Doctoral Thesis / Dissertation from the year 2016 in the subject Pedagogy - School Pedagogics, , course: TEFL, language: English, abstract: The target of this research was to examine whether or not the effects of implementing the learning together method improved eleventh graders' paragraph writing skills in terms of content, vocabulary, layout, grammar and mechanics. The research also examined the extent to which the implementation of the learning together method brought about changes on social skills in relation to communication, leadership, group management and conflict resolution

The learning together method was implemented in the experimental group after the students had been made to have awareness about it whereas in the control group, the students were taught their lessons through the same method in which the elements and theoretical perspectives of the method were not used. Data were collected through tests, questionnaire, structured nonparticipant observation checklist, focus group interview and semi-structured interview. Dependent
