ROBERTS AINSLEY

Problem Set 2, Microeconomics 2. - New York University Microeconomics II Problem Set III Microeconomics III Problem Set 1 This problem set covers rationalizable and strictly dominated strategies, best replies, and pure-strategy Nash equilibria (i.e., equilibria where mixed strategies are not used). The first three questions are in strategic form, with nice strategies. The remaining questions, with continuous strategies, are more ... Microeconomics III Problem Set 1 - Mike Microeconomics III Problem Set 5 1. In class, we considered a numerical example of a simple two-player, two-outcome principal agent model. Here, we reconsider this example for general values. A risk-neutral agent can either put in low or high effort. The probability of project success is given by p if the effort level is low, Microeconomics III Problem Set 5 - Mike Microeconomics III Problem Set 2 This problem set focuses on mixed strategy equilibria in normal-form games. 1. Two students are responsible for a joint assignment. A good grade requires costly effort on the part of both students. Each student can elect to invest effort (work) or not invest effort (shirk). The game in strategic form is: $S \ W \ S \ 0, 0 \ 0, -c$ Microeconomics III Problem Set 2 - mikeshor.com Problem Set Questions (PDF) Problem Set Solutions (PDF) Problem Solving Video. In the video below, a teaching assistant demonstrates his approach to the solution for problems 3 and 4 from the problem set. The teaching assistant notes common mistakes made by students and provides problem solving techniques for approaching similar questions on ... Problem Set 6 | Unit 5: Monopoly and Oligopoly ... This course offers an introduction to noncooperative game theory. The course is intended both for graduate students who wish to develop a solid background in game theory in order to pursue research in the applied fields of economics and related disciplines, and for students wishing to specialize in economic theory. While the course is designed for graduate students in economics, it is open to ... Microeconomic Theory II | Economics | MIT OpenCourseWare Start studying Microeconomics: Problem Set 2.
