Visual culture was an essential part of ancient social, religious, and political life. Appearance and experience of beings and things was of paramount importance. In *Visual Power in Ancient Greece and Rome*, Tonio Hölscher explores the fundamental phenomena of Greek and Roman visual culture and their enormous impact on the ancient world, considering memory over time, personal appearance, conceptualization and representation of reality, and significant decoration as fundamental categories of art as well as of social practice. With an emphasis on public spaces such as sanctuaries, agora and forum, Hölscher investigates the ways in which these spaces were used, viewed, and experienced in religious rituals, political manifestations, and social interaction.

Classical archaeology was long equated to ancient art history. Today these fields find themselves at a major crossroads. The influence on them--from the discipline of anthropology--has increased substantially in the past 15 years, adding to the ways in which scholars can study the Roman past. The classical archaeologist of the 21st century is likely to be versed in Greek and Latin, computer

technology, ancient history, great monuments, various hard sciences such as physics or even astronomy, GPS, GIS, surveying, mapping, digitizing, artistic rendering, numismatics, geo-science, astronomy, environmental studies, material culture analysis and/or a host of other disciplines and sub-disciplines. Universities are seeking specialists whose talents embrace not one but several different fields of research. It is not necessary for each scholar to know everything about each discipline being used within the fields of art history, classical archaeology and anthropology, but these days a basic knowledge of all relevant disciplines is becoming indispensable. This book will layout the basic information and steps necessary to take the beginning archaeologist's search for knowledge of the past and lead them to adventures of the future.

Conlin questions the long-held assumption that the friezes' sculptors were anonymous Greek masters, directly influenced by the reliefs carved on the Parthenon. Through close analysis of the sculptures, Conlin demonstrates that the carvers of the large processional friezes were actually Italian-trained sculptors influenced by both native and Hellenic stonecarving practices. Her conclusions rest on a systematic examination of the evidence left on the marble by the sculptors themselves - the traces of tool marks, the carving of specific details, and the compositional formulas of the friezes.

Publisher Description

The Ancient Art of Emulation Wadsworth Publishing Company

The Romans developed sophisticated methods for managing hygiene, including aqueducts for moving water from one place to another, sewers for removing used water from baths and runoff from walkways and roads, and public and private latrines. Through the archeological record, graffiti, sanitation-related paintings, and literature, Ann Olga Koloski-Ostrow explores this little-known world of bathrooms and sewers, offering unique insights into Roman sanitation, engineering, urban planning and development, hygiene, and public health. Focusing on the cities of Pompeii, Herculaneum, Ostia, and Rome, Koloski-Ostrow's work challenges common perceptions of Romans' social customs, beliefs about health, tolerance for filth in their cities, and attitudes toward privacy. In charting the complex history of sanitary customs from the late republic to the early empire, Koloski-Ostrow reveals the origins of waste removal technologies and their implications for urban health,

past and present.

Greek and Roman Art and Archaeology and Their Influence UNC Press Books

A HISTORY OF ROMAN ART, ENHANCED International Edition is a lavishly-illustrated survey of the art of Rome and the Roman Empire from the time of Romulus to the death of Constantine, presented in its historical, political, and social context. This ENHANCED EDITION has added coverage on Etruscan art in the beginning of the text. All aspects of Roman art and architecture are treated, including private art and domestic architecture, the art of the Eastern and Western provinces, the art of freedmen, and the so-called minor arts, including cameos, silverware, and coins. The book is divided into four parts—Monarchy and Republic, Early Empire, High Empire, and Late Empire—and traces the development of Roman art from its beginnings in the 8th century BCE to the mid fourth century CE, with special chapters devoted to Pompeii and Herculaneum, Ostia, funerary and provincial art and architecture, and the earliest Christian art. The original edition of this text was warmly received in the market based on a high level of scholarship, comprehensive contents, and superb visuals.

This richly illustrated, four-colour textbook introduces the art and archaeology of ancient Greece, from the Bronze Age through to the Roman conquest. Suitable for students with no prior knowledge of ancient art, this textbook reviews the main objects and monuments of the ancient Greek world, emphasizing the context and function of these artefacts in their particular place and time. Students are led to a rich understanding of how objects were meant to be perceived, what 'messages' they transmitted and how the surrounding environment shaped their meaning. The book contains nearly five hundred illustrations (with over four hundred in colour), including specially commissioned photographs, maps, floorplans and reconstructions. Judith M. Barringer examines a variety of media, including marble and bronze sculpture, public and domestic architecture, painted vases, coins, mosaics, terracotta figurines, reliefs, jewellery and wall paintings. Numerous text boxes, chapter summaries and timelines, complemented by a detailed glossary, support student learning.

Mark D. Fullerton blends the art of the Roman period with its history of political intrigue, military and religious ideologies, and intercultural interaction. The book not only explores the art of Rome itself but also that of the Roman provinces, including Syria, Egypt, Algeria, Greece and the British Isles, showing how Roman art drew from and influenced the wider ancient world. Each of the book's four parts opens with a timeline and historical overview, allowing the reader to better understand how the art relates to the political and social lives of the people of ancient Rome. Individual chapters begin with a map of Rome, illustrating how the city changed over centuries of rebuilding and reimagining. With an introduction, 'What Is Roman about Roman Art?', and 'Materials and Techniques' features on the artistic innovations introduced by the Romans, such as concrete, linear and atmospheric perspective, and mosaic, the book explores how Roman influences still affect the art and architectural world today.

Rome in the Eighth Century John Wiley & Sons

The Roman Empire had a rich and multifaceted visual culture, which was often variegated due to the sprawling geography of its provinces. In this remarkable work of scholarship, a group of international scholars has come together to find alternative ways to discuss the nature and development of the art and archaeology of the Roman provinces. The result is a collection of nineteen compelling essays—accompanied by carefully curated visual documentation, seven detailed maps, and an extensive bibliography—organized around the four major themes of provincial contexts, tradition and innovation, networks and movements, and local accents in an imperial context. Easy assumptions about provincial dependence on metropolitan models give way to more complicated stories. Similarities and divergences in local and regional responses to Rome appear, but not always in predictable places and in far from predictable patterns. The authors dismiss entrenched barriers between art and archaeology, center and provinces, even "good art" and "bad art," extending their observations well beyond the empire's boundaries, and examining phenomena, sites, and

monuments not often found in books about Roman art history or archaeology. The book thus

functions to encourage continued critical engagement with how scholars study the material past of the Roman Empire and, indeed, of imperial systems in general.
