A unique international exercise in information-gathering and analysis An extraordinary confluence of global forces has kept the world economy strong in the past few years, but there are now numerous challenges to growth. The World Economic Outlook (WEO) presents the IMF's leading economists' analyses of global economic developments during the near and medium terms. It is a respected, one-stop, trusted resource offering remarkable insight, balance, and perspective to decision makers and policymakers worldwide. Published at least twice yearly, the World Economic Outlook presents the outlook for growth, inflation, trade, and other economic developments in a clear, practical format. Each WEO considers the issues affecting advanced and emerging economies. The analytic chapters provide the global intelligence required to deal with global interdependence. These analyses focus on pressing concerns or hotly debated issues, putting prospects for liquidity, inflation, and growth into context. The statistical appendix presents historical data as well as projections and selected series from World Economic Outlook database updated for each report. The October 2008 edition examines commodity prices and inflation, economic cycles in the aftermath of financial crises, the role of fiscal policy during downturns, and current account imbalances in emerging economies. Recent analytic chapters have examined climate change, the housing cycle, commodity prices, capital inflows, globalization and inequality, and the global business cycle.

The book presents the history of ICMI trough a prosopographical approach. In other words, it pays a lot of attention to the actors of the International movement. The portraits of the members of the ICMI Central Committees (1908-1936) and ICMI Executive Committees (1952-2008), and other eminent figures in ICMI history, who have passed away in the first 100 years of its life, are the guiding thread of the volume. Each portrait includes: · Biographical information · An outline of the various contributions made by the individual in question to the study of problems pertaining to mathematics teaching/education · Primary bibliography · Secondary with particular attention to the publications concerning the teaching of mathematics · Images: photos, book frontispieces, relevant manuscripts The authors of the portraits (30 altogether) are researchers in the history of mathematics, mathematics, and mathematics education. The focus on the officer's role within ICMI and on his/her contributions to mathematics education, make the portraits different from usual biographies. In particular, since most officers were active mathematicians, the portraits shed light on aspects of their lesser-known activity. Connecting chapters place the action of these figures in the historical context and in the different phases of ICMI history.

While architects have been the subject of many scholarly studies, we know very little about the companies that built the structures they designed. This book is a study in business history as well as civil engineering and construction management. It details the contributions that Charles J. Pankow, a 1947 graduate of Purdue University, and his firm have made as builders of large, often concrete, commercial structures since the company's foundation in 1963. In particular, it uses selected projects as case studies to analyze and explain how the company innovated at the project level. The company has been recognized as a pioneer in "design-build," a methodology that involves the construction company in the development of structures and substitutes negotiated contracts for the bidding of architects' plans. The Pankow companies also developed automated construction technologies that helped keep projects on time and within budget. The book includes dozens of photographs of buildings under construction from the company's archive and other sources. At the same time, the author analyzes and evaluates the strategic decision making of the firm through 2004, the year in which the founder died. While Charles Pankow figures prominently in the narrative, the book also describes how others within the firm adapted the business so that the company could survive a commercial market that changed significantly as a result of the recession of the 1990s. Extending beyond the scope of most business biographies, this book is a study in industry innovation and the power of corporate culture, as well as the story of one particular company and the individuals who created it.

Versace. The very name conjures up images of outrageous glamour and bold sexuality, opulence and daring. All of course true, but only half the story. Versace is also the legacy of a great creative genius from a poor, backward part of southern Italy who transformed the fashion world through his intuitive understanding of both women and how a changing culture influenced the way they wanted to dress. The first book in English about the legendary designer, House of Versace shows how Gianni Versace, with his flamboyant sister Donatella at his side, combined his virtuosic talent and extraordinary ambition to almost single-handedly create the celebrity culture we take for granted today. Gianni Versace was at the height of his creative powers when he was murdered in Miami Beach. The story was front page news around the world and the manhunt for his killer a media obsession. His beloved sister Donatella demanded no less than a funeral befitting an assassinated head-of-state to be held in Milan's magnificent cathedral. In what was the ultimate fashion show, the world's rich and beautiful – Princess Dianna, Elton John, Carla Bruni, Naomi Campbell, Carolyn

Bessette-Kennedy, Anna Wintour and others – gathered to mourn a man already considered one of fashion's great pioneers. Deborah Ball, a long-time Milan correspondent for The Wall Street Journal, conducted hundreds of interviews with Versace family members, Gianni Versace's lovers and business rivals, models such as Naomi Campbell whom he helped shoot to international stardom and fashion industry icons, including Anna Wintour, the legendary editor of Vogue. Ball vividly recounts the behind-the-scenes struggles – both creative and business – of Donatella as she stepped out of her brother's long shadow and took control of the House of Versace. The book offers the first inside look at the enormous challenges Donatella faced in living up to Gianni's genius, her struggle with a drug habit, her battles with her brother Santo and the mystery of why Gianni left control of his house to Donatella's young daughter, Allegra. House of Versace is a compelling, highly readable tale of rise from obscurity, a painful fall and ultimate redemption as the Versace empire returned to health – for now. Bringing together fashion, celebrity, business drama, jet-set lifestyles, and a notorious crime, House of Versace is an old-fashioned page-turner about a subject of enduring fascination.

Urban sustainability has become a political and social agenda of global significance, of which real estate is an integral dimension. Sustainable urban development includes much more than 'green building' standards, yet in practice, other aspects such land use plans and locations are often overlooked. This book demonstrates that the issue of sustainable development stretches far beyond the hitherto dominating agenda based on 'green' (i.e. environmentally and ecologically sustainable) buildings. In doing so, it presents a novel framework based on the concept of economic sustainability of real estate locations, drawing connections with the global financial crisis and housing price bubble discourse. It argues for the need to better integrate social, cultural and economic dimensions into the real estate sustainability agenda. It also explores the role of location, and especially

the image aspect therein. Trends in consumer choice are important to the way these dimensions are appreciated in decisions about investment, development, valuation and other activities of the production, consumption and governance of the built environment. This book will be of interest to private and public sector practitioners of real estate valuation as well as scholars of urban studies, geography, economics, urban planning and environmental studies.

