*Reimagining US-China Relations* Springer Nature

The last four years have seen significant damage in US-China relations that will take years to rebuild. Early signs within the Biden Administration indicate that an expeditious return to strong Sino-US ties is premature at best. To fully address these challenges and regain credibility both at home and abroad, the Biden team will need to recalibrate a new set of values, objectives, and thinking in redefining the most important bilateral relationship in the world. This edited book volume seeks to reimagine US-China relations, provide innovative policy analysis, and utilizes a truly multidisciplinary approach coupled with both first and second-hand quantitative data, infographics, geopolitical analysis, and perspectives from leading experts. More importantly, this book project provides a nuanced perspective highlighting the central issues that will define America and China both now and well into the future. Whether you are a policy-maker, business professional, academic, established practitioner, or a casual observer, this impressive volume provides exceptional insight on issues like technology, trade, cross-Strait relations, security & alliances in East Asia, geopolitics, climate change, and much more.

This book provides a history of the WTO US-EU banana dispute through the lens of a major actor: the US-owned multinational firm, Chiquita Brands International. It documents and explains how Chiquita succeeded in having the Clinton administration pursue a trade policy of forcing the European Union to dismantle its preferential banana import regime for exports from the small English-speaking Caribbean (ESC) countries. The export of bananas was critically important to the social stability and economic viability of these countries and that was in the national security interest of the United States. The experience indicates that succeeding in this goal was detrimental to U.S. national security interest in the Caribbean.

*American Military History Volume 1* Amacom Books

American Military History provides the United States Army-in particular, its young officers, NCOs, and cadets-with a comprehensive but brief account of its past. The Center of Military History first published this work in 1956 as a textbook for senior ROTC courses. Since then it has gone through a number of updates and revisions, but the primary intent has remained the same. Support for military history education has always been a principal mission of the Center, and this new edition of an invaluable history furthers that purpose. The history of an active organization tends to expand rapidly as the organization grows larger and more complex. The period since the Vietnam War, at which point the most recent edition ended, has been a significant one for the Army, a busy period of expanding roles and missions and of fundamental organizational changes. In particular, the explosion of missions and deployments since 11 September 2001 has necessitated the creation of additional, open-ended chapters in the story of the U.S. Army in action. This first volume covers the Army's history from its birth in 1775 to the eve of World War I. By 1917, the United States was already a world power. The Army had sent large expeditionary forces beyond the American hemisphere, and at the beginning of the new century Secretary of War Elihu Root

had proposed changes and reforms that within a generation would shape the Army of the future. But world war-global war-was still to come. The second volume of this new edition will take up that story and extend it into the twenty-first century and the early years of the war on terrorism and includes an analysis of the wars in Afghanistan and Iraq up to January 2009.

The definitive account of how regime change in the Middle East has proven so tempting to American policymakers for decades—and why it always seems to go wrong. "Must reading—by someone who saw it first-hand—for all interested in America's foreign policy and its place in the world." —Robin Wright Since the end of World War II, the United States has set out to oust governments in the Middle East on an average of once per decade—in places as diverse as Iran, Iraq, Afghanistan (twice), Egypt, Libya, and Syria. The reasons for these interventions have also been extremely diverse, and the methods by which the United States pursued regime change have likewise been highly varied, ranging from diplomatic pressure alone to outright military invasion and occupation. What is common to all the operations, however, is that they failed to achieve their ultimate goals, produced a range of unintended and even catastrophic consequences, carried heavy financial and human costs, and in many cases left the countries in question worse off than they were before. Philip H. Gordon's *Losing the Long Game* is a thorough and riveting look at the U.S. experience with regime change over the past seventy years, and an insider's view on U.S. policymaking in the region at the highest levels. It is the story of repeated U.S. interventions in the region that always started out with high hopes and often the best of intentions, but never turned out well. No future discussion of U.S. policy in the Middle East will be complete without taking into account the lessons of the past, especially at a time of intense domestic polarization and reckoning with America's standing in world.

New threats surface in the aftermath of WWII—this time, in the remote waters of the Arctic. Arctic Sea is the next thrilling entry in David Poyer's critically-acclaimed future war series. In the aftermath of a world war with China, Admiral Dan Lenson is assigned to set up a US Navy base on the rugged North Slope of Alaska, in response to Russian seabed claims that reach nearly to the US coast. Yet the current administration seems oddly reluctant to confront Russian aggression. At the same time, the International Criminal Court is accusing Dan of a war crime. Back in Washington, Blair Titus is running Jim Yangerhans's campaign for president, while Dan's daughter Nan battles disease in a radiation-soaked Midwest. But when Moscow plans to test the Apocalyps, a nuclear powered citykiller torpedo, in the Arctic Sea, Dan is sucked into a perilous covert mission. Will a barely victorious America survive dangerous new threats...both from without, and within?

Six years later, Snowden reveals for the very first time how he helped to build this system and why he was moved to expose it. By the Best Selling author of *The Painted Canoe* soon to be a major Motion Picture *The Lunatic* now a Motion Picture and *The Great Yacht Race* Anthony C. Winkler GOING HOME TO TEACH "Everyone going, and you coming." 1975: Nobody could understand why anyone choose, in a time of raging democratic socialism and migrating panic-stricken middle-class Jamaicans, to leave the USA to go to Jamaica to teach. But for Anthony Winkler the reason was simple: he wanted to go home. This autobiographical account of the year that he spent at a rural teacher training college flashes back to the Jamaica of the narrator's childhood, recounting incidents and vignettes that shed light on the muddle of competing personalities, doctrines and images of self currently vying for center stage in the tumult of Jamaican life. Emerging from the story are hilariously drawn characters, contrasts between the Jamaican and American outlook, and lessons about the perils of superimposing a foreign ideology onto a native culture. "I am a Jamaican writer, who by force of circumstances and luck, lives in the United States. I am keenly interested in the cultural chasm

that exists between people of different countries, and I have mainly aimed my writing at that theme. Odd things always seem to be popping about me in the United States, and I must periodically run home to Jamaica for a taste of normalcy." -Anthony Winkler. 'Anthony Winkler is a man who lives and breathes the island's culture's and customs, speaks and writes in the musical rhythms of its language, understands the unending struggle for survival and dignity that is every Jamaican's lot.' -Vincent Coppola, Atlanta Magazine Cover illustration: 'The Visit' by Albert Artwell, reproduced with the permission of the Hardingham Collection. About the Author Anthony C. Winkler was born in Kingston, Jamaica. He was educated at Mount Alvernia Academy then Corwall College in Montego Bay, and California State University in Los Angeles. He is the author of several textbooks in English and Public Speaking which are widely used in American colleges and universities. His first novel, *The Painted Canoe*, was published by Kingston Publishers in 1983, followed by *The Lunatic* in 1987 and *The Great Yacht Race* in 1992. American editions of the first two novels were published by Lyle Stuart in 1986 and 1987 respectively. All three novels met with international critical acclaim, and the movie *The Lunatic* was released in 1990. Mr. Winkler currently lives in Atlanta, Georgia, with his wife and two children.
