What Immersion Contributes to the Study of Power

University of Chicago Press

Ethnography centers on the culture of everyday life. So it is ironic that most scholars who do research on the intimate experiences of ordinary people write their books in a style that those people cannot understand. In recent years, the ethnographic method has spread from its original home in cultural anthropology to fields such as sociology, marketing, media studies, law, criminology, education, cultural studies, history, geography, and political science. Yet, while more and more students and practitioners are learning how to write ethnographies, there is little or no training on how to write ethnographies well. From Notes to Narrative picks up where methodological training leaves off. Kristen Ghodsee, an award-winning ethnographer, addresses common issues that arise in ethnographic writing. Ghodsee works through sentence-level details, such as word choice and structure. She also tackles bigger-picture elements, such as how to incorporate theory and ethnographic details, how to effectively deploy dialogue, and how to avoid distracting elements such as long block quotations and in-text citations. She includes excerpts and examples from model ethnographies. The book concludes with a bibliography of other useful writing guides and nearly one hundred examples of eminently readable ethnographic books.

The Makings of Anthropology University of Chicago Press

Collaboration between ethnographers and subjects has long been a product of the close, intimate relationships that define ethnographic research. But increasingly, collaboration is no longer viewed as merely a consequence of fieldwork; instead collaboration now preconditions and shapes research design as well as its dissemination. As a result, ethnographic subjects are shifting from being informants to being consultants. The emergence of collaborative ethnography highlights this relationship between consultant and ethnographer, moving it to center stage as a calculated part not only of fieldwork but also of the writing process itself. The Chicago Guide to Collaborative Ethnography presents a historical, theoretical, and practice-oriented road map for this shift from incidental collaboration to a more conscious and explicit collaborative strategy. Luke Eric Lassiter charts the history of collaborative ethnography from its earliest implementation to its contemporary emergence in fields such as feminism, humanistic anthropology, and critical ethnography. On this historical and theoretical base, Lassiter outlines concrete steps for achieving a more deliberate and overt collaborative practice throughout the processes of fieldwork and writing. As a participatory action situated in the ethical commitments between ethnographers and consultants and focused on the co-construction of texts, collaborative ethnography, argues Lassiter, is among the most powerful ways to press ethnographic fieldwork and writing into the service of an applied and public scholarship. A comprehensive and highly accessible handbook for ethnographers of all stripes, The Chicago Guide to Collaborative Ethnography will become a fixture in the

development of a critical practice of anthropology, invaluable to both undergraduates, graduate students, and faculty alike. Cyberactivism and Citizen Journalism in Egypt Duke University Press

Ethnomusicology: A Research and Information Guide is an annotated bibliography of books, recordings, videos, and websites in the field of ethnomusicology. The book is divided into two parts; Part One is organised by resource type in categories of greatest concern to students and scholars. This includes handbooks and guides; encyclopedias and dictionaries; indexes and bibliographies; journals; media sources; and archives. It also offers annotated entries on the basic literature of ethnomusicological history and research. Part Two provides a list of current publications in the field that are widely used by ethnomusicologists. Multiply indexed, this book serves as an excellent tool for librarians, researchers, and scholars in sorting through the massive amount of new material that has appeared in the field over the past decades.

Judging Delinquents University of Chicago Press

Handbook for Folklore and Ethnomusicology Fieldwork offers a comprehensive review of the ethnographic process for developing a project, implementing the plan, and completing and preserving the data collected. Throughout, readers will find a detailed methodology for conducting different types of fieldwork such as digital ethnography or episodic research, tips and tricks for key elements like budgeting and funding, and practical advice and examples gleaned from the authors own fieldwork experiences. This handbook also helps fieldworkers fully grasp and understand

the ways in which power, gender, ethnicity, and other identity categories are ever present in fieldwork and guides students to think through these dynamics at each stage of research. Written accessibly for lay researchers working in different mediums and on projects of varying size, this step-by-step manual will prepare the reader for the excitement, challenges, and rewards of ethnographic research.

