**The Directory of Museums & Living Displays** Routledge  
In this multi-authored book, senior practitioners and researchers offer an international overview of landscape character approaches for those working in research, policy and practice relating to landscape. Over the last three decades, European practice in landscape has moved from a narrow, if relatively straightforward, focus on natural beauty or scenery to a much broader concept of landscape character constructed through human perception, and transcending any of its individual elements. Methods, tools and techniques have been developed to give practical meaning to this idea of landscape character. The two main methods, Landscape Character Assessment (LCA) and Historic Landscape Characterisation (HLC) were applied first in the United Kingdom, but other methods are in use elsewhere in Europe, and beyond, to achieve similar ends. This book explores why different approaches exist, the extent to which disciplinary or cultural specificities in different countries affect approaches to land management and landscape planning, and highlights areas for reciprocal learning and knowledge transfer. Contributors to the book focus on examples of European countries – such as Sweden, Turkey and Portugal – that have adopted and extended UK-style landscape characterisation, but also on countries with their own distinctive approaches that have developed from different conceptual roots, as in Germany, France and the Netherlands. The collection is completed by chapters looking at landscape approaches based on non-European concepts of landscape in North America, Australia and New Zealand. This book has an introductory price of £125/\$205 which will last until 3 months after publication - after this time it will revert to £140/\$225.

**Reports from Commissioners** Policy Press

This collection of essays analyses how diversity in human identity and disadvantage affects the articulation, realisation, violation and enforcement of human rights. The question arises from the realisation that people, who are severally and severely disadvantaged because of their race, religion, gender, age, disability, sexual orientation, class etc, often find themselves at the margins of human rights; their condition seldom improved and sometimes even worsened by the rights discourse. How does one make sense of this relationship between the complexity of people's disadvantage and violation of their human rights? Does the human rights discourse, based on its universal and common values, have tools, methods or theories to capture and respond to the difference in people's lived experience of rights? Can intersectionality help in that quest? This book seeks to inaugurate this line of inquiry.

For readers of *Democracy in Chains* and *Dark Money*, a revelatory investigation of the Religious Right's rise to political power. For too long the Religious Right has masqueraded as a social movement preoccupied with a number of cultural issues, such as abortion and same-sex marriage. In her deeply reported investigation, Katherine Stewart reveals a disturbing truth: this is a political movement that seeks to gain power and to impose its vision on all of society. America's religious nationalists aren't just fighting a culture war, they are waging a political war on the norms and institutions of American democracy. Stewart pulls back the curtain on the inner workings and leading personalities of a movement that has turned religion into a tool for domination. She exposes a dense network of think tanks, advocacy groups, and pastoral organizations embedded in a rapidly expanding community of international alliances and united not by any central command but by a shared, anti-democratic vision and a common will to power. She follows the money that fuels this movement, tracing much of it to a cadre of super-wealthy, ultraconservative donors and family foundations. She shows that today's Christian nationalism is the fruit of a longstanding antidemocratic, reactionary strain of American thought that draws on some of the most troubling episodes in America's past. It forms common cause with a globe-spanning movement that seeks to destroy liberal democracy and replace it with nationalist, theocratic and autocratic forms of government around the world. Religious nationalism is far more organized and better funded than most people realize. It seeks to control all aspects of government and society. Its successes have been stunning, and its influence now extends to every aspect of American life, from the White House to state capitols, from our schools to our hospitals. *The Power Worshippers* is a brilliantly reported book of warning and a wake-up call. Stewart's probing examination demands that Christian nationalism be taken seriously as a significant threat to the American republic and our democratic freedoms.

Contemporary questions about gender challenge our views of ourselves and the proverbial other. In this meticulously researched, well-written, and illuminating guide, Vincent Gil unpacks elements involved in gender-identity conflicts and intersexuality. At the heart of the matter are real people, not just issues. Drawing on histories culled from his many years as counselor, professor, and researcher, Gil explores gender and identity, issues of conflict, and of reconciliation. He distinguishes biological and psychological elements from social issues, and addresses the current movement of gender individuation, its language idioms, and its influences on gender ideology and theology. He also provides an engaging theological discourse, filling gaps in our understanding of procreation to better inform our theology of being. The work assists Christian parents, clergy, and lay leaders by working through the tough questions. It suggests means to engage, counsel, support, and reconcile with those gender-questioning or conflicted, be they children, adolescents, or adults.

