Teaching at Its Best
Springer

"Focus on Speaking is an introductory text on teaching speaking to adult second language learners. It examines different theoretical perspectives on spoken language and offers practical suggestions for teaching." -back cover.

Teaching the Whole Teen
Routledge

A clear introduction for the teaching of language and communication.

*Teaching & Researching:
Language Learning
Strategies* Teacher

Created Materials
Speaking is a dynamic, interpersonal process and one that strongly influences how we are

perceived by others in a range of formal and everyday contexts.

Despite this, speaking is often researched and taught as if it is simply writing delivered in a different mode. In *Teaching and Researching Speaking*, Rebecca Hughes suggests that we have less understanding than we might of important meaning-making aspects of speech such as prosody, gaze, affect, and the ways speakers collaborate and negotiate with one another in interaction. This thoroughly revised and updated second edition looks to the future of the field, offering: A new chapter on assessment, discussing 'high stakes' oral language testing contexts such as immigration New material considering

access to spoken data via the worldwide web and new technologies that allow neurolinguistic insights formerly hidden from view Summaries and case studies to help the reader understand how to approach researching speaking and encourages practitioners to question the models of speaking that they are using in their classrooms. Reviewing materials and assessment practices in the light of current knowledge about spoken language, and highlighting areas for new work and collaboration between researchers and practitioners, this book will be a valuable resource for anyone involved in language teaching.

Experiential Learning
Cambridge University Press

As an essential part of communicative competence, listening is a skill which deserves equal treatment with the other basic skills of speaking, reading, and writing.

Second Language

Listening combines up-to-date listening theory with case studies of actual pedagogical practice. The authors describe current models of listening theory and exemplify each with a textbook task. They address the role of technology in teaching listening, questioning techniques, and testing.

Second Language

Listening is designed to be used with both pre-service and in-service teachers who are involved in the teaching of listening or the design of pedagogic materials for listening.

Teaching speaking : a holistic approach

Cambridge University Press

"Counter Responsibility for planning language teaching programs now carries with it a strong element of accountability. Evaluation of the whole process of course design, development, and implementation is therefore a necessary area of activity for course designers, language planners, and

researchers. This book brings together accounts of recent work in this increasingly important field and will be a valuable resource both for those already engaged in evaluation and for those in training. Part One presents a review of the literature, covering past developments in the wider field of educational evaluation, as well as specifically in second language education. Part Two contains a series of eight original case-studies, written by scholars involved in evaluations in widely divergent settings. The focus in each case is on how the evaluator addresses the difficulties central to each study, and the findings are also included. The final Part Three provides practical guidance for evaluators, offering suggestions about how to set up and carry out evaluations in any given setting."--

Using Understanding by Design in the Culturally and Linguistically Diverse Classroom Routledge

"In the heart of this world, the Lord of life, who loves us so much, is always present. He does not abandon us, he does not leave us alone, for he has united himself definitively

to our earth, and his love constantly impels us to find new ways forward. Praise be to him!" – Pope Francis, *Laudato Si'* In his second encyclical, *Laudato Si': On the Care of Our Common Home*, Pope Francis draws all Christians into a dialogue with every person on the planet about our common home. We as human beings are united by the concern for our planet, and every living thing that dwells on it, especially the poorest and most vulnerable. Pope Francis' letter joins the body of the Church's social and moral teaching, draws on the best scientific research, providing the foundation for "the ethical and spiritual itinerary that follows." *Laudato Si'* outlines: The current state of our "common home" The Gospel message as seen through creation The human causes of the ecological crisis Ecology and the common good Pope Francis' call to action for each of us Our Sunday Visitor has included discussion questions, making it perfect for individual or group study, leading all Catholics and Christians into a deeper understanding of the importance of this teaching.

Revitalizing Endangered Languages

John Wiley & Sons

Experiential learning is a powerful and proven approach to teaching and learning that is based on one incontrovertible reality: people learn best through experience. Now, in this extensively updated book, David A. Kolb offers a systematic and up-to-date statement of the theory of experiential learning and its modern applications to education, work, and adult development. *Experiential Learning, Second Edition* builds on the intellectual origins of experiential learning as defined by figures such as John Dewey, Kurt Lewin, Jean Piaget, and L.S. Vygotsky, while also reflecting three full decades of research and practice since the classic first edition. Kolb models the underlying structures of the learning process based on the latest insights in psychology, philosophy, and physiology. Building on his comprehensive structural model, he offers an exceptionally useful typology of individual learning styles and corresponding structures of knowledge in different academic disciplines and careers. Kolb also applies

experiential learning to higher education and lifelong learning, especially with regard to adult education. This edition reviews recent applications and uses of experiential learning, updates Kolb's framework to address the current organizational and educational landscape, and features current examples of experiential learning both in the field and in the classroom. It will be an indispensable resource for everyone who wants to promote more effective learning: in higher education, training, organizational development, lifelong learning environments, and online.

