Dr. Anthony Kalloo and Dr. Jonathan M. Buscaglia have taken years of experience at Johns Hopkins Hospital and created a collection of unique and interesting cases revolving around gastrointestinal and liver diseases. *Complicated Cases in GI* follows patient-physician interactions and includes over 50 cases that are complex in their nature, interesting in their presentations, or a representation of a unique therapeutic challenge. Each chapter case includes: • A detailed summary of a particular patient presentation • Associated pathology slides, radiology films, or endoscopy photographs • A brief evidence-based discussion focusing on the main learning objectives • Three to five key learning points listed to highlight the most important features *Complicated Cases in GI* also includes 150 board review-like questions taken directly from the cases themselves. The questions highlight the salient aspects and are meant to reinforce the learning objectives involved in each case. They will also serve as a useful study aid for anyone preparing for an examination in general medicine, gastroenterology or hepatology. *Complicated Cases in GI* is ideal for residents, fellows, practicing physicians preparing for recertification, nurses, and students looking for a quick reference text that can be read and absorbed over time—one case at a time.

This handbook examines pediatric consultation-liaison psychology in pediatric medical settings. It offers a brief history of pediatric psychologists' delivery of consultation-liaison services. The handbook provides an overview of roles, models, and configurations of pediatric psychology practice in diverse inpatient and outpatient medical settings. Chapters discuss the most frequently seen major pediatric conditions encountered in consultation practice. Coverage includes evaluation, intervention, and treatment of each condition. Each clinical condition addresses the referral problem in the context of history and family dynamics. In addition, chapters address important aspects of the management of a consultation-liaison service and provide contextual issues in delivering evidence-based services in hospital and medical settings. Topics featured in this handbook include: The role of assessment in the often fast-paced medical environment. Modifications of approaches in the context of disorders of development. Consultation on pediatric gender

identity. The presentation of child maltreatment in healthcare settings. The use of technological innovations in pediatric psychological consultation. Important ethical considerations in consultation-liaison practice. *Clinical Handbook of Psychological Consultation in Pediatric Medical Settings* is a must-have resource for clinicians and related professionals as well as researchers, professors, and graduate students in pediatric and clinical child and adolescent psychology, pediatrics, social work, developmental psychology, child and adolescent psychiatry, and related disciplines.

Orthotics: A Comprehensive Clinical Approach is an innovative and comprehensive new text that provides essential information about contemporary orthoses to guide the student and clinician in prescribing and utilizing these appliances in neuromuscular, musculoskeletal, and integumentary rehabilitation. Written by recognized authorities in the field, Joan Edelstein, MA, PT, FISPO and Jan Bruckner, PhD, PT, this is a prime resource for

practitioners and clinicians. Individual chapters cover orthoses for the foot, ankle, knee, hip, trunk, neck, shoulder, elbow, wrist, and hand. Orthoses for patients with paraplegia, burns, and soft tissue contractures are detailed and illustrated. Prescription guidelines, evaluation techniques, goal setting, and training procedures are presented. Each chapter has interesting thought questions and case studies to promote clinical reasoning and problem-solving skills. A unique feature of this text is the inclusion of a point-counterpoint discussion to demonstrate how clinicians can

manage the same patient in different ways. This approach inspires broader thinking about clinical management.
