Designing With Light is an award winning company practicing architectural lighting design and energy consulting. The firm is based on the island of Oahu in Hawaii. The company has extensive experience in residential, commercial, hospitality and industrial lighting design. We have participated in and supported energy efficiency lighting projects throughout the world. Designing With Light : About US The profession of architectural lighting design is a relatively young industry, even though the practise of what we do in determining where there is light and where there isn't has been around for centuries. Of course back then this was simply people deciding where to put candles or, as far back as the 9 th century, where to locate oil lamps. Confessions of a lighting designer - what is lighting design? Architectural lighting focuses on three aspects of the illumination of buildings or spaces. The first architectural element is the aesthetic appeal of a building, which is important in the illumination of retail environments. Second, the ergonomic aspect: the measure of how much of a function the architectural lighting plays. Architectural Interior Lights | Lighting Styles DESIGNING WITH LIGHT Architecture is reliant upon light to give it form, to allow us to understand its nuances, spatial qualities, and material conditions. We approach lighting design with the architect as collaborator - helping designers of space and material execute their visions and

make real the imagined atmospheres. Lighting Design | Lam Partners | Architectural Lighting Design Fewer still are the books devoted to architectural lighting design, or, one might say, to the designing of architectural light. The recently published Architectural Lighting: Designing with Light and Space (\$24.95, Princeton Architectural Press, March 2011), helps fill that void. Lighting Primer | Architect Magazine Designing With Light: The Art, Science, and Practice of Architectural Lighting Design is a comprehensive introduction to the intelligent use of lighting to define and enhance a space. The book explores all aspects of the process, including aesthetics, technology, and practicalities, in a clear, concise manner designed to provide the reader with a full working knowledge of lighting design.
