Does this sound like a daydream? It might, but this dream is closer to reality than one might imagine. The world of trading is diverse and full of different possibilities and chances. One of the best things about the trading world is that there is a place for everyone. Whether you're a beginner or have been investing for years, have long or short-term goals, or simply just want to experiment a bit, you will definitely find something suitable for you. However, it is essential to understand that this isn't a get rich quick scheme where you're going to make millions overnight. You will first need to educate yourself about its different aspects, set your goals, and choose what you want to invest in. Becoming successful in the trading world requires hard work, dedication, and a proper understanding of its different aspects. Most people choose to keep their money in the bank to save it. A bank is an attractive option for people because it is safe. The buying and selling of stocks, however, involves risk. You could buy a stock today and the value of the stock could decline or worse; the company might go bankrupt. If a company goes out of business, then your shared ownership would be worthless, and all the money you had invested would be gone. On the other hand, if you choose the right stocks and buy them at the right time, then their value could go up. By the time you sell the stock, you will have made a profit. The advantage of investing in the stock, forex and options market, rather than investing in a bank is the chance to profit from your investment. When you keep your money in a bank, very little value is added to the money over time. Banks will pay interest rates, but nowadays interest rates are so low that they don't manage to keep up with inflation. Often, we associate inflation with the increase in the money supply, making things more expensive and our money less valuable. In economics, inflation is the gradual increase in the prices of goods and services over time. Over time, things become more expensive which means the dollar amount to purchase x item increases. A

small amount of inflation is good for the economy because it makes the loans you have to repay less expensive over time. But if we just keep our money sitting in the bank then the value of our money won't keep up with the rate of inflation. In this bundle, you will learn strategies of trading and investing for a living. think you are beyond the stage of a novice trader, then you may want to jump ahead and start reading from Chapter 7 for an overview of the most important day trading strategies: Day trading is not gambling or a hobby. You must approach trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends.
