My name is Sean Peyton Ross. I write this book for present and future generations to read while I still have enough mental capacity and memory to write it before my injury depletes me. I was basically a late term miscarriage born by c section at 6 and 3/4 months old. 5 times I should have died. I am and always have lived on borrowed time. I was kept alive in an incubator by the doctors until I weighed enough and developed enough to survive outside the incubator. I was always a sickly child

and was small. The other kids beat up and bullied on me. All my life, through school where I excelled in academics I was beaten up and bullied on. I was put down by the kids who wanted to be bad and the rich kids who thought they were the last word in society. I was bullied in the Navy, In college, at work and in the State Defense Force where I spoke up for the troops and inadvertently caused 3 generals to be fi red after a mission of mercy from a tornado in my hometown started going awry. I had to leave the State Defense Force under duress from the Commanding General. I now have been black listed and no one remembers the good I tried to do while in uniform. I now live in fear for my family and myself. This book is to serve as a journal and as a warning of how diffi cult, cruel and ugly life can be sometimes. It also serves as a guide to those who read this book so that the readers will be able to learn from what I have written. It will inspire those who read it to try harder to improve themselves and the world they now live in. The world cannot advance as a people socially if we only dwell on the triumphs of yesterday do not know of or take heed of the sins and mistakes of the past.

Mustang 1979-2004 Buyer's Guide AuthorHouse

Of the legendary names in the history of the Ford Mustang, one stands apart: Boss. Originally created to homologate the new Boss 302 engine for SCCA Trans-Am racing, the Boss 302 Mustang was built in limited numbers for the street. Designed by legend Larry Shinoda, the Boss cars were easily distinguished from their less potent stable mates by their unique front and rear spoilers, rear window slats, and the omission of the standard Mustang's (fake) rear fender brake ducts. Also standard was a shaker hood scoop and bold graphics. Though Mustang performance faded to all-time lows as the 1970s rolled on, there was good news on the way. The pairing of the venerable 302 Windsor engine with the new Fox-body platform for the 1979 Mustang might not have seemed significant at the time, but it was the first edition of what would become a performance institution in

the late 20th century: the 5-liter Mustang was an overwhelming force on the streets and tracks through the end of its production in 1995. With no small amount of fanfare, Ford is paying homage to its performance past with the re-introduction of the 5.0 liter powerplant in the Mustang GT for 2011.
