The Law of Secured Credit
Oxford University Press,

Mayson, French & Ryan on Company Law, in its 25th year, provides a refined approach to Company Law; it is firmly established as the most-up-to-date and accurate account of company law available. Presenting this complex and intricate subject with great clarity, it sheds light on the complexities of this field of law, clarifying any areas of uncertainty or ambiguity in a straightforward and engaging manner. As the full implementation of the Companies Act 2006

remains uncertain, this edition is fully updated to reflect the current situation and how this impacts upon contemporary law. The legislative framework is supported with discussion of the provisions relating to the creation, financing and management of companies, as well as their insolvency and liquidation. Quotations from important case judgments accompany the discussion of substantive case law, providing detailed analysis of the implications. With annual new editions, Mayson, French & Ryan combines the technical and practical detail with an intellectual perspective, making it an invaluable account of the law as it stands for undergraduates, postgraduates and

Practitioners alike. Online Resource Centre The accompanying Online Resource Centre for this title provides quarterly updates, ensuring that students are kept up-to-date with all significant developments. The Online Resource Centre will also provide a timeline which outlines the implementation plan for the Companies Act 2006, clearly stating when each section of the new act is due to come into force.

Their natural enemies largely determine the population size and dynamic behavior of many plant-eating insects. Any reduction in enemy number can result in an insect outbreak. Applied biological control is thus one strategy for restoring functional biodiversity in many agroecosystems.

Globally, there has been a shift from securities being held directly by an investor, to a situation in which many securities are held via an intermediary.

The existence of one or more intermediaries between the investor and the issuer has a potentially significant impact on the rights of the investor, the role and obligations of the issuer, and on the position and responsibilities of the intermediary. However, different jurisdictions have dealt with the issues arising from

intermediation in a variety of ways. In the UK, for example, the concept of a trust is used to explain the different rights and obligations which arise in this scenario, whereas in the US the issues have been addressed by legislation, in the form of UCC Article 8. This variety is problematic, given that it is possible for an investor to hold securities in a number of different jurisdictions. A new UNIDROIT Convention on the issue of Intermediated Securities, the Geneva Securities Convention 2009, aims to create a common framework for dealing with these issues.

This collection of essays explores the issues that

arise when securities are held via an intermediary, and in particular assesses the solutions put forward by the new Convention on this issue. It will be essential reading for practitioners and academics.

Goode on Legal Problems of Credit and Security Bloomsbury Publishing

This Goode book gives a concise and lucid explanation of the law and regulation of credit and security. Roy Goode and Louise Gullifer are both well respected academics who offer clarity and rigorous analysis and interpretation of the legal principles behind credit and security transactions. The fundamental concepts of common law and equity as they affect secured transactions are clearly explained and the book explores how underlying principles apply to different transactions. The authors define how security can be applied as part of a credit agreement and explain key concepts such as attachment, set-off, fixed and floating charges.
