only two CEOs out of 1,000 who could clearly name their companies' competitive advantages. The other 99.8 percent could offer only vague, imprecise generalities. These same CEOs often rely on outside consultants to guide strategic-planning sessions. Yet, in my experience, very few consultants – even seasoned ones – give competitive advantage evaluation more than a superficial glance.... “Ignoring your competitive advantages can be an expensive and even fatal mistake. Because no matter the size of your company or the kind of business you are in, your competitive advantages should be the foundation of all your strategic and operational decisions. They're the reasons customers choose to buy from you instead of the other guy.” – From *Creating Competitive Advantage*

Named one of the best strategy books of 2021 by strategy+business Get to better, more effective strategy. In nearly every business segment and corner of the world economy, the most successful companies dramatically outperform their rivals. What is their secret? In *Better, Simpler Strategy*, Harvard Business School professor Felix Oberholzer-Gee shows how these companies achieve more by doing less. At a time when rapid technological change and global competition conspire to upend traditional ways of doing business, these companies pursue radically simplified strategies. At a time when many managers struggle not to drown in vast seas of projects and initiatives, these businesses follow simple rules that help them select the few ideas that truly make a difference. *Better, Simpler Strategy* provides readers with a simple tool, the value stick, which every organization can use to make its strategy more effective and easier to execute. Based on proven financial mechanics, the value stick helps executives decide where to focus their attention and how to deepen the competitive advantage of their business. How does the value stick work? It provides a way of measuring the two fundamental forces that lead to value creation and increased financial success—the customer's willingness-to-pay and the employee's willingness-to-sell their services to the business. Companies that win, Oberholzer-Gee shows, create value for customers

by raising their willingness-to-pay, and they provide value for talent by lowering their willingness-to-sell. The approach, proven in practice, is entirely data driven and uniquely suited to be cascaded throughout the organization. With many useful visuals and examples across industries and geographies, *Better, Simpler Strategy* explains how these two key measures enable firms to gauge and improve their strategies and operations. Based on the author's sought-after strategy course, this book is your must-have guide for making better strategic decisions.

Shift your strategy downstream. Why do your customers buy from you rather than from your competitors? If you think the answer is your superior products, think again. Products are important, of course. For decades, businesses sought competitive advantage almost exclusively in activities related to new product creation. They won by building bigger factories, by finding cheaper raw materials or labor, or by coming up with more efficient ways to move and store inventory—and by inventing exciting new products that competitors could not replicate. But these sources of competitive advantage are being irreversibly leveled by globalization and technology. Today,

competitors can rapidly decipher and deploy the recipe for your product's secret sauce and use it against you. "Upstream," product-related advantages are rapidly eroding. This does not mean that competitive advantage is a thing of the past. Rather, its center has shifted. As marketing professor Niraj Dawar compellingly argues, advantage is now found "downstream," where companies interact with customers in the marketplace. *Tilt* will help you grasp the global nature of this downstream shift and its profound implications for your strategy and your organization. With vivid examples from around the world, ranging across industries and sectors, Dawar shows how companies are reorienting their strategies around customer interactions to create and capture unique value. And he demonstrates how, unlike product-related advantage, this value is cumulative, continuously building over time. In an increasingly customer-centered world marketplace, let *Tilt* serve as your guide to shifting your strategy downstream—and achieving enduring competitive advantage.
