Messier employs the audit approach currently being used by auditing professionals. This approach is a direct result of the demands of Sarbanes-Oxley, which has changed the way auditors do their jobs. The approach emphasizes understanding the entity (i.e., the organization or business being audited) and its environment (i.e. industry), and then assessing the business risks faced by the entity and how management controls those risks. This audit process focuses on business processes instead of accounting cycles. This unique and innovative approach has been developed in response to changing market dynamics. The systematic approach, referred to in the subtitle of the text, reflects the early introduction of three basic concepts that underlie the audit process: materiality, audit risk, and evidence; this allows Messier to build upon this model in subsequent chapters. These are central to everything an auditor does and a unique feature of Messier. As such, this approach helps students develop auditor judgment, a vital skill in today's auditing environment.

This book provides a comprehensive presentation of auditing theory and practice. It simplifies audit concepts often considered abstract or vague to many. Written in a clear, concise, and understandable manner, the book covers the often uncovered and daring area of forensic auditing and analyses the approach thereof. Additionally, it covers the use of blockchain in audit through several illustrations and examples, and would be of interest to students, academics, and even junior auditors. *Auditing and Assurance Services* McGraw Hill

Auditing and assurance service education has undergone dramatic change in at least three ways: (1) An awakening that practitioners have a comparative advantage in offering professional services that transcend the boundaries of financial statements; (2) An understanding that client strategies affect engagement risk; and (3) A transition away from first-person delivery by classroom instructors only and toward third-person discovery by students both within and outside of the classroom. Each has influenced the seventh edition. To transcend the boundaries of financial statements, Auditing and Assurance Services exposes students both to the demand for and the supply of the profession's flagship service, financial statement audits, and to the nature of the value-added assurance services decision makers demand in the information age. *Auditing and Assurance Services* Pearson Higher Ed

Whittington/Pany's "Principles of Auditing," is a market leader in the auditing discipline. Until October 2002, Ray Whittington was a member of the Audit Standards Board and prior to Ray being on the ASB, Kurt Pany was on the board. This has had a major impact on this revision of the text as Whittington has been involved in the audit standards creation process. "Principles of Auditing" presents concepts clearly and proactively monitors changes in auditing making the relationship between accounting and auditing understandable. The 16th edition maintains the organization and balance sheet orientation, while adding and enhancing topics of Risk, Assurance

Services, Fraud, E-Commerce, and the latest auditing standards to meet the needs of the current marketplace. Modern Auditing McGraw-Hill Education Auditing: Text and Cases will influence the way that the next generation of professionals think about their responsibilities and abilities; it is not limited to reciting current practice. Instead the unique set of topics and structure of this book will strike an effective balance among the "why it is so" of auditing theory and the "how it is done" of current auditing practice and the "what's next" of the profession's future.
