Corrosion is a huge issue for materials, mechanical, civil and petrochemical engineers. With comprehensive coverage of the principles of corrosion engineering, this book is a one-stop text and reference for students and practicing corrosion engineers. Highly illustrated, with worked examples and definitions, it covers basic corrosion principles, and more advanced information for postgraduate students and professionals. Basic principles of electrochemistry and chemical thermodynamics are incorporated to make the book accessible for students and engineers who do not have prior knowledge of this area. Each form of corrosion covered in the book has a definition, description, mechanism, examples and preventative methods. Case histories of failure are cited for each form. End of chapter questions are accompanied by an online solutions manual. \*

Comprehensively covers the principles of corrosion engineering, methods of corrosion protection and corrosion processes and control in selected engineering environments \* Structured for corrosion science and engineering classes at senior undergraduate and graduate level, and is an ideal reference that readers will want to use in their professional work \* Worked examples, extensive end of chapter exercises and accompanying online solutions and written by an expert from a key petrochemical university

This is the first practical guide for nurses on how to incorporate the knowledge, skills, and tools of Strength-Based Nursing Care (SBC) into everyday practice. The text, based on a model developed by the McGill University Nursing Program, signifies a paradigm shift from a deficit-based model to one that focuses on individual, family, and community strengths as a cornerstone of effective nursing care. The book develops the theoretical foundations underlying SBC, promotes the acquisition of fundamental skills needed for SBC practice, and offers specific strategies, techniques, and tools for identifying strengths and harnessing them to facilitate healing and health. The testimony of 46 nurses demonstrates how SBC can be effectively used in multiple settings across the lifespan.

Photographer Jay Fleming turned his attention to Smith and Tangier Islands - the Chesapeake Bay's last inhabited 'water-locked' islands. Fleming has made countless trips to the islands to document the unique way of life and environment that have been shaped by isolation and the waters of the

Chesapeake. This collection of photographs will fill the pages of Fleming's second book, *Island Life*. This body work comes at an important time for the islands, as their populations continue to decline and the unrelenting forces of the bay threaten the working waterfronts that have sustained the communities for centuries. Fleming hopes that his photography will immerse readers in the *Island Life* and capture a crucial moment in time for the Chesapeake's most unique communities.

This book addresses the emergent need to act on reducing or getting rid of micro plastic pollution, to achieve a sustainable environment. Microplastics are small plastic pieces, which are less than five millimeters long which can be harmful to our oceans and aquatic life. These predominantly include microfibers from clothing, microbeads, and plastic pellets. Microplastics impact aquatic creatures, turtles and birds. According to the first study on estimation of human ingestion of microplastic, on average a person consumes at least 50,000 particles of microplastic a year and breathes a similar quantity. Ingested microplastic particles can physically damage organs and also compromise immune function and stymie growth and reproduction. This book presents six informative chapters in order to alleviate the above mentioned issues.

The professionalism of the early childhood sector has gained prominence on the policy agendas of many countries. National pedagogical frameworks or curricula and an upsurge of pathways to gaining or upgrading qualifications has led to a pervasive terminology of professionalism. Yet, despite the pervasiveness of this terminology, the question of what professionalism means in early years contexts remains open to debate. This book draws together the work of an international group of scholars who have engaged with this question. They ask: How can professionalism be conceptualised in early childhood settings? How might one act professionally in increasingly diverse and changing social and cultural contexts? Do we have a common ground of understanding about these terms? Are there key concepts that can be agreed upon? Drawing on research and experience across a wide range of national contexts, this book seeks an understanding of early childhood professionalism in local contexts that might throw light on the global implications of this term. This book was published as a special issue in the European Early Childhood Education Research Journal.

This report on the government fund to support private sector jobs and growth in places that rely on the public sector, the Regional Growth Fund, finds that the initial £1.4 billion investment could result in some 41,000 more full-time-equivalent private sector jobs in the economy than without the Fund. However, there was scope to have generated more jobs relative to the amount of grant awarded. The Fund has not optimised value for money because a significant proportion of the funds were allocated to projects that offer relatively few jobs for the money invested. The report concludes that applying tighter controls over the value for money offered by individual bids and then allocating funding across more bidding rounds could have created thousands more jobs from the same resources. Rigorous evaluation will be required to quantify precisely the Fund's overall employment impact. More than two thirds (28,000) of the 41,000 additional jobs are expected to be delivered indirectly, for example through knock-on effects in companies' supply chains or the wider economy. The average project will last at least seven years. However, it is not clear how much of the Fund's boost to the private sector will be sustained in the longer term. It has also taken longer than expected to turn conditional offers of grants for projects into final offers. Therefore, despite the government's intention to get projects up and running quickly, only around a third have so far received final offers of funding

Take Note: An Introduction to Music Through Active Listening is an innovative music appreciation text, designed to help students become active and attentive listeners through an in-depth examination of a recurring repertory of core musical works. By exploring each element of music through the lens of these core works--which were carefully selected to represent a variety of styles and genres--students deepen their understanding of how music works and develop strong listening skills that will enhance their enjoyment of music. Combining this listening-centered approach with an overview of Western music history, interactive activities, and in-text features that invite students to discover additional works outside of the classroom, Take Note prepares students for a lifetime of music appreciation. Distinctive features \* Listening-centered approach: develops students' understanding of the basic elements of music \* Recurring core repertory: explores the elements of music through a select group of musical works that reflect a variety of styles (piano, winds, brass, and percussion) and genres (jazz, lieder, world, and choral music) \* Historical context: gives students an overview of Western music from the Medieval period to the present through a 3-chapter historical survey, timelines, and "Focus On," "In History," and "Across the Arts" boxes \* "If You Liked This Music" boxes: encourages students to expand their playlists and listening skills beyond the core repertory by offering additional listening suggestions throughout the text \* Dashboard for Take Note: offers streaming audio of all of the musical selections in the text plus instrument videos, activities, and interactive listening guides that provide moment-by-moment explanations of key works through a running commentary.
