### LANE RAMOS

From the Ground Up Soho Press

This compilation of long-inaccessible puzzles by a famous puzzle master offers challenges ranging from arithmetical and algebraical problems to those involving geometry, combinatorics, and topology, plus game, domino, and match puzzles. Includes answers.

**Horses!** OUP USA

Reveals small but significant actions people can take to lead happier lives, offering reflections on such topics as family, relationships, work, school, sports, emotions, and experiences.

**Beyond Belief** Routledge

Reflections of Eminent Economists Edward Elgar Publishing

**A Feminist Fitness Journey** Thunder Bay Press

When Taylor Romano arrives in Oxford for a summer journalism program, she learns secrets about her family's past and must use some historical sleuthing to uncover her link to a Titanic survivor named Ava Knight, a young English aristocrat, who boarded the Titanic and met three people who changed her life forever.

**A Coloring and Activity Book for Kids With Word Searches, Dot-to-dots, Mazes, and More** Greystone Books Ltd

Stump your friends and family! Who knew that math could be so cool? Crammed with games, puzzles, and trivia, The Everything Kids' Math Puzzles Book puts the fun back into playing with numbers! If you have any fear of math—or are just tired of sitting in a classroom—The Everything Kids' Math Puzzles Book provides hours of entertainment. You'll get so caught up in the activities, you won't even know you're learning! Inside, you'll be able to: Decode hidden messages using Roman numerals Connect the dots using simple addition and subtraction Learn to create magic number squares Use division to answer musical riddles Match the profession to numerical license plates

**Better Together** Pickle Partners Publishing

Rebellion Dogs Publishing is proud to announce a 21st century daily reflection book. Beyond Belief's 2014 second printing is now available with a Foreword by Ernie Kurtz and updated links and End Notes. What are "agnostic musings"? It is not news to anyone that the war of worldviews makes for sporting debate; does an intervening God grant sobriety, serenity, wisdom and courage or is conscious contact a delusion? Sorry, while we might be as amused as anyone with this question, Beyond Belief: Agnostic Musings for 12 Step Life doesn't enter this debate. Hate the game; don't hate the players. A good idea is a good idea. Why dismiss valid experience because of the beliefs that someone harbors? Beliefs aren't facts. Beyond our belief is where life is happening; chances have to be taken; processes have to be evaluated; life has to be lived. Atheists, humanists, skeptics and agnostics will feel included in these daily reflections. Believers won't feel mocked or belittled. Everyone in recovery is included. No one needs to adopt the beliefs of someone else nor deny our own beliefs to get clean and sober. Believing and belonging are not synonymous. We are well into Century 21. Anyone should feel free to doubt or believe with impunity. Everyone's experience is a valid currency. The 12 Step community has no experts. Rebellion Dogs Publishing neither canonizes nor vilifies 12 Step culture. This book draws on philosophy, psychology, entertainment, art, spiritual musings, skeptical inquiry and the uncanny wisdom of the rooms. Professional and 12&12 Member reviews: Melissa D., Clinical Psychologist, California says, "I have never seen a daily devotional book written for agnostics. I found the readings to be extremely thought provoking. I wonder sometimes since there is such talk about God at meetings, what kind of turn-off that must be for agnostics. I think this book will be very helpful to both the newcomer and the mature 12 Step member." Bob K, contributor to AAagnostica.org says, "I expected his book to be good. It's WAY, WAY better than good. The book is outstanding. Two decades of not being a 'daily reflections' kind of guy, are over. Now I have reflections worth reflecting over! Buy this book or you will suffer a horrible and painful death! Well, maybe not, but you'll be missing out on something very good." Michel D. says, "AA can, and must, adapt to changing circumstances and Bill Wilson was the first one to admit it. Unfortunately, members who have come after him are more zealous than our first members. We have seen this dogmatism in history before of course, especially in religion. This is a very slippery slope. I really like the fact that these reflections are for anyone who has an open mind. It does not cater to a specific group to the exclusion of others." Denis K. says, "Many thanks for this great book; my Monday night group and I are having some great discussions related to the daily musings both at the group and often during the week over coffee.