What can nurses do to support those receiving palliative care? How do you ensure clear communication and maintain patients' and families' preferences? Palliative Care Nursing is essential reading for nursing students, nurses and other health and social care professionals providing supportive and palliative care to those with advanced illness or who are towards the end of life. This third edition of the acclaimed textbook has been extensively revised and examines important research studies, key debates around care and strategies to move palliative care nursing forward. In four sections the book covers key elements of nursing practice towards the end of life: • Who is the palliative care patient? • Providing palliative nursing care • Caring around the time of death • Challenging issues in palliative care nursing. Leading authors in each of these fields address contemporary issues and explore how to provide high quality person-centred palliative care, encouraging application to practice through exercises case studies. Chapters completely reworked or new for this edition include those on communication, living with uncertainty, bereavement care, the costs of caring, nurses' decision-making and capacity, and palliative care worldwide. The clarity of evidence presented and coverage of a diverse range of topics make this the foundational textbook for all studying palliative care at pre-registration level, postgraduate level or as part of CPD study. With a foreword by last edition editor, Professor Sheila Payne, Lancaster University, UK. "I welcome this third edition of Palliative Care Nursing and congratulations to the new team who have provided us with a dynamic and innovative development of a core text for palliative nursing practice. As the largest workforce in palliative care, and given the changing face of clinical practice for nurses, including increased educational opportunity and expanding roles and responsibilities, this book is timely in its focus on critical issues which frame and scope the reality of palliative care and the nursing contribution to that discipline. The learning exercises, in particular, offer tools for

educators and clinicians to reflect on practice and understand new ways of knowing in palliative care. It will be an excellent resource for nursing, both in the UK and Ireland and to the wider international audience, having drawn on the breadth of global nursing expertise to bring this book together. Philip Larkin, Professor of Clinical Nursing (Palliative Care), University College Dublin and Our Lady's Hospice and Care Services, Dublin, Ireland; President, European Association for Palliative Care "This is a book of substance that captures the current status of palliative nursing, including the values and research evidence that underpin it. The changing nature of palliative nursing as an evidence-based specialism is balanced with practical skills and insights from experts, and also considers the needs of those working with, or concerned about, the dying person's well-being. It covers a range of challenging issues as well as drawing on the wisdom of those who actually undertake this work on a daily basis. I hope that students and practitioners from all disciplines will find this a useful resource to understand the art and craft of good palliative nursing." Professor Daniel Kelly, Fellow of the Royal College of Nursing and Royal College of Nursing Chair of Nursing Research, Cardiff University, UK

New Spaces for Climate Change Springer

This book charts the course and causes of UN, G7 and G20 governance of climate change through the crucial period of 2015–2021. It provides a careful, comprehensive and reliable description of the individual and interactive contributions of the G7, G20 and UN summits and analyses their results. The authors explain these contributions and results by considering the impacts of causal candidates, such as a changing physical ecosystem and international political system and the actions of individual leaders of the world's most systemically significant countries. They apply and improve an established, compact causal model, grounded in international relations theory, to guide these tasks. By developing, prescribing and implementing immediate, realistic actionable policy solutions to cope with the urgent, existential challenge of controlling climate change, this volume will appeal to scholars of international relations, global governance and global environmental governance.

A Collection of Case Studies Bloomsbury Publishing

In this introduction to educational policy, practice and professionalism, the authors focus first on providing an historical overview of English policy from the state's first interventions in education through to Thatcherism and the election of the Blair government. Chapters then explore the key contemporary policies of recent times and offer a critique on how they have worked in practice, with reference the hysteria that often surrounds education policy. An important theme is media representation of educational matters and the effects this has on the teaching profession. Commentaries and case studies are presented throughout providing an accessible link to what it was really like to learn, teach and live at the time the policy was in place. This new edition now includes: - an account of the measures taken by the Coalition Government of 2010-15, examining the Coalition's continuities with the previous administration whilst also exploring departures from previous thinking and practices; - updated references and case studies throughout to represent new research and legislation since the first edition; - an extended discussion of globalization and global 'policy borrowing'; - further coverage of social justice theory, including a perspective on identity theory and the role of education in the development of identity and the marginalisation of individuals and groups; - a new historical chapter covering the period 1945 to 1997; - a summary of the development of the curriculum and a critique of the 2014 National curriculum, as pioneered by Michael Gove; and - a new conclusion setting out

the trajectory of current policies and how this may affect educational practitioners. This is essential reading for all undergraduate students studying education policy and practice. Construction statistics annual, 2011 Springer

