Rare edition with unique illustrations. When Jacob and Wilhelm Grimm published their Children's and Household Tales in 1812, followed by a second volume in 1815, they had no idea that such stories as "Rapunzel," "Hansel and Gretel," and "Cinderella" would become the most celebrated in the world. From "The Frog King" to "The Golden Key," wondrous worlds unfold--heroes and heroines are rewarded, weaker animals triumph over the strong, and simple bumpkins prove themselves not so simple after all. A delight to read, *The Original Folk and Fairy Tales of the Brothers Grimm* presents these peerless stories to a whole new generation of readers. Little Red Riding Hood, or Little Red Ridinghood, also known as Little Red Cap or simply Red Riding Hood, is a European fairy tale about a young girl and a Big Bad Wolf.

*My Book of Feelings* New York Review of Books

Seventeen-year-old Phil has felt like an outsider as long as he can remember. All Phil has ever known about his father is that he was Number Three on his mother's long list—third in a series of affairs that have set Phil's family even further apart from the critical townspeople across the river. As for his own sexuality, Phil doesn't care what the neighbors will think; he's just waiting for the right guy to come along. But Phil can't remain a bystander forever. Not when he's surrounded by his mother, Glass, who lives by her own rules and urges Phil to be equally strong; his sister, Dianne, who is abrupt and willful, with secrets to share; his uncle Gable, a restless mariner, defined by his scars; his best friend, Kat, who is generous but possessive. And finally, there is distant Nicholas, with whom Phil falls overwhelmingly in love—until he faces the ultimate betrayal and must finally find his worth . . . and place in the world.

*Government Communication in Australia* NorthSouth Books  
Instagram is at the heart of global digital culture, having made selfies, filters and square frames an inescapable part of everyday life since it was launched in 2010. In the first book-length examination of Instagram, Tama Leaver, Tim Highfield and Crystal Abidin trace how this quintessential mobile photography app has developed as a platform and a culture. They consider aspects such as the new visual social media aesthetics, the rise of Influencers and new visual economies, and the complex politics of the platform as well as examining how Instagram's users change their use of the platform over time and respond to evolving features. The book highlights the different ways Instagram is used by subcultural groups around the world, and how museums, restaurants and public spaces are striving to be 'Insta-worthy'. Far from just capturing milestones and moments, the authors argue that Instagram has altered the ways people communicate and share, while also creating new approaches to marketing, advertising, politics and the design of spaces and venues. Rich with grounded examples from across the world, from birth pictures to selfies at funerals, Instagram is essential reading for students and scholars of media and communication.

*Doodle-stitching* Pan Macmillan

The second edition of this collection of 13 original papers contains an updated introductory section detailing the significance that the original articles published in 1992 have for the further development of research into linguistic politeness into the 21st century. The original articles focus on the phenomenon of politeness in language. They present the most important problems in developing a theory of linguistic politeness, which must deal with the crucial differences between lay notions of politeness in different cultures and the term 'politeness' as a concept within a theory of linguistic politeness. The universal validity of the term itself is called into question, as are models such as those developed by Brown and Levinson, Lakoff, and Leech. New approaches are suggested. In addition to this theoretical discussion, an empirical section presents a number of case studies and research projects in linguistic politeness. These show what has been achieved within current models and what

still remains to be done, in particular with reference to cross-cultural studies in politeness and differences between a Western and a non-Western approach to the subject. The publication of this second edition demonstrates that the significance of the collection is just as salient in the first decade of the new millennium as it was at the beginning of the 1990s.

Anthropologists have written a great deal about the coastal adaptations and seafaring traditions of Pacific Islanders, but have had much less to say about the significance of rivers for Pacific island culture, livelihood and identity. The authors of this collection seek to fill that gap in the ethnographic record by drawing attention to the deep historical attachments of island communities to rivers, and the ways in which those attachments are changing in response to various forms of economic development and social change. In addition to making a unique contribution to Pacific island ethnography, the authors of this volume speak to a global set of issues of immense importance to a world in which water scarcity, conflict, pollution and the degradation of riparian environments afflict growing numbers of people. Several authors take a political ecology approach to their topic, but the emphasis here is less on hydro-politics than on the cultural meaning of rivers to the communities we describe. How has the cultural significance of rivers shifted as a result of colonisation, development and nation-building? How do people whose identities are fundamentally rooted in their relationship to a particular river renegotiate that relationship when the river is dammed to generate hydro-power or polluted by mining activities? How do blockages in the flow of rivers and underground springs interrupt the intergenerational transmission of local ecological knowledge and hence the ability of local communities to construct collective identities rooted in a sense of place?

Congressional hearings are often the most requested government documents in US libraries. However, among the genres that have been traditionally of interest to political discourse analysts - e.g. political speeches, political interviews, policy documents - hearings have not been of much scrutiny on the part of discourse scholars, an attitude somehow contrasting with the lay public's interest. Cinzia Gigliani takes the opportunity to gain a unique view into the actors, the interested parties, the issues, from a linguistic and rhetorical perspective. Her intent is to provide an in-depth analysis of witnesses' opening statements, which are probably the most salient parts in a congressional hearing. The investigation begins with, but is not constricted by, theoretical aspects, which are integrated with empirical observations and suggestions for critical reading.

*Psychology of Communication* Sterling Publishing (NY)

This successful textbook on the psychology of communication explains - here in English for the first time - how human communication works in a very understandable way. It begins with the explanation of central terms and the explanation of known communication models (e.g. the models according to Schulz von Thun, Watzlawick, Hargie and colleagues), then describes means of non-verbal and verbal communication and ends with a clear and structured summary of communication forms. Concrete fields of application, stumbling blocks (e.g. intercultural differences in communication), practical examples and digressions in the book round off what has been read and consolidate what has been learned. In addition, free learning materials are available on the Internet with which readers can test their knowledge acquisition.

Pop Art is widely regarded as the most significant artistic movement since 1945. Reflecting on the cult of celebrity, commodity fetishism and media reproduction that permeated everyday life in the postwar era, Pop Art continues to shape our society's cultural self-understanding to this day. A central characteristic of Pop Art was the dialogue between design and art, which is now being explored in 'Pop Art Design' at the Vitra Design Museum as the first-ever comprehensive exhibition on the topic. Works by such artists as Andy Warhol, Claes Oldenburg, Roy Lichtenstein or Judy Chicago are paired with design objects by Charles Eames, George Nelson, Achille Castiglioni and Ettore Sottsass. The exhibition is supplemented with a multitude of further exhibits, such as album covers, magazines, films and photos of contemporary interiors.0Exhibition: Vitra Design Museum, Weil am Rhein, Germany (13.10.2012-3.2.2013).