All of us were quickly losing interest in the local meetings; Beyond Belief: Agnostic Musings for 12 Step Life gave all of us a much needed spark that has renewed our interest in the fellowship." Dr. Amy, MSW, PhD, adds, "One criticism of the 12 Step movement of course is that its dogma can be limiting-Beyond Belief seems to have addressed this. The quotes are cogent, the organization superb and the contributors are diverse." The book includes an index of over 120 topics, extensive notes and a bibliography.

**The Journey to Wholeness; Remembering and Claiming All of Who You Are** Courier Corporation

'We are indebted to Michael Szenberg's persuasive powers in eliciting the self-analyses of economists . . . For these insights, the budding economist as well as the historian of thought should be grateful.' - From the foreword by Kenneth J. Arrow

**The Bridge to the 21st Century** Westminster John Knox Press  
Kitty has been all over the world . . . see if you can find her now! From Rio to Paris, Kitty shows up in some unlikely places! These thirty puzzles will keep your tail twitching with more than 500 dots to join on each page. Find out if Kitty is stretching her legs on the Great Wall of China, passing the time in the shadows of Big Ben's clock tower, or enjoying a lazy afternoon in the sun at the Taj Mahal. Connecting the dots to find Kitty can improve concentration, increase hand-eye coordination, and will provide hours of fun for all ages.

**Critical Reflections on Discourse and Dominance** Simon and Schuster

A uniquely feminist approach to how women can break free from what society thinks and get active in their forties, fifties, and beyond. What if you could be fitter now than you were in your twenties? And what if you could achieve it while feeling more comfortable and confident in your body than ever before? In this empowering, accessible book, bloggers and professors Samantha Brennan and Tracy Isaacs offer a new approach to fitness—one that champions strength, health, and personal accomplishment over weight loss and aesthetics. They share their own experiences of getting active later in life and explore the many challenges, questions, and issues women face when seeking fitness in their forties, fifties, and beyond. Drawing from the latest research and their popular blog Fit Is a Feminist Issue, they deliver a wealth of concrete advice on everything from how to keep bones strong to what types of fitness activities give the biggest returns. Taking a feminist perspective, the authors also challenge society's default whys, whys, and hows of every aspect of getting fit to show how women can best take charge of their health—no matter what their shape, size, age, or ability.

**Brain Teasers, Games, and Activities for Hours of Fun** Reflections of Eminent Economists

"The Ultimate Resistance Guidebook." — Bustle "This book will be a light in the darkness for some, and help guide them from despair." — Booklist An all-star collection of essays about activism and hope, edited by bestselling YA author Maureen Johnson. Now, more than ever, young people are motivated to make a difference in a world they're bound to inherit. They're ready to stand up and be heard - but with much to shout about, where they do they begin? What can I do? How can I help? How I Resist is the response, and a way to start the conversation. To show readers that they are not helpless, and that anyone can be the change. A collection of essays, songs, illustrations, and interviews about activism and hope, How I Resist features an all-star group of contributors, including, John Paul Brammer, Libba Bray, Lauren Duca, Modern Family's Jesse Tyler Ferguson and his husband Justin Mikita, Alex Gino, Hebh Jamal, Malinda Lo, Dylan Marron, Hamilton star Javier Muñoz, Rosie O'Donnell, Junauda Petrus, Jodi Picoult, Jason Reynolds, Karuna Riazi, Maya Rupert, Dana Schwartz, Dan Sinker, Ali Stroker, Jonny Sun (aka @jonnyson), Sabaa Tahir, Shaina Taub, Daniel Watts, Jennifer Weiner, Jacqueline Woodson, and more, all edited and compiled by New York Times bestselling author Maureen Johnson. In How I Resist, readers will find hope and support through voices that are at turns personal, funny, irreverent, and instructive. Not just for a young adult audience, this incredibly impactful collection will appeal to readers of all ages who are feeling adrift and looking for guidance. How I Resist is the kind of book people will be discussing for years to come and a staple on bookshelves for generations.

**Motivational Interviewing with Adolescents and Young Adults, Second Edition** Sterling Publishing Company, Inc. Considered by many to be mentally retarded, a brilliant, impatient fifth-grader with cerebral palsy discovers a technological device that will allow her to speak for the first time.