Modern English Biography (volume 1 of 4) A-H Pearson UK

Freedom of information (FOI) is now an international phenomenon with over 100 countries from Albania to Zimbabwe enacting the right to know for their citizens. Since 2005, the UK's Freedom of Information Act has opened up thousands of public bodies to unparalleled scrutiny and prompted further moves to transparency. Wherever the right to know is introduced, its success depends on the way it is implemented. In organisations worldwide, FOI only works because of those who oversee its operation on a day-to-day basis, promoting openness, processing requests and advising colleagues and the public. FOI is dependent on the FOI Officers. The Freedom of Information Officer's Handbook is a comprehensive guide to FOI and its management. It is designed to be an indispensable tool for FOI Officers and their colleagues. It includes: - a guide to the UK's FOI Act, the right to know and the exemptions - clear analysis of the most important case law and its implications for the handling of FOI requests - pointers to the best resources to help FOI officers in their work - explanations of how FOI interacts with other legislation, including detailed explorations of the Environmental Information Regulations 2004 and how the EU's General Data Protection Regulation impacts on FOI - a look at requirements to proactively publish information and the effect of copyright and re-use laws on FOI and open data - comparisons of the UK's Act with FOI legislation in other jurisdictions from Scotland to South Africa - an exploration of the role of the FOI Officer: who they are, what they do, their career development and what makes them effective - suggestions on how to embed FOI within an organisation using effective procedures, technology and training - a stage-by-stage guide to processing requests for information. The Freedom of Information Officers' Handbook includes the latest developments in FOI including amendments made to the UK's FOI Act by the Data Protection Act 2018 and the revised s.45 code of practice published by the Cabinet Office in July 2018. Charles Moore's masterful and definitive biography of Britain's first female prime minister reaches its climax with the story of her zenith and her fall. How did Margaret Thatcher change and divide Britain? How did her model of combative female leadership help shape the way we live now? How did the woman who won the Cold War and three general elections in succession find herself pushed out by her own MPs? Charles Moore's full account, based on unique access to Margaret Thatcher herself, her papers, and her closest associates, tells the story of her last period in office, her combative retirement, and the controversy that surrounded her even in death. It includes the fall of the Berlin Wall, which she had fought for, and the rise of the modern EU that she feared. It lays bare her growing quarrels with colleagues and reveals the truth about her political assassination. Moore's three-part biography of Britain's most important peacetime prime minister paints an intimate political and personal portrait of the victories and defeats, the iron will but surprising vulnerability of the woman who dominated in an age of male power. This is the full, enthralling story.

Vera Köpsel investigates the relevance of local perceptions of landscape and nature for the current topic of adaptation to climate change. She highlights the influence that differing conceptualisations of landscape among actors in environmental management have on their perspectives on climate change and adaptation. Qualitative empirical data from Cornwall (UK) constitutes a valuable foundation for an enhanced theoretical understanding of societal constructions of landscape and their implications for local negotiation processes. Using the example of coastal erosion, the author discusses how contrasting perceptions of a local landscape can significantly complicate consensus-finding around physical-material adaptation measures.

The South West Coast Path is the longest of Britain's National Trails, following the spectacular coastline for 630 miles around

the southernmost tip of England from Somerset all the way to Dorset. This updated volume features the second section of 169 miles (271 km), from Padstow in north Cornwall to Falmouth on the south coast. From the surfing mecca of Newquay and St Ives's golden beaches, it hugs the rugged clifftops round Land's End and the Lizard – as far south as it is possible to go in mainland Britain – visiting serpentine harbours and craggy coves such as Cadgwith and Porthcurno, with its dramatic open-air theatre. The Path is rich in wildlife, offering a rare chance to see the delightful red-beaked chough, as well as seals, dolphins and peregrines. From the holiday stroller to the experienced long-distance walker, this guide contains everything you need to explore one of the most spectacular and varied long-distance trails in the world. National Trail Guides are the official guidebooks to the fifteen National Trails in England and Wales and are published in association with Walk Unlimited, the official body charged with developing and maintaining the Trails.
