 Microbiology Microbiology Microbiology (from Greek
 μικρός, mikros, "small"; βίος, bios, "life"; and
 -λογία, -logia) is the study of microorganisms,
 those being unicellular (single cell), multicellular
 (cell colony), or acellular (lacking cells).
 Microbiology

encompasses numerous sub-disciplines including virology, bacteriology, protistology, mycology, immunology and parasitology.
 Microbiology - Wikipedia
 Microbiology is the study of all living organisms that are too small to be visible with the naked eye. This includes bacteria, archaea, viruses, fungi, prions, protozoa and algae, collectively known as 'microbes'.
 What is Microbiology? | Microbiology Society
 Microbiology, the scientific study of microorganisms, a diverse group of generally minute simple life-forms, including bacteria, algae, and viruses. The field is concerned with the structure, function, and classification of such organisms and with ways of both exploiting and controlling their activities.
