**350 Colorful Papers Perfect for Folding in 3D** Fox Chapel Publishing  
Modular origami is the latest craze in paper folding! These three-

dimensional models are created from a number of small pieces of paper that are easily folded and then cleverly fit together to form a spectacular shape. They range from paper polyhedra to bristling buckyballs that are reminiscent of sea urchins—to ornate flower-like spheres. Each piece of paper is held by the tension of the other papers—demonstrating the remarkable hidden properties of paper, which is at the same time flexible but also strong! Author Byriah Loper has

been creating modular origami sculptures for just five years, but in that time, he's pushed the upper limits of the art form with some of the largest, most complex geometric paper constructions ever assembled. While many geo-modular origami artists focus on creating dense floral spheres, Byriah has pioneered the open, linear "wire frame" approach, which results in a very complex-looking model that reveals the interior of its form. He exhibits his sculptures

annually at the Origami USA convention in New York, and was recently a featured artist at the "Surface to Structure" exhibition at the Cooper Union gallery in the East Village. A great way to learn origami, the easy-to-follow diagrams and step-by-step instructions in this book show you how to fold the paper components and then assemble them to create 22 incredible models. Each model is a new challenge, and the paper sculptures you create look fantastic on your desk or

shelf!

*Paper Folding Inspired by Nature [Origami Book with DVD, 22 Models]* Creative Publishing International Tomoko Fuse has been one of the world's premier origami artists for more than 35 years. This

beautifully photographed book examines the three-dimensional geometric designs she is famous for. Fuse, often referred to as "the queen of origami," discovered the art of folding paper at just seven years old. She has come a long way since then, having had her work highlighted in exhibitions around the world, including Paris Origami (Carrousel du Louvre, 1998), On Paper (Crafts Council London, 2002) and her solo show Yorokobi (Bauhaus Dessau, 2004). In addition

to teaching, folding and writing, she also collaborated with designer Denis Guidone for Milan Design Week 2018 and was a featured artist in Nova's episode "The Origami Revolution" (February, 2017).
