Designed for the students of B.E./B.Tech (Computer Science and Engineering/IT), M.Sc (Computer Science), MCA, and M.Sc (Data Science), this textbook mainly focuses on issues and solutions concerned with data explosion problems. Without the prior knowledge of database world, the reader of this book can easily understand the evolution of database technology in handling big data. With a focus on the analytical theory to handle high dimensional data, this text also presents illustrations using analytical tool R. The role of real-time system architecture and platforms, Hadoop ecosystem components and NoSQL database MongoDB to handle big data is also elaborated. Each chapter ends with exercise problems and multiple-choice questions, which will motivate the readers to further analyse the applicability of concepts. DISTINCTIVE FEATURES • Worked out coding using R and MongoDB and related questions using these platforms • Various analytical techniques with sample data (such as clustering, classification, rough set theory, association rules) • Basics of real-time processing, issues and remedies • Several types of data, including time-series data, correlations among data and remedial techniques to handle the issues raised in the underlying domain • Case studies/examples for in-depth understanding among the students TARGET AUDIENCE • B.E./B.Tech (Computer Science and Engineering/IT) • M.Sc (Computer Science/Data Science) • MCA

Accounting Information Systems, 1st Edition by Arline Savage, Danielle Brannock, and Alicja Fokinska presents a modern, professional perspective that develops the necessary skills students need to be the accountants of the future. Through high-quality assessment and integrated homework, students learn course concepts more efficiently and understand how course concepts are applied in the workplace through real-world application. Accounting Information Systems also focuses on helping students learn how to make informed business decisions through case-based learning and data analysis applications. Students work through Julia's Cookies, a flexible, running case that helps them understand how various systems come together to support a business, and how those systems evolve. Students also develop a critical thinking mindset by working through integrated analysis questions that take a tool-agnostic approach, as well as Tableau cases so students can practice making real business decisions using leading technology. To further help prepare students to be the accountants of the future, the authors incorporate their own industry experience and help showcase how AIS concepts are used through resources including Sample LinkedIn Job Posts and the Featured Professionals video series. These tools spotlight real accounting professionals and job opportunities, while connecting to chapter material, allowing student to see how what they're learning applies to business, as well as visualize the different paths AIS can take them.

Frameworks for Market Strategy helps students understand how to develop and implement a market strategy and how to manage the marketing process. Marketing activity is the source of insight on the market, customers, and competitors and lies at the core of leading and managing a business. To understand how marketing fits into the broader challenge of managing a business, Capon and Go address marketing management both at the business and functional levels. The book moves beyond merely presenting established procedures, processes, and practices and includes new material based on cutting-edge research to ensure students develop strong critical thinking and problem-solving skills for success. In this European edition, Capon and Go have retained the strong framework of the book, but have updated the cases, examples, and discussions to increase the book's relevance for students outside the USA. Key features include: • A strong strategic focus, teaching students how to analyze markets, customers, and competitors to plan, execute, and evaluate a winning market strategy • Practical examples from a range of contexts, allowing students to develop the skills necessary to work in for-profit, public, or non-profit firms • Emphasis on understanding the importance of working across organizational boundaries to align firm capabilities • Full chapters devoted to key topics, including brand management, digital marketing, marketing metrics, and ethical as well as social responsibilities • Focus on globalization with a chapter on regional and international marketing • Multiple choice, discussion, and essay questions at the end of each chapter Offering an online instructor's manual and a host of useful pedagogy - including videos, learning outcomes, opening cases, key ideas, exercises, discussion questions, a glossary, and more - this book will provide a solid foundation in marketing management, both for those who

will work in marketing departments, and those who will become senior executives.