Second Language Listening Tesol

Praise for *How Learning Works* "How Learning Works is the perfect title for this excellent book. Drawing upon new research in psychology, education, and cognitive science, the authors have demystified a complex topic into clear explanations of seven powerful learning principles. Full of great ideas and practical suggestions, all based on solid research evidence, this book is essential reading for instructors at all levels who wish to

improve their students' learning." —Barbara Gross Davis, assistant vice chancellor for educational development, University of California, Berkeley, and author, *Tools for Teaching* "This book is a must-read for every instructor, new or experienced. Although I have been teaching for almost thirty years, as I read this book I found myself resonating with many of its ideas, and I discovered new ways of thinking about teaching." —Eugenia T. Paulus, professor of chemistry, North Hennepin Community College, and 2008 U.S. Community Colleges Professor of the Year from The Carnegie Foundation for the Advancement of Teaching and the Council for Advancement and Support of Education "Thank you Carnegie Mellon for making accessible what has previously been inaccessible to those of us who are not learning scientists. Your focus on the essence of learning combined with concrete examples of the daily challenges of teaching and clear tactical strategies for faculty to consider is a welcome work. I will recommend this book to all my

colleagues." —Catherine M. Casserly, senior partner, The Carnegie Foundation for the Advancement of Teaching "As you read about each of the seven basic learning principles in this book, you will find advice that is grounded in learning theory, based on research evidence, relevant to college teaching, and easy to understand. The authors have extensive knowledge and experience in applying the science of learning to college teaching, and they graciously share it with you in this organized and readable book." —From the Foreword by Richard E. Mayer, professor of psychology, University of California, Santa Barbara; coauthor, *e-Learning and the Science of Instruction*; and author, *Multimedia Learning* Teaching and Learning Second Language Listening Our Sunday Visitor CLIL (Content and Language Integrated Learning) has emerged since the millennium as a major trend in education. Written by Do Coyle, Philip Hood and David Marsh and drawing on their experience of CLIL in secondary schools, primary schools and

English language schools across Europe, this book gives a comprehensive overview of CLIL. It summarises the theory which underpins the teaching of a content subject through another language and discusses its practical application, outlining the key directions for the development of research and practice. This book acknowledges the uncertainty many teachers feel about CLIL, because of the requirement for both language and subject knowledge, while providing theoretical and practical routes towards successful practice for all. Natural Grammar Cognella Academic Publishing The *Rediscovery of Teaching* presents the innovative claim that teaching does not necessarily have to be perceived as an act of control but can be understood and configured as a way of activating possibilities for students to exist as subjects. By framing teaching as an act of dissensus, that is, as an interruption of egological ways of being, this book positions teaching at the progressive end of the educational spectrum,

where it can be reconnected with the emancipatory ambitions of education. In conversation with the works of Emmanuel Levinas, Paulo Freire, Jacques Rancière, and other theorists, Gert Biesta shows how students' existence as subjects hinges on the creation of existential possibilities, through which students can assert their "grown-up" place in the world. Written for researchers and students in the areas of philosophy of education, educational theory, curriculum theory, teaching, and teacher education, *The Rediscovery of Teaching* demonstrates the important role of teachers and teaching in the project of education as emancipation towards grown-up ways of being in the world. The Rediscovery of Teaching John Benjamins Publishing "Drawing on wide-ranging literature from a variety of relevant disciplines, as well as their own extensive experience in teaching spoken English, the authors give a fascinating, comprehensive, and insightful account of the nature of second language speaking skills.

The research and theory they survey then serves as the basis for the principles, strategies, and procedures they propose for the teaching of spoken English. This book will, therefore, provide an invaluable resource for teachers, teachers in training, and researchers, providing both a state-of-the-art survey of the field as well as a source of practical ideas for those involved in planning, teaching, and evaluating courses and materials for the teaching of spoken English"--

Communicative Language Teaching in Action

Springer

SHORTLISTED FOR THE BEST PRINT RESOURCE AWARD AT THE 2015 MUSIC TEACHER AWARDS FOR EXCELLENCE Paul Harris's highly successful Simultaneous Learning approach is an entirely positive and imaginative way to teach, which embraces the understanding that all the elements of music are connected. In this definitive book Harris outlines the complete philosophy of his ground-breaking approach. He examines topics such as language and body language, the first lesson on a new piece, introducing notation and

making the transition to Simultaneous Learning. This is the full eBook version of the original edition.

Teaching myself

Cambridge University Press

Speech, language, and communication are key to young children's well-being and development. At a time when communication contexts and modalities are becoming increasingly complex and multifaceted, this key text considers how pedagogical approaches, environments, and interactions can be used to develop and harness the voice of the child in the early years.

