SAP Transportation Management Overview - Welcome and agenda You can use SAP TM to create and monitor an efficient transportation plan that fulfills the relevant constraints (for example, service level, costs, and resource availability). You can determine options to save costs and to optimize the use of available resources. You can react to transportation events and find solutions to possible deviations from the original transportation plan.

You can use SAP TM to create and monitor an efficient transportation plan that fulfills the relevant constraints (for example, service level, costs, and resource availability). You can determine options to save costs and to optimize the use of available resources.
