strategies to reduce building heating and cooling demand (insulation, heat recovery, windows, shading, etc.), the use of energy efficient equipment and, low energy or zero carbon (LZC) technologies. Human factor can be managed by the application of controls, sensors or by habits.

AN APPROACH TO SUSTAINABLE REFURBISHMENT OF EXISTING BUILDING

In general, refurbishment can encompass such works as 'cosmetic' renovations (such as painting and decorating), upgrading, major repair work, alterations, conversions, extensions and modernisations. The lifecycle of a building can be significantly extended by effective refurbishment.

Refurbishment - Designing Buildings Wiki It is often used in relation to the installation of new building systems, such as heating systems, but it might also refer to the fabric of a building, for example, retrofitting insulation or double glazing .

Refurbishment on the other hand implies a process of improvement by cleaning, decorating, and re-equipping.

Renovation v refurbishment v retrofit - Designing Buildings

Medium refurbishment These projects aim to renew the existing fabric and services of a building to present day standards of performance. The investment timeframe is typically 15 years and, as a consequence, fittings, finishes and elements of building services will be replaced or upgraded, taking advantage of technological advances.

Cost model: Office refurbishment | Features | BuildingEgbu (1996) considers 'refurbishment' to encompass rehabilitation, alteration, adaption, extension, improvement, modernization and repair work carried out to an existing building to permit it reuse for various specific reasons.

Definition And Concepts In

Building Refurbishment ...9.2.3

Strengthening of existing buildings The seismic behaviour of old existing buildings is affected by their original structural inadequacies, material degradation due to time, and alterations carried out during use over the years such as making new openings, addition of new parts inducing dissymmetry in plan and elevation, etc.

REPAIR, RESTORATION AND STRENGTHENING OF BUILDINGS

Maintenance and Repair of Older Buildings Maintenance and repair are needed to tackle the inevitable decay and deterioration of building fabric that occurs because of climatic conditions, wear and tear by building users, neglect or other threats.

Maintenance and Repair of Older Buildings | Historic England

Inappropriate or poorly-executed repairs may fail prematurely and accelerate the deterioration of the original building fabric, increasing the extent and cost of future maintenance and repairs. While extensive investigations and monitoring may in theory be desirable, often the depth of such assessment is constrained by various factors.

Principles of Repair for Historic Buildings | Historic England

Building Refurbishment + Repair works require a strong understanding of how buildings work and how they should be repaired. Approximately 50% of construction work involves repair and refurbishment (figure taken from Building Cost Information Service) and as the building stock ages, this will grow. It is key that before embarking on the refurbishment or repair of an existing building that there is a thorough understanding of its properties, both structural and building fabric.

Building Regulations | Insulation | Kingspan | Great Britain

The strategy for the Decent Home refurbishment is a modest enhancement of the energy efficiency of the building fabric and the renewal of the services. The internal fabric of the house in this case was entirely retained in place. None of the cold bridges (joists into external walls) were addressed and no airtight layers were installed. Refurbishing existing buildings is the best way to reduce waste: this avoids demolition waste and reduces costs, carbon emissions and social and environmental impacts associated with transport, landfill, recycling and the mining and manufacturing of new materials.