Communication for the Early Years takes a broad, ecological systems approach to communication to present theoretical approaches and principles which map a child's communication experiences in the home, the early years setting, in the local community, through play, and engagement with digital media and the enabling environment, including the outdoor environment. Topics considered include: the role played by pedagogical leadership in the development of an effective communication

environment aspects of the physical environment which encourage or inhibit communication effective communication in and between settings the importance of toys and resources developments in digital communication and their impact on the child Chapters consider perspectives of the child, family, and practitioner to encourage a holistic and collaborative understanding of interaction and the role this plays in a child's development, while case studies, examples from practice and reflective questions inspire discussion, challenge thinking, and encourage the application of research in practice. An in-depth exploration of the factors which impact on the development of a child's communication skills, this will be key reading for students and practitioners in the Early Years, as well as those involved in their training and continued professional development. Revisiting the Assessment of Second Language Abilities: From Theory to Practice Penguin In this hilarious and highly practical book, author and professional speaker Scott Berkun reveals the techniques behind what

great communicators do, and shows how anyone can learn to use them well. For managers and teachers -- and anyone else who talks and expects someone to listen -- *Confessions of a Public Speaker* provides an insider's perspective on how to effectively present ideas to anyone. It's a unique, entertaining, and instructional romp through the embarrassments and triumphs Scott has experienced over 15 years of speaking to crowds of all sizes. With lively lessons and surprising confessions, you'll get new insights into the art of persuasion - - as well as teaching, learning, and performance -- directly from a master of the trade. Highlights include: Berkun's hard-won and simple philosophy, culled from years of lectures, teaching courses, and hours of appearances on NPR, MSNBC, and CNBC. Practical advice, including how to work a tough room, the science of not boring people, how to survive the attack of the butterflies, and what to do when things go wrong. The inside scoop on who earns \$30,000 for a one-hour lecture and why. The worst -- and funniest -- disaster

stories you've ever heard (plus countermeasures you can use). Filled with humorous and illuminating stories of thrilling performances and real-life disasters, *Confessions of a Public Speaker* is inspirational, devastatingly honest, and a blast to read.

How can you help teens thrive now and for life? Support them as whole learners. Developing independence and responsibility. Collaborating and communicating effectively. Establishing valuable work habits. Harnessing emotions and motivation. In this insightful, culturally responsive guide, Poliner and Benson integrate these lifelong skills into daily practices through Practical applications for diverse populations in every class, advisory, team, or club. The latest research on best practices from adolescent psychology, neuroscience, school climate. Tools for teachers, administrators, counselors, and parents to help teens succeed now and later in school, home, workplace, and community. Teaching the Whole Teen supports adolescents and adults

within the school to thrive.

Issues in Applying SLA Theories toward Reflective and Effective Teaching John Wiley & Sons

This book takes a new and holistic approach to fluency in English speech and differentiates between productive, perceptive, and nonverbal fluency. The in-depth corpus-based description of productive fluency points out major differences of how fluency is established in native and nonnative speech. It also reveals areas in which even highly advanced learners of English still deviate strongly from the native target norm and in which they have already approximated to it. Based on these findings, selected learners are subjected to native speakers' ratings of seven perceptive fluency variables in order to test which variables are most responsible for a perception of oral proficiency on the sides of the listeners. Finally, language-pedagogical implications derived from these findings for the improvement of fluency in learner language are presented. This book is conceptually and

methodologically relevant for corpus-linguistics, learner corpus research and foreign language teaching and learning.

Holistic Approaches to Language Learning
Cambridge University Press

This volume brings together the views of academics and researches from a range of European educational traditions to reflect on the contribution of holism to language learning, drawing on research and practice in various areas of second language acquisition. The volume is divided into four sections which move broadly from theoretical to particular methodological and practical considerations. The individual chapters address and evaluate the following questions: What are the theoretical bases of holistic learning and how can it encompass language teaching? Do approaches to language learning exist which succeed in engaging with language learners as individual, dynamic, complex 'whole' human beings? What reflections are relevant from the different points of view of teacher and learner? What are the pedagogical implications? Can holistic approaches be adopted

within schools and universities? How can technology enhance holistic language learning? How can the scope and limits of this concept be delineated?
Confessions of a Public Speaker Pearson Education

This book investigates various aspects of speaking in a foreign language. It is unique in considering this key skill from both psycholinguistic and sociolinguistic perspectives, and in focusing entirely on instructed foreign language contexts. The book demonstrates how theory and research can be translated into classroom practice.
Simultaneous Learning ASCD

Of the approximately 7,000 languages in the world, at least half may no longer be spoken by the end of the twenty-first century. Languages are endangered by a number of factors, including globalization, education policies, and the political, economic and cultural marginalization of minority groups. This guidebook provides ideas and strategies, as well as some background, to help with the effective revitalization of endangered languages. It

covers a broad scope of themes including effective planning, benefits, wellbeing, economic aspects, attitudes and ideologies. The chapter authors have hands-on experience of language revitalization in many countries around the world, and each chapter includes a wealth of examples, such as case studies from specific languages and language areas. Clearly and accessibly written, it is suitable for non-specialists as well as academic researchers and students interested in language revitalization. This book is also available as Open Access on Cambridge Core.

Language Arts Celestial Arts

This book offers a range of perspectives and insights from around the world on the teaching and learning of listening, speaking, reading and writing. It brings together contributors from across six continents, who analyse a wide range of teaching and learning contexts, including primary, secondary, tertiary, private, and adult ESL/EFL classes. In doing so, they provide locally relevant accounts that nonetheless resonate with other contexts and wider

concerns. This informative and practical edited collection will appeal to

students and scholars who are interested in the four building blocks of

language learning, as well as language education and teacher education.
