"A true Renaissance man with a clear, unified aesthetic vision, the Swiss artist, designer, architect and writer Max Bill combined the virtues of homo faber and homo ludens throughout his intensely productive career, launching the Concrete art movement and establishing himself as the single most decisive influence on

postwar Swiss graphic design. This gorgeously designed, hefty volume--the most thorough Bill overview ever published in English, and the only monograph in print--presents Bill's oeuvre both chronologically and thematically, across every facet of his multifaceted oeuvre: painting, graphic art, sculpture, architecture, book and magazine design, industrial and furniture design, graphic design and advertising typography--from large-format posters to small inserts in periodicals--as well as his designs for exhibition spaces. Bill stands out for his enormous influence on Latin American geometric art (through his 1951 retrospective at the São Paulo

Museum of Modern Art), as well as for his essays, his work as an educator and his political and social concerns. All these aspects of his life and work are covered in this profusely illustrated catalogue, along with essays by scholars and a selection of previously unpublished essays by Bill himself."

My Futurist Past Bruno Munari: Square, Circle, Triangle

A playful and vibrant guide to drawing the sun In *Drawing the Sun*, Bruno Munari suggests: "When drawing the sun, try to have on hand colored paper, chalk, felt-tip markers, crayons, pencils, ballpoint pens- you can draw a sun with any one of them. Also remember that sunset and dawn are the back and front of the same phenomenon: when we are looking at the sunset, the people over

there are looking at the dawn."

This primer is designed to teach students the interconnected arts of visual communication.

The subject is presented, not as a foreign language, but as a native one that the student "knows" but cannot yet "read." Responding to the need she so clearly perceives, Ms. Dondis, a designer and teacher of broad experience, has provided a beginning text for art and design students and a basic text for all other students; those who do not intend to become artists or designers but who need to acquire the

essential skills of understanding visual communication at a time when so much information is being studied and transmitted in non-verbal modes, especially through photography and film. Understanding through seeing only seems to be an obviously intuitive process. Actually, developing the visual sense is something like learning a language, with its own special alphabet, lexicon, and syntax. People find it necessary to be verbally literate whether they are "writers": or not; they should find it equally necessary to be visually literate, "artists" or not. This primer is designed to teach students the interconnected arts of

visual communication. The subject is presented, not as a foreign language, but as a native one that the student "knows" but cannot yet "read." The analogy provides a useful teaching method, in part because it is not overworked or too rigorously applied. This method of learning to see and read visual data has already been proved in practice, in settings ranging from Harlem to suburbia. Appropriately, the book makes some of its most telling points through visual means. Numerous illustrated examples are employed to clarify the basic elements of design (teach an alphabet), to show how they are used in simple syntactic combinations ("See Jane run."), and

finally, to present the meaningful synthesis of visual information that is a finished work of art (the apprehension of poetry...). Prestel Publishing In honor of Frank's 20th anniversary Fantagraphics is re-releasing the massive, long out of print Frank Book omnibus, which collected all the Frank material up to the mid-aughts, including several jaw-droppingly beautiful full-color stories, literally dozens of lushly-delineated black-and-white stories, and a treasure trove of covers and illustrations. The Frank Book also features an introduction by one of Frank's biggest fans (himself a Frank, or almost): Francis Ford Coppola.

 So much goes unnoticed. We multi-task, switch between screens, work faster. When was the last time you paused to consider a beautifully made object or stunning natural landscape? Yet this is when our spirits lift, our soul is restored. Some say beauty is a luxury. But what if it is key to creating a better world for us all? Designer Alan Moore invites us to rethink not only what we produce whether it s a website, a handmade chair, or a business but how and why. With examples including Pixar, Apple, Yeo Valley and Blitz Motorcycles, we are encouraged to ask: is it useful and considered. Is it a thing of beauty? Do Design you will

inspire you to: -
 Improve your creative process - Raise the quality and craft of your work - Consider the experience as much as the product - Adopt simplicity, utility and honesty as guiding principles We are creative beings. We love to make things. This book will inspire you to create better things, for better reasons. Things that people will love for a long time to come."