High school students, two-year college students, and university students all need to know how to write a well-reasoned, coherent research paper—and for decades Kate Turabian's *Student's Guide to Writing College Papers* has helped them to develop this critical skill. In the new fourth edition of Turabian's popular guide, the team behind Chicago's widely respected *The Craft of Research* has reconceived and renewed this classic for today's generation. Designed for less advanced writers than Turabian's *Manual of Writers of Research Papers, Theses, and Dissertations*, Seventh Edition, Gregory G. Colomb and Joseph M. Williams here introduce students to the art of defining a topic, doing high-quality research with limited resources, and writing an engaging and solid college paper. The *Student's Guide* is organized into three sections that lead students through the process of developing and revising a paper. Part 1, "Writing Your Paper," guides students through the research process with discussions of choosing and developing a topic, validating sources, planning arguments, writing drafts, avoiding plagiarism, and presenting evidence in tables and figures. Part 2, "Citing Sources," begins with a succinct introduction to why citation is important and includes sections on the three major styles students might encounter in their work—Chicago, MLA, and APA—all with full coverage of electronic source citation. Part 3, "Style," covers all matters of style important to writers of college papers, from punctuation to spelling to presenting titles, names, and numbers. With the authority and clarity long associated with the name Turabian, the fourth edition of *Student's Guide to Writing College Papers* is both a solid introduction to the research process and a convenient handbook to the best practices of writing college papers. Classroom tested and filled with relevant examples and tips, this is a reference that students, and their teachers, will turn to again and again.

University of Chicago Press

This first volume of the *Ethnographer's Toolkit* provides a practical, straightforward introduction to ethnography and ethnographic practice to the student and novice fieldworker.

The Chicago Guide to Writing about Multivariate Analysis, Second Edition Routledge

Writing the New Ethnography provides a foundational understanding of the writing processes associated with composing new forms of qualitative writing in the social sciences. Goodall's distinctive style will engage and energize students, offering them provocative advice and exercises for turning qualitative data and field notes into compelling representations of social life.

Introduction: so you want to go public? -- Writing beyond the academy -- Telling stories about your research -- Books for general audiences -- The digital turn -- Building an audience -- The perils of going public -- Making it count, making a difference

Going Public University of Chicago Press

Being Ethnographic is an essential introductory guidebook to the methods and applications of doing fieldwork in real-world settings. It discusses the future of ethnography, explores how we understand identity, and sets out the role of technology in a global, networked society. Driven by classic and anecdotal case studies, *Being Ethnographic* highlights the challenges introduced by the ethnographers' own interests, biases and ideologies and demonstrates the importance of methodological reflexivity. Addressing both the why and how questions of doing ethnography well, Madden demonstrates how both theory and practice can work together to produce insights into the human condition. This fully updated second edition includes: New material on intersubjectivity Information on digital inscription tools A practical guide to qualitative analysis software New coverage of cyberethnography and social media Expanded information on ethnographic possibilities with animals Filled with invaluable advice for applying ethnographic principles in the field, it will give researchers across social sciences everything they need to walk a mile in someone else's shoes.

[Ethnography Essentials](#) Routledge

Since 1994, Nancy Mulvany's *Indexing Books* has been the gold standard for thousands of professional indexers, editors, and authors. This long-awaited second edition, expanded and

completely updated, will be equally revered. Like its predecessor, this edition of *Indexing Books* offers comprehensive, reliable treatment of indexing principles and practices relevant to authors and indexers alike. In addition to practical advice, the book presents a big-picture perspective on the nature and purpose of indexes and their role in published works. New to this edition are discussions of "information overload" and the role of the index, open-system versus closed-system indexing, electronic submission and display of indexes, and trends in software development, among other topics. Mulvany is equally comfortable focusing on the nuts and bolts of indexing—how to determine what is indexable, how to decide the depth of an index, and how to work with publisher instructions—and broadly surveying important sources of indexing guidelines such as *The Chicago Manual of Style*, Sun Microsystems, Oxford University Press, NISO TR03, and ISO 999. Authors will appreciate Mulvany's in-depth consideration of the costs and benefits of preparing one's own index versus hiring a professional, while professional indexers will value Mulvany's insights into computer-aided indexing. Helpful appendixes include resources for indexers, a worksheet for general index specifications, and a bibliography of sources to consult for further information on a range of topics. *Indexing Books* is both a practical guide and a manifesto about the vital role of the human-crafted index in the Information Age. As the standard indexing reference, it belongs on the shelves of everyone involved in writing and publishing nonfiction books. [Writing Ethnographic Fieldnotes, Second Edition](#) University of Chicago Press

A down-to-earth, practical guide for interview and participant observation and analysis. In-depth interviews and close observation are essential to the work of social scientists, but inserting one's researcher-self into the lives of others can be daunting, especially early on. Esteemed sociologist Annette Lareau is here to help. Lareau's clear, insightful, and personal guide is not your average methods text. It promises to reduce researcher anxiety while illuminating the best methods for first-rate research practice. As the title of this book suggests, Lareau considers listening to be the core element of interviewing and observation. A researcher must listen to people as she collects data, listen to feedback as she describes what she is learning, listen to the findings of others as they delve into the existing

literature on topics, and listen to herself in order to sift and prioritize some aspects of the study over others. By listening in these different ways, researchers will discover connections, reconsider assumptions, catch mistakes, develop and assess new ideas, weigh priorities, ponder new directions, and undertake numerous adjustments—all of which will make their contributions clearer and more valuable. Accessibly written and full of practical, easy-to-follow guidance, this book will help both novice and experienced researchers to do their very best work. Qualitative research is an inherently uncertain project, but with Lareau's help, you can alleviate anxiety and focus on success.

