missing page, may be replicated in our
edition. We do, however, repair the vast
majority of imperfections successfully; any
imperfections that remain are intentionally
left to preserve the state of such historical
works.

[Catalogue of British Coleoptera \(Classic
Reprint\)](#) London S. Sonnenschein 1891.
This publication provides a comprehensive

review of the nomenclature and distribution of the Geadephaga of America, north of Mexico. Overall 2439 valid species-group taxa in 208 genera are catalogued along with their synonyms. Besides the usual information pertaining to author(s), date and page of publication, the type locality, location of name-bearing type, first reference establishing each synonym, and etymology for many patronymic names are provided for species-group names. Genus-group names are listed with the author(s), year of publication, page citation, type species with manner of fixation and etymology for most. The geographical distributions of all species-group taxa are briefly summarized and their state and province records are indicated. About 2500 references are listed with publication dates for many in order to assess priority of names. Several new nomenclatural acts are introduced including one new genus-group taxon, one new replacement name, three changes in precedence, five new genus-group synonymies, 65 new species-group synonymies, one new species-group status, and 12 new combinations. The work includes also a discussion of the notable

private North American carabid collections, a synopsis of all extant world geadephagan tribes and subfamilies, a brief faunistic assessment of the fauna, a list of North American fossil Geadephaga, a list of North American Geadephaga larvae described or illustrated, a list of species described from specimens mislabeled as from North America, and a list of unavailable names listed from North America.

Subject Index of the Modern Works Added to the British Museum Library

Apollo Books

This is the sixth volume of a comprehensive series which covers about 100,000 species of Coleoptera known to occur in the Palaearctic Region. The information provided for each species is as follows: primary taxonomic information of all available names in the genus and species levels published by the end of 1999; the taxonomic information below subfamily, organized alphabetically; and the type species of genera and subgenera, including synonyms. Distributional data of species and subspecies is given per country. Detailed distributional information for strict endemics is provided, and

introduced species are indicated. The series is a collective work of about one hundred coleopterists from Europe, Japan, America, and Australia.