The Rise of the New West Springer

Since its publication in the early 90s, Brenda Boardman's Fuel Poverty has been the reference text for those wishing to learn about this complex subject. In this, its successor, she turns a critical eye to the new millennium and finds that the situation, while now more widely recognised, is far from having improved. The book begins by discussing the political awakening to the issue and exploring just who constitutes the fuel poor. It examines the factors that contribute to fuel poverty - low incomes, high fuel prices and poor quality housing - and looks at and evaluates the policies that have been employed to help reduce the problem. The latter part presents a detailed set of proposals based around long-term improvements in the housing stock that must be employed if we are to avoid a dire situation continuing to get worse. Based on detailed analysis of the situation in the UK, the growth of fuel poverty (sometimes called energy poverty) in other countries and the new focus in European policy makes the book timely and provides important lessons for those who now have to produce policies to tackle the issues.

This volume focuses on the directions that African cultural studies has taken over the years and covers the following central themes: contemporary issues in African cultural studies; Gender and the making of identity; the dual discourses of Afropessimism and Afrofuturism; problematizing the African diaspora and methodology and African cultural studies. The second of two volumes, the book predominantly pulls together a rich reservoir of previously published articles from Critical Arts: South-North Cultural and Media Studies. Taken together the two volumes re-expose for international readers sets of theories, methodologies and studies that not only have been influenced by global trends, but which themselves have contributed to shaping those trends. While the first volume addressed foundational themes and issues in African cultural studies, this second volume focuses on the directions that African cultural studies is taking; the complex ways in which gender can be seen at work in the making of identity; the juxtaposition of two relatively new themes in African cultural studies, namely Afropessimism and Afrofuturism; the ways in which the presence of continental Africans in the diaspora problematize taken-for-granted conceptions of diaspora and diasporic identity; identifying some of the methodological issues and approaches that have been taken up in African cultural studies work. This book will be a key resource for academics, researchers and advanced students of African cultural studies, media and cultural studies, African studies, history, politics, sociology, and social and cultural anthropology, while also being of interest to those seeking an introduction to the sub-field of African cultural studies.

Value in a Changing Built Environment BRILL

A new framework for understanding the underpinnings of real estate property value and the role it plays in the larger economy Value in a Changing Built Environment examines the professional foundations on which the valuation exercise and the valuation profession rest. Written by noted experts in the field, the book addresses the often limited understanding of the concept of property value by explaining the intrinsic linkages between economic, environmental, social, and cultural measures and components of property value. The book offers a framework that paves the way towards a more holistic approach to property value. Value in a Changing Built Environment unwraps many of the traditional assumptions that have underpinned market participants' decision making over the last few decades. The authors explore the concept that a blindfold application of valuation theories and approaches adopted from finance is unlikely to be able to cope with the nature of property as an economic and public good. This vital resource: Explains the criteria for making estimates of value that can be applied worldwide Offers an integrated approach to property value and the valuation processes Captures the often illusive intangibles such as environmental performance into valuation Addresses a market failure to account for wider criteria on building performance Value in a Changing Built Environment examines how real estate valuation plays a pivotal role in decision making and how can a new body of knowledge improve the practice in both business and social domains.

The Routledge Handbook of Public Aviation Law is the first book to incorporate a comprehensive analysis of Public Aviation Law - principally international, but also domestic law in a comparative context - in a single volume. International Law is pervasive in Aviation Law, and is incorporated into a number of major multilateral treaties (e.g., the Chicago Convention of 1944, for Public International Air Law). This is supplemented by various Annexes (promulgated by the International Civil Aviation Organization) and Conventions and Protocols (promulgated by States in diplomatic conferences). States then implement these international obligations in domestic laws that create aviation regulatory administrations that, in turn, promulgate regulations. Bringing together leading scholars in the field, this prestigious reference work provides a comprehensive and comparative overview of Public Aviation Law. It surveys the state of the discipline including contemporary and emerging areas of law, regulation, and public policy

in air transportation. Each chapter begins with an overview of the international law applicable to the subject matter, followed, where appropriate, by a comparative examination of domestic statutes, regulations, and jurisprudence. The objective of the book is to identify and summarize existing areas within the context of international research, and to identify and highlight emerging areas. Both practical and theoretical in scope, the Routledge Handbook of Public Aviation Law will be of great relevance to scholars, researchers, lawyers, and policy makers with an interest in aviation law.

This book examines the interplay between the national and the European levels in EU foreign policymaking, focusing on the Middle East. European engagement in peacemaking in the Middle East dates back to foreign-policy cooperation in the early 1970s. Following the launch of the peace process in 1991, the EU and its Member States further stepped up their involvement in conflict resolution, focusing on one central area of EU engagement - the Israeli-Palestinian conflict. This book covers the period from the beginning of the peace process in 1991 until 2008, and focuses on the actions of the big three Member States: Germany, France and the UK. Using the Europeanization concept as framework of analysis, the book examines the problematic dynamics between these Member States' national foreign-policy models and the construction of a common European conflict-resolution policy. It also provides interesting new insights into the EU's international role and potential, addressing the often neglected question of how Europeanization effects help to mitigate some of the classical limitations of European foreign policymaking. The book will be of great interest to students of EU policy, Middle Eastern Politics, peace and conflict resolution, security studies and IR.