Living Through Injury in Gangland Chicago University of Chicago Press

When Kate L. Turabian first put her famous guidelines to paper, she could hardly have imagined the world in which today's students would be conducting research. Yet while the ways in which we research and compose papers may have changed, the fundamentals remain the same: writers need to have a strong research question, construct an evidence-based argument, cite their sources, and structure their work in a logical way. *A Manual for Writers of Research Papers, Theses, and Dissertations*—also known as “Turabian”—remains one of the most popular books for writers because of its timeless focus on achieving these goals. This new edition filters decades of expertise into modern standards. While previous editions incorporated digital forms of research and writing, this edition goes even further to build information literacy, recognizing that most students will be doing their work largely or entirely online and on screens. Chapters include updated advice on finding, evaluating, and citing a wide range of digital sources and also recognize the evolving use of software for citation management, graphics, and paper format and submission. The ninth edition is fully aligned with the recently released *Chicago Manual of Style*, 17th edition, as well as with the latest edition of *The Craft of Research*. Teachers and users of the previous editions will recognize the familiar three-part structure. Part 1 covers every step of the research and writing process, including drafting and revising. Part 2 offers a comprehensive guide to Chicago's two methods of source citation: notes-bibliography and author-date. Part 3 gets into matters of editorial style and the correct way to present quotations and visual material. *A Manual for Writers* also covers an issue familiar to

writers of all levels: how to conquer the fear of tackling a major writing project. Through eight decades and millions of copies, *A Manual for Writers* has helped generations shape their ideas into compelling research papers. This new edition will continue to be the gold standard for college and graduate students in virtually all academic disciplines.

The Chicago Guide to Collaborative Ethnography University of Chicago Press

Juvenile court has elicited the interest and criticism of lawyers, social workers, and criminologists, but less attention from sociologists. This book adds to growing sociological literature on the operations of legal institutions. It describes some critical aspects of the functioning of the juvenile court, an institution charged with judging and treating delinquents. To this end, it analyzes the nature of the court operation, the handling of delinquents, and the court's functions in relation to the wider social and legal system.

Being Ethnographic Writing Ethnographic Fieldnotes, Second Edition

This book provides students with a clear and concise guide to studying undergraduate courses in qualitative consumer research and ethnography. The authors present the major qualitative research approaches used in consumer and marketing research as well as practical procedures and theoretical aspects of research design, report presentation etc. In addition to that a weekly study guide, including comprehensive reading lists, completes the book.

Writing Anthropology Waveland Press Inc

"What are the relationships between the self and fieldwork? How do personal, emotional and identity issues impact on fieldwork?" "The Ethnographic Self argues that ethnographers and others involved in research in the field should be aware of how fieldwork affects the researcher, and how the researcher affects the field. Coffey synthesizes accounts of the personal experience of ethnography, and aims to make sense of the process of fieldwork research as a set of practical, intellectual and emotional accomplishments. The book is thematically arranged and illustrated with a wide range of empirical material. The author examines the ethnographic presence in the field, and the implications of this in and beyond fieldwork, exploring issues such as the creation of the ethnographic self, and the embodiment and

sexualization of the field and self." "The Ethnographic Self will be of interest to anyone working in the area of qualitative research, but especially for sociologists, and educational and health researchers."--BOOK JACKET.

Contemporary Field Research University of Chicago Press
Thirteen distinguished anthropologists describe how they create and use the unique forms of writing they produce in the field. They also discuss the fieldnotes of seminal figures—Frank Cushing, Franz Boas, W. H. R. Rivers, Bronislaw Malinowski, and Margaret Mead—and analyze field writings in relation to other types of texts, especially ethnographies. Unique in conception, this volume contributes importantly to current debates on writing, texts, and reflexivity in anthropology.

Tales of the Field SAGE

Anton Chekhov is revered as a boldly innovative playwright and short story writer—but he wrote more than just plays and stories. In *Alive in the Writing*—an intriguing hybrid of writing guide, biography, and literary analysis—anthropologist and novelist Kirin Narayan introduces readers to some other sides of Chekhov: his pithy, witty observations on the writing process, his life as a writer through accounts by his friends, family, and lovers, and his venture into nonfiction through his book *Sakhalin Island*. By closely attending to the people who lived under the appalling conditions of the Russian penal colony on Sakhalin, Chekhov showed how empirical details combined with a literary flair can bring readers face to face with distant, different lives, enlarging a sense of human responsibility. Highlighting this balance of the empirical and the literary, Narayan calls on Chekhov to bring new energy to the writing of ethnography and creative nonfiction alike. Weaving together selections from writing by and about him with examples from other talented ethnographers and memoirists, she offers practical exercises and advice on topics such as story, theory, place, person, voice, and self. A new and lively exploration of ethnography, *Alive in the Writing* shows how the genre's attentive, sustained connection with the lives of others can become a powerful tool for any writer.