**100 Experiential Learning Activities for Social Studies, Literature, and the Arts, Grades 5-12** Light and Sound Press, LLC Facilitates student engagement through active learning and

provides easy-to-use matrices linking McREL, NCTE, and NCSS standards to activities in history, economics, literature, and the arts.

**Impossible Folding Puzzles and Other Mathematical Paradoxes** Lippincott Williams & Wilkins

Thought you had it bad? In this book, you will be: Imprisoned by a sadistic logician. Challenged to raise dogs from the dead. Trapped on a burning island. And much more besides. . . Everything is at stake in this compendium of more than 150 ingenious puzzles, selected to reveal the wonderful diversity of brainteasers that have confounded and intrigued solvers for the last thousand years. You'll need to pit your wits against probability problems, wrestle with wordplay, grapple with geometry and scrabble for survival. Along the way you will discover stories of whip-smart thinkers, eccentric novelists and a poodle with allegedly supernatural powers. You will absorb fascinating and important mathematical ideas. Some solutions will rely on ingenuity, some will challenge you to spot hidden patterns, others call for extreme rationality. All will surprise, entertain and stretch your brain. Will you make it out with your puzzling pride intact?

**Algorithmic Puzzles** Picador

Giddy up! And get started on these awesome horse activities Saddle up for an activity book of over 60 pages full of coloring and games about horses for kids ages 4-8. Children can use their imaginations to bring the horse pictures to life with their favorite colors. Gallop through mazes, connect-the-dots, and more--there are interesting facts about horses for kids at every turn. Fun is waiting, so come along for a ride! This coloring book of horses for kids includes: Blue ribbon breeds--Learn about all kinds of breeds, from strong Belgian draft horses for heavy farm work to little Caspians for kids to ride. Leaping into action--See all the different jobs and activities horses can do. For instance, miniature horses can be service animals for people with disabilities! Activities galore--Jump into a variety of activities about horses for kids: mazes, dot-to-dots, word searches, spot-the-difference, and plenty of pages to color. With tons of activities about horses for kids, this book will provide hours of fun for any horse-crazy child!

**The Night Swimmers** Guilford Publications

Sam Loyd (1841-1911) was the all time greatest inventor and developer of puzzles. He is described by Martin Gardner, the author of the "Mathematical Games" column in Scientific American, as "America's greatest puzzlist and an authentic American genius". His fame is world wide and books of his puzzles have been published in Russian and many other languages. This book, Sam Loyd's Cyclopedia of 5,000 Puzzles Tricks & Conundrums with Answers, was compiled by his son and published in 1914 after his death. Although many books have been written about some of Loyd's puzzles, this remains the most complete volume of all of his puzzles. This is considered to be the most fabulous and exciting collection of puzzles ever assembled in one volume. The puzzles come with wonderful illustrations.

**I Only Walk on Water When It Rains** Oxford University Press

Do all problems have solutions? Is complexity synonymous with difficulty? This original collection of mathematical puzzles and paradoxes proves that things aren't always what they seem! Readers will discover that nothing is as easy or as difficult as it looks and that puzzles can have one, several, or no solutions. The fun-filled puzzles begin with The Tricky Hole, a challenge that involves pushing a large coin through a small hole in a sheet of paper without ripping or making any cuts in the paper. Advance to the Elastic Playing Card, in which it's possible to cut a hole into a playing card big enough for someone to climb through. Other incredible puzzles include Elephants and Castles, Trianglized Kangaroo, Honest Dice and Logic Dice, Mind-reading Powers, and dozens more. Complete solutions explain the mathematical realities behind the fantastic-sounding challenges.

**Reflections of Eminent Economists** Hachette Books

Philosopher, cultural critic, and agent provocateur Slavoj Žižek constructs a fascinating new framework to look at the forces of violence in our world. Using history, philosophy, books, movies, Lacanian psychiatry, and jokes, Slavoj Žižek examines the ways we perceive and misperceive violence. Drawing from his unique cultural vision, Žižek brings new light to the Paris riots of 2005; he questions the permissiveness of violence in philanthropy; in daring terms, he reflects on the powerful image and determination of contemporary terrorists. Violence, Žižek states, takes three forms--subjective (crime, terror), objective (racism, hate-speech, discrimination), and systemic (the catastrophic effects of economic and political systems)--and often one form of violence blunts our ability to see the others, raising complicated questions. Does the advent of capitalism and, indeed, civilization cause more violence than it prevents? Is there violence in the simple idea of "the neighbour"? And could the appropriate form of

action against violence today simply be to contemplate, to think? Beginning with these and other equally contemplative questions, Žižek discusses the inherent violence of globalization, capitalism, fundamentalism, and language, in a work that will confirm his standing as one of our most erudite and incendiary modern thinkers.

