and his father move from one house to another, they decide to adopt a dog from the local rescue shelter. But their chosen dog, Toby, is having a tough time adjusting to his new life outside the shelter—howling all night, hiding fearfully from his new humans, forgetting where to go to the bathroom, and chasing a ball through the flower bed. The boy has promised to train his new companion, and he's trying his best, but Dad is starting to get exasperated. Will Toby ever feel comfortable with his new family and settle into his forever home, or will Dad decide he's not the right dog for them after all?

It is such a joy to work with a dog who proactively engages in behaviors while you build a relationship that will surprise you in its depth and versatility. Clicker training has proven to be the most effective means of developing a "Thinking Dog," one who offers behaviors in anticipation of a reward rather than a dog who has been trained only to wait for his owner's commands. One of the biggest obstacles the new clicker trainer faces, however, is his or her own history of training and habits of working with a dog. But you can make the transition once you understand how dogs learn and the mechanisms of operant conditioning. Learn from author Gail Fisher's crossover experiences as well as those of the hundreds of

students she has helped make the change over the past thirteen years. You will learn: How dog training has evolved over the past 100 years, the strengths and weaknesses of various training styles, and to what extent you can intergrate your previous methods with clicker training. The particular challenges you will face as you crossover from whatever style of training you have used in the past (compulsion, luring, etc.) to clicker training. The detailed nuts and bolts of clicker training from getting a behavior started, to methods of rewarding, to reducing the need to click and treat over time while still getting the results you want. How to work with dogs trained with force or harsh methods and change them into behavior-offering dynamos. What reviewers are saying ... MIDWEST BOOK REVIEW "Written by Gail Tamases Fisher, a professional dog trainer of over thirty years' experience, *The Thinking Dog: Crossover to Clicker Training* is a guide to using clicker training to develop a "thinking dog" who offers behaviors in anticipation of a reward, rather than a passive dog trained simply to wait for

its owner's commands. Someone new to clicker training may find it difficult to break out of familiar routines; *The Thinking Dog: Crossover to Clicker Training* teaches one how to surpass one's own ingrained habits while learning the nuts and bolts of operant conditioning. "By definition, LLW [loose-leash walking] means there is no tension in the leash. This rule is absolute: Your dog may not pull and be successful. Any time your dog pulls and gets to move forward, pulling is reinforced. So from the moment you start training LLW, any time your dog is on leash, you are either in training, or using equipment that prevents pulling, such as a front-connection harness or head halter. Do not use a Flexi- or bungi-lead as they reward pulling." An excellent, easy-to-use manual for amateur and professional dog trainers alike, handily illustrated with black-and-white photographs." James A. Cox DOG WORLD When Gail Tamases Fisher attended her first clicker-training seminar in 1996, she was already a skilled trainer and the author of two books. She had built a

successful career on the Volhard motivational method. "I was happy with how I trained for the 20-plus years that I had used and taught this approach, believing it was by far the best way to train for both dogs and people," Fisher writes. As her skepticism vanished, she began incorporating clicker training into her methodology. She explains her decision in a balanced manner: "Nothing in this book is intended to denigrate any approach or diminish your success with whatever training method you have used."

Whether you like it or not, if you have a dog you are training it. The question is are you training it for good or are you training it for bad. Training starts before training starts. How you live with your

dog dictates how your dog lives with you. They learn from everything we do, good and bad. They miss nothing. They know us better than we know ourselves. They learn from everything we don't do. Obedience commands don't create a well behaved dog. Raising a dog and teaching along the way does. No parent says they are going outside to train their kids. We just raise them and teach them 24 hours a day and try to provide guidance so eventually our children can make the right decisions on their own. Dogs are no different. Live right with them. They are not children. They are animals and must be respected as such. And they are a precious gift that are not here long enough so enjoy every minute and never take them for granted.

Starting a Successful Pet Hotel Business Do you love animals? Are you looking for a career that is recession-proof and always in demand? Would you like to be your own boss? You should start a pet hotel business! I have been in the pet care industry for over a decade. I first started working as a receptionist in my uncle's veterinary clinic at age 18. I had owned dogs and cats in my childhood but never thought about making it a career. When I was thinking about college, I realized that becoming a vet technician was a viable option. When my uncle retired and sold his practice, I worked with the new vet as a tech for a few years. We found ourselves with frequent requests to board animals for the short-term. Usually, these requests came from pet owners who were our usual vet clients going out of town for a few days at a time. We took these dogs and cats in for mostly weekends and holidays. I realized that in my area, the need for quality pet boarding was essential. I started my own pet

boarding business out of an old daycare building. The daycare had been closed down for a while, but it had easily convertible facilities for pet boarding. The building had a nearly commercial-sized kitchen and 4 different classrooms, each with its own attached bathroom. It also had a large fenced-in yard which used to have playground equipment and big indoor community space, presumably for assemblies or indoor playtime. A building originally built to house children during the day was easily converted to a building intended to house cats and dogs. My pet boarding business was born on a shoestring budget. In this book, I will show you how to start your own pet hotel from the ground up. This book comes from my personal experiences combined with research that I conducted while starting out years ago. I will show you everything I learned about how to start a dog or cat boarding kennel business (or doggy daycare) so that you can start your business on the right foot. You will learn: What a Typical Day at a Pet Boarding Hotel is Like What Potential Profit this Business Can Bring Why

America's foremost authorities on dog care and training distill decades of experience in a comprehensive "foundational" guide for dog owners. No matter what training method or techniques you use with your dog, the training is unlikely to be optimally successful unless it is predicated on an understanding of the dog's true nature. Dogs need food, water, exercise

and play, rest, veterinary care -- the basics. But since dogs naturally want to be led, they also need focused and compassionate guidance. Through abundant stories and case studies, the authors reveal how canine nature manifests itself in various behaviors, some potentially disruptive to domestic accord, and show how in addressing these behaviors you can strengthen the bond with your dog as well as keep the peace. The promise of this book is that, especially in an ever-

accelerating world filled with digital distractions, you can learn from your dog's example how to live in the moment, thereby enriching your life immeasurably.