A Guide for Social Scientists Springer

In *Writing Ethnographic Fieldnotes*, Robert M. Emerson, Rachel I. Fretz, and Linda L. Shaw present a series of guidelines, suggestions, and practical advice for creating useful fieldnotes in a variety of settings, demystifying a process that is often

assumed to be intuitive and impossible to teach. Using actual unfinished notes as examples, the authors illustrate options for composing, reviewing, and working fieldnotes into finished texts. They discuss different organizational and descriptive strategies and show how transforming direct observations into vivid descriptions results not simply from good memory but from learning to envision scenes as written. A good ethnographer, they demonstrate, must learn to remember dialogue and movement like an actor, to see colors and shapes like a painter, and to sense moods and rhythms like a poet. This new edition reflects the extensive feedback the authors have received from students and instructors since the first edition was published in 1995. As a result, they have updated the race, class, and gender section, created new sections on coding programs and revising first drafts, and provided new examples of working notes. An essential tool for budding social scientists, the second edition of *Writing Ethnographic Fieldnotes* will be invaluable for a new generation of researchers entering the field.

The SAGE Handbook of Applied Social Research Methods
University of Chicago Press

"An accessible and entertaining read, useful to anybody interested in the ethnographic method." - Paul Miller, University of Cumbria "A very good introduction to ethnographic research, particularly useful for first time researchers." - Heather Macdonald, Chester University "The perfect introductory guide for students embarking on qualitative research for the first time... This should be of aid to the ethnographic novice in their navigating what is a theoretically complex and changing methodological field." - Patrick Turner, London Metropolitan University An accessible, authoritative, non-nonsense guide to the

key concepts in one of the most widely used methodologies in social science: Ethnography, this book: Explores and summarises the basic and related issues in ethnography that are covered nowhere else in a single text. Examines key topics like sampling, generalising, participant observation and rapport, as well as embracing new fields such as virtual, visual and multi-sighted ethnography and issues such as reflexivity, writing and ethics. Presents each concept comprehensively yet critically, alongside relevant examples. This is not quite an encyclopaedia but far more than a dictionary. It is comprehensive yet brief. It is small and neat, easy to hold and flick through. It is what students and researchers have been waiting for.

How to Think about Your Research While You're Doing It
University of Chicago Press

Since 1995, more than 150,000 students and researchers have turned to *The Craft of Research* for clear and helpful guidance on how to conduct research and report it effectively. Now, master teachers Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams present a completely revised and updated version of their classic handbook. Like its predecessor, this new edition reflects the way researchers actually work: in a complex circuit of thinking, writing, revising, and rethinking. It shows how each part of this process influences the others and how a successful research report is an orchestrated conversation between a researcher and a reader. Along with many other topics, *The Craft of Research* explains how to build an argument that motivates readers to accept a claim; how to anticipate the reservations of thoughtful yet critical readers and to respond to them appropriately; and how to create introductions and conclusions

that answer that most demanding question, "So what?" Celebrated by reviewers for its logic and clarity, this popular book retains its five-part structure. Part 1 provides an orientation to the research process and begins the discussion of what motivates researchers and their readers. Part 2 focuses on finding a topic, planning the project, and locating appropriate sources. This section is brought up to date with new information on the role of the Internet in research, including how to find and evaluate sources, avoid their misuse, and test their reliability. Part 3 explains the art of making an argument and supporting it. The authors have extensively revised this section to present the structure of an argument in clearer and more accessible terms than in the first edition. New distinctions are made among reasons, evidence, and reports of evidence. The concepts of qualifications and rebuttals are recast as acknowledgment and response. Part 4 covers drafting and revising, and offers new information on the visual representation of data. Part 5 concludes the book with an updated discussion of the ethics of research, as well as an expanded bibliography that includes many electronic sources. The new edition retains the accessibility, insights, and directness that have made *The Craft of Research* an indispensable guide for anyone doing research, from students in high school through advanced graduate study to businesspeople and government employees. The authors demonstrate convincingly that researching and reporting skills can be learned and used by all who undertake research projects. New to this edition: Extensive coverage of how to do research on the internet, including how to evaluate and test the reliability of sources New information on the visual representation of data Expanded bibliography with many electronic sources