*The Untold Story of the American Women Code Breakers of World War II* Edward Elgar Publishing

This book is a captivating account of a professional mathematician's experiences conducting a math circle for preschoolers in his apartment in Moscow in the 1980s. As anyone who has taught or raised young children knows, mathematical education for little kids is a real mystery. What are they capable of? What should they learn first? How hard should they work? Should they even "work" at all? Should we push them, or just let them be? There are no correct answers to these questions, and the author deals with them in classic math-circle style: he doesn't ask and then answer a question, but shows us a problem--be it mathematical or pedagogical--and describes to us what happened. His book is a narrative about what he did, what he tried, what worked, what failed, but most important, what the kids experienced. This book does not purport to show you how to create precocious high achievers. It is just one person's story about things he tried with a half-dozen young children. Mathematicians, psychologists, educators, parents, and everybody interested in the intellectual development in young children will find this book to be an invaluable, inspiring resource. In the interest of fostering a greater awareness and appreciation of mathematics and its connections to other disciplines and

everyday life, MSRI and the AMS are publishing books in the Mathematical Circles Library series as a service to young people, their parents and teachers, and the mathematics profession.

Titles in this series are co-published with the Mathematical Sciences Research Institute (MSRI).

*Agnostic Musings for 12 Step Life* Rockridge Press

Algorithmic puzzles are puzzles involving well-defined procedures for solving problems. This book will provide an enjoyable and accessible introduction to algorithmic puzzles that will develop the reader's algorithmic thinking. The first part of this book is a tutorial on algorithm design strategies and analysis techniques. Algorithm design strategies — exhaustive search, backtracking, divide-and-conquer and a few others — are general approaches to designing step-by-step instructions for solving problems. Analysis techniques are methods for investigating such procedures to answer questions about the ultimate result of the procedure or how many steps are executed before the procedure stops. The discussion is an elementary level, with puzzle examples, and requires neither programming nor mathematics beyond a secondary school level. Thus, the tutorial provides a gentle and entertaining introduction to main ideas in high-level algorithmic problem solving. The second and main part of the book contains 150 puzzles, from centuries-old classics to newcomers often asked during job interviews at computing, engineering, and financial companies. The puzzles are divided into three groups by their difficulty levels. The first fifty puzzles in the Easier Puzzles section require only middle school mathematics. The sixty puzzle of average difficulty and forty harder puzzles require just high school mathematics plus a few topics such as binary numbers and

simple recurrences, which are reviewed in the tutorial. All the puzzles are provided with hints, detailed solutions, and brief comments. The comments deal with the puzzle origins and design or analysis techniques used in the solution. The book should be of interest to puzzle lovers, students and teachers of algorithm courses, and persons expecting to be given puzzles during job interviews.

**Out of My Mind** Harvard Business Press

The significantly revised second edition of this unique practitioner guide features 65% new material and a new organizing structure. The authors show how to use motivational interviewing (MI) to have productive conversations about behavior change with adolescents and young adults in any clinical context. Noted for its clarity, the book includes extended case examples, sample dialogues, quick-reference tables, and "dos and don'ts." It provides vital tools for helping young people open up about their struggles, explore alternatives, and make healthier choices around such concerns as substance use, smoking, anxiety, medication adherence, and obesity. New to This Edition \*More integrative and cohesive: every chapter weaves in diverse clinical issues, replacing the prior edition's population-specific chapters. \*Chapters on MI in groups and involving caregivers in treatment. \*Restructured around the current four-process model of MI, and proposes maintenance of change as a fifth process. \*Incorporates the rapidly growing research base on MI with youth. \*Reflects the ongoing refinement of the authors' training approach; includes skill-building activities at the end of each chapter. This book is in the Applications of Motivational Interviewing series, edited by Stephen Rollnick, William R. Miller, and Theresa B. Moyers.
