In this unprecedented view from the trenches, prosecutor turned champion for the innocent Mark Godsey takes us inside the frailties of the human mind as they

unfold in real-world wrongful convictions. Drawing upon stories from his own career, Godsey shares how innate psychological flaws in judges, police, lawyers,

and juries coupled with a “tough on crime” environment can cause investigations to go awry, leading to the convictions of innocent people. In *Blind Injustice*, Godsey explores distinct psychological human weaknesses inherent in the criminal justice system—confirmation bias, memory malleability, cognitive dissonance, bureaucratic denial, dehumanization, and others—and illustrates each with stories from his time as a hard-nosed prosecutor and then as an

attorney for the Ohio Innocence Project. He also lays bare the criminal justice system’s internal political pressures. How does the fact that judges, sheriffs, and prosecutors are elected officials influence how they view cases? How can defense attorneys support clients when many are overworked and underpaid? And how do juries overcome bias leading them to believe that police and expert witnesses know more than they do about what evidence means? This

book sheds a harsh light on the unintentional yet routine injustices committed by those charged with upholding justice. Yet in the end, Godsey recommends structural, procedural, and attitudinal changes aimed at restoring justice to the criminal justice system.

**Policing Black Men** New Press, The Traditionally, legal problems arising in connection with international business transactions had to be solved by a national law. This view was challenged in post war scholarly writing and transnational practice. It was argued that transnational rules (such as transnational

contracts, general conditions, trade usages, general principles, uniform rules, arbitral cases) should be applied instead. Often, these transnational rules are referred to as *lex mercatoria*. This volume analyzes the different legal approaches to international business problems (including the theory of *lex mercatoria*) as well as their implications for international practice. As such, the relevance and importance of substantive law and conflict of laws

and of national, international and transnational rules are discussed both with regard to their application by national courts and by international commercial arbitrators.

The European integration project currently faces profound political, economic, legal, and societal challenges. These challenges seem increasingly to

overburden the European Union as well as the cohesion among the Member States, and therefore pose a serious threat to the integration project. The EU faces a major task in coping with this situation and it is one that calls for new approaches and ideas This book addresses the major challenges confronting the EU, analyses the consequences for the integration project, and develops fresh perspectives on the EU's future prospects for

coping with the most debated, current and upcoming issues, such as the rise of Euroscepticism or the contested idea of an 'ever-closer union'. Renowned experts in European Studies from the fields of political science, law, economics and sociology provide an interdisciplinary perspective on the different dimensions of the EU's crisis-laden situation and question whether the EU's existing problem-solving mechanisms and methods are sufficient to address

the imminent tasks. This text will be of key interest to scholars and students of EU Politics, European Politics, European Governance, and more broadly European law, history and the wider social sciences.

Global activity has broadly strengthened and is expected to improve further in 2014-15, according to the April 2014 WEO, with much of the impetus for growth coming from advanced economies. Although

downside risks have diminished overall, lower-than-expected inflation poses risks for advanced economies, there is increased financial volatility in emerging market economies, and increases in the cost of capital will likely dampen investment and weigh on growth. Advanced economy policymakers need to avoid a premature withdrawal of monetary accommodation. Emerging market economy policymakers must adopt measures to

changing fundamentals, facilitate external adjustment, further monetary policy tightening, and carry out structural reforms. The report includes a chapter that analyzes the causes of worldwide decreases in real interest rates since the 1980s and concludes that global rates can be expected to rise in the medium term, but only moderately. Another chapter examines factors behind the fluctuations in emerging market economies' growth and concludes that strong

growth in China played a key role in buffering the effects of the global financial crisis in these economies.

**Second Edition** Tata McGraw-Hill Education A provocative argument that the frustrations of globalization stem from the gap between the expectations created and the lagging economic reality in poor countries. The enemies of globalization—whether they denounce the exploitation of poor countries by rich ones or the imposition of Western values on traditional cultures—see the new world economy as forcing a system on people who do not want it. But the

truth of the matter, writes Daniel Cohen in this provocative account, may be the reverse.

Globalization, thanks to the speed of twenty-first-century communications, shows people a world of material prosperity that they do want—a vivid world of promises that have yet to be fulfilled. For the most impoverished developing nations, globalization remains only an elusive image, a fleeting mirage. Never before, Cohen says, have the means of communication—the

media—created such a global consciousness, and never have economic forces lagged so far behind expectations. Today's globalization, Cohen argues, is the third act in a history that began with the Spanish Conquistadors in the sixteenth century and continued with Great Britain's nineteenth-century empire of free trade. In the nineteenth century, as in the twenty-first, a revolution in transportation and communication did not promote widespread

wealth but favored polarization. India, a part of the British empire, was just as poor in 1913 as it was in 1820. Will today's information economy do better in disseminating wealth than the telegraph did two centuries ago? Presumably yes, if one gauges the outcome from China's perspective; surely not, if Africa's experience is a guide. At any rate, poor countries require much effort and investment to become players in the global game. The view that technologies and world

trade bring wealth by themselves is no more true today than it was two centuries ago. We should not, Cohen writes, consider globalization as an accomplished fact. It is because of what has yet to happen—the unfulfilled promises of prosperity—that globalization has so many enemies in the contemporary world. For the poorest countries of the world, the problem is not so much that they are exploited by globalization as that they are forgotten and excluded.