Bauhaus: Silvana Editoriale

"The Bauhaus continues to radiate exuberance 90 years after it was founded. The Bauhaus as a school, where handicrafts, art and technology were taught together, has outlived the subsequent fashions in

architecture and design. This volume provides an insight into the historical, cultural philosophical, political and pedagogical circumstances of the early years. In the process it portrays the famous Bauhaus directors and teachers, shows the Bauhaus pedagogical methods and accompanies the readers through the individual workshops, where they can rediscover a wealth of form and ideas which retains its uniqueness today. The essays about the current discussion about the Bauhaus as „fixed star of the avant-garde“, the fill of in part unpublished visual material as well as the multitude of the aspects covered constitute a comprehensive

representation of one of the most significant institutions in the art and cultural history of the Modern. "

Bruno Munari Hf Ullmann

One of the greatest graphic designers of the twentieth century—called by Picasso "the Leonardo of our time"—Italian artist and designer Bruno Munari (1907–1998) considered the book the best medium to communicate his visual ideas, showcase his art, and convey his creative spirit. Primarily produced in large quantities for the general public, his more-than-sixty

publications—from design manuals and manifestos to visionary tactile children's books—displayed all the beauty and technical ingenuity of works of art. Munari's Books, the first English-language monograph to focus on his remarkable achievements in publishing, examines in detail his seventy-year legacy in print, from his pioneering work as a graphic designer and collaborations with major publishers to his experimental visual projects and innovative contributions to the fields of painting, sculpture, design, photography, and teaching. Featuring critical essays and a wealth of color illustrations, this long-overdue monograph is a visually rich

introduction to Munari's remarkably multifaceted career. *Moirémotion* Bloomsbury Publishing Meet Triangle. He is going to play a sneaky trick on his friend, Square. Or so Triangle thinks. . . . With this first tale in a trilogy, partners in crime Mac Barnett and Jon Klassen will have readers wondering just who they can trust in a richly imagined world of shapes. Visually stunning and full of wry humor, here is a perfectly paced treat that could come only from the minds of two of today's most irreverent — and talented — picture book creators. *Original Bauhaus Workbook* MIT Press Hand-In-Hand: Ceramics, Tapestries, Wood Carvings, and

Hardware by the California Mid-Century Designers Evelyn & Jerome Ackerman is the first monograph of the artists whose oeuvre was critically influential and is now seen as the epitome of California mid-century modernism. With a preface by Jonathan Adler, the book tracks the couple's careers in the decorative arts from their beginnings to the creation of Jenev Design Studio and its eventual shift to ERA Industries, as well as their involvement in every prestigious California Design exhibition from 1954 to 1976. Additionally, after almost 30 years of work they continued to create and develop their styles. The Ackermans became known for their uses of a wide spectrum of

mediums including weaving, ceramics, wood carvings, and mosaics. The Ackermans' individualistic and innovative techniques also ensured that great design be both accessible and affordable. Featuring many never-before-seen preparatory drawings and color guides, this book tells the heartening story of a successful collaboration and celebrated partnership, in not only design, but in life.

50th Anniversary Edition Princeton Architectural Press
The first book to be published on the work of their partnership (in 2001), *Design Noir* is the essential primary source for understanding the theoretical and

conceptual underpinnings for Dunne & Raby's work. Consisting of three elements - a 'manifesto' on the possibilities of designing with and for the 'secret life' of electronic objects; notes for an embryonic network of critical designers and, most famously, the presentation of the Placebo Project - a prototype for a critical design poetics enacted around electronic furniture-objects - Design Noir offers an in-depth exploration of one of the most seminal design projects of the last two decades, one that arguably initiated speculating through design in its contemporary forms. By detailing the logic and character of the

objects that were constructed; the involvement of users with these objects over-time, and in the creation of a new kinds of spatially and temporally distributed moments of critique and engagement with things, Design Noir presents the case-study of the Placebo project as a far more complex and subtler project than is often thought. As a bold and in many ways unprecedented experiment in design writing and book designing, Design Noir is itself an instance of the speculative propositional design it expounds.

Italian design legend

Bruno Munari

published his visual

case studies on shapes: Circle, Square, and, a decade later, Triangle. Using examples from ancient Greece and Egypt, as well as works by Buckminster Fuller, Le Corbusier, and Alvar Aalto, Munari invests the three shapes with specific qualities: the circle relates to the divine, the square signifies safety and enclosure, and the triangle provides a key connective form for designers. One of the great designers of the twentieth century, Munari contributed to the fields of painting, sculpture, design, and photography while teaching throughout his seventy-year career. After World War II he began to focus on book design, creating children's books known for their simplicity and

playfulness.
