The luxurious ingredients and recipes in 120 Organic Skin Care Recipes are just the answer to beauty transforming home spa miracle you are about to experience.

[Henley's Twentieth Century Book of Recipes, Formulas and Processes](#) Wentworth Press

Nostalgia has always been a part of cooking, with cooks everywhere trying to recreate the smells and tastes of their home and youth. Lydia Gurney's 1912 ""Things Mother Used to Make"" has this sense of nostalgia at its heart. A native New Englander, the recipes have a bit of a New England leaning, but anyone craving honest-to-goodness American cooking will find a treasure trove of recipes in this volume.

*Bulletin* McFarland

The history of science is a story of human discovery--intertwined with religion, philosophy, economics and technology. The fourth in a series, this book covers the beginnings of the modern world, when 16th-century Europeans began to realize that their scientific achievements surpassed those of the Greeks and Romans. Western Civilization organized itself around the idea that human technological and moral progress was achievable and desirable. Science emerged in 17th-century Europe as scholars subordinated reason to empiricism. Inspired by the example of physics, men like Robert Boyle began the process of changing alchemy into the exact science of chemistry. During the 18th century, European society became more secular and tolerant. Philosophers and economists developed many of the ideas underpinning modern social theories and economic policies. As the Industrial Revolution fundamentally transformed the world by increasing productivity, people became more affluent, better educated and urbanized, and the world entered an era of unprecedented prosperity and progress.