With the eloquence of Ta-Nehisi Coates and the persuasive research of Michelle

Alexander, a former federal prosecutor explains how the system really works, and how to disrupt it. Cops, politicians, and ordinary people are afraid of black men. The result is the Chokehold: laws and practices that treat every African American man like a thug. In this explosive new book, an African American former federal prosecutor shows that the system is working exactly the way it's supposed to. Black men are always under watch, and police violence is widespread—all with

the support of judges and politicians. In his no-holds-barred style, Butler, whose scholarship has been featured on 60 Minutes, uses new data to demonstrate that white men commit the majority of violent crime in the United States. For example, a white woman is ten times more likely to be raped by a white male acquaintance than be the victim of a violent crime perpetrated by a black man. Butler also frankly discusses the problem of black on black violence and how to keep

communities safer—without relying as much on police. Chokehold powerfully demonstrates why current efforts to reform law enforcement will not create lasting change. Butler’s controversial recommendations about how to crash the system, and when it’s better for a black man to plead guilty—even if he’s innocent—are sure to be game-changers in the national debate about policing, criminal justice, and race relations. *Anti-Money Laundering*

In the aftermath of four Yugoslav wars, ongoing

efforts at reconstruction in South Eastern Europe have devoted relatively limited attention to dimensions of human security that enhance protections for the region's most vulnerable populations in their daily lives. It is in this context that South Eastern Europe, and especially the Western Balkan region, has emerged as a nexus point in human trafficking. Human Trafficking, Human Security, and the Balkans brings together leading scholars, NGO representatives, and

government officials to analyze and offer solutions to this challenge. The contributors explore the economic dynamics of human trafficking in an era of globalization, which has greatly facilitated not only the flow of goods and services but also the trade in human beings. They also examine the effectiveness of international and transnational policies and practice, the impact of peacekeeping forces, and the emergence of national and regional action plans

in the Western Balkans and, more broadly, in South Eastern Europe. Finally, they consider the nature and ramifications of the gap between human security rhetoric and institutional policy steps against human trafficking. The second edition of the Criminal Law Sourcebook has been significantly expanded in order to provide law students with a comprehensive selection of key materials drawn from law reports, statutes, Law Commission Consultation

Papers and Reports, and Home Office publications.

The materials reflect the range of topics taught on the vast majority of undergraduate and CPE criminal law modules, and provide a platform from which the reader can embark upon a more critical evaluation of both theory and doctrine.

Extensive extracts are included from a number of recent landmark rulings, including decisions by the House of Lords in *B v DPP* (defence of mistake), *R v Smith* (objective test for the defence of

provocation), *R v Hinks* (whether the recipient of a gift can be a thief), and *R v Powell and Daniels*; *R v English* (scope of accessory liability for murder), and the Court of Appeal's ruling in *In Re A* (conjoined twins). Recent statutory initiatives that have been incorporated include the Protection from Harassment Act 1997, the Criminal Justice (Terrorism and Conspiracy) Act 1998, and the Sexual Offences (Amendment) Act 2000. The impact of the Human Rights Act 1998, in so far

as it relates to substantive criminal law, is also covered. Substantial extracts are provided from all relevant Law Commission and Home Office law reform publications. In addition to the draft Criminal Code Bill, materials have been selected dealing with reform of sexual offences, consent, conspiracy to defraud, deception offences, offences against the person, accessorial liability and involuntary manslaughter.

 Anti-Money Laundering is the definitive reference on money laundering and practice. First an outline will be given of the general approach taken by supra-national organisations like the United Nations and the European Council. Next the approach taken by international organisations and initiatives on the basis of the supra-national initiatives will be outlined

by senior members of those organisations. A number of countries will then describe their specific prevention legislation. Countries involved will all be member-countries of the FATF (Financial Action Task Force on Money Laundering). Finally there will be an overview to enable the reader to make a comparison between the most important topics of money laundering legislation and rules in the different countries.

What is national identity? What are the main challenges posed to national identity by the strengthening of regional identities and the growth of cultural diversity? How is right-wing nationalism connected to the desire to preserve a traditional image of national identity? Can we forge a new kind of national identity that responds to the challenges of globalization and other

deep-seated changes? In this important new book, Montserrat Guibernau answers these and other compelling questions about the future of national identity. For Guibernau, the nation-states traditional project to unify its otherwise diverse population by generating a shared sense of national identity among them was always contested, and was accomplished with various degrees of success in Europe and North America. Such processes involved the cultural and

linguistic homogenization of an otherwise diverse citizenry and were pursued by different means according to the specific contexts within which they were applied. At present, the impact of strong structural socio-political and economic transformations has resulted in greater challenges being posed to the idea that all citizens of a state should share a

homogeneous national identity. Diversity is increasing, and plans for further European integration contain the potential to generate significant tensions, casting greater doubt on the classical concept of national identity. As a result, we are faced with a set of new dilemmas concerning the way in which national identity is constructed and defined.

The book offers a theoretical as well as a comparative approach, with case studies involving Austria, Britain, Canada and Spain, as well as the European Union and the United States of America. The Identity of Nations will be essential reading for advanced students and professional scholars in sociology, politics and international relations.
