Taking a brass tacks approach to communication, *How to Have Confidence and Power in Dealing With People* explains how to interact with others as they really are, not as you would like them to be. The goal is to get what you want from them successfully - be it cooperation, goodwill, love or security. Les Giblin, a recognized expert in the field of human relations, has devised a method for dealing with people that can be used when relating with anyone - parents, teachers, bosses, employees, friends, acquaintances, even strangers. Giblin shows step by step how to get what you want at any time and in ways that leave you feeling good about yourself. Moreover, the people who have given you what you want wind up feeling good about themselves, too. The result? Nobody gets shortchanged. It's a win-win situation. Each chapter includes a handy summary, so there's absolutely no chance of missing the book's key points. You can also use these recaps to refresh your memory after you've finished the book. How to Speak How to Listen CreateSpace

At home, on the job, in a personal relationship, it's often not what you say but how you say it that counts. Deborah Tannen revolutionized our thinking about relationships between women and men in her #1 bestseller *You Just Don't Understand*. In *That's Not What I Meant!*, the internationally renowned sociolinguist and expert on communication demonstrates how our conversational signals—voice level, pitch and intonation, rhythm and timing, even the simple turns of phrase we choose—are powerful factors in the success or failure of any relationship. Regional speech characteristics, ethnic and class backgrounds, age, and individual personality all contribute to diverse conversational styles that can lead to frustration and misplaced blame if ignored—but provide tools to improve relationships if they are understood. At once eye-opening, astute, and vastly entertaining, Tannen's classic work on interpersonal communication will help you to hear what isn't said and to recognize how your personal conversational style meshes or clashes with others. It will give you a new understanding of communication that will enable you to make the adjustments that can save a conversation . . . or a relationship.

How can teachers effectively give religious lessons? This is the question pondered, and answered, in this Sunday School classic. A great primer on how to teach lessons on Christianity, the author seeks to show how religious virtues and principles can be taught with the use of the Socratic method. Socrates, an ancient Greek philosopher, would use long series of questions to learn, educate and

teach. This procedure can be applied to Bible teachings and the life of Christ, as Joshua G. Fitch demonstrates. This guide, concise but valuable, offers a comprehensive method of educating young people in Bible events, and aspects of Christian virtue. For years after its publication, churches in England and the USA would keep copies for reference, its methods contributing to the successful education of countless thousands of young Christians over the years.

For use in courses on language teaching methodology and teacher preparation, this book also serves as an invaluable source for courses in language curriculum development, materials development, and teaching practice. The author views effective language teaching as a network of interactions involving the curriculum, methodology, the teacher, the learner, and instructional materials (hence the metaphor of a matrix). Each chapter discusses and examines the theoretical and practical dimensions of a central issue in language teaching. Among the topics covered are curriculum development, designing instructional materials, teaching listening, speaking, reading and writing, the nature of effective teaching, self-monitoring in teacher development, and language and content. Richards presents key issues in an accessible and highly readable style, and shows how teachers and teachers-in-training can be involved in the investigation of classroom teaching and learning. The emphasis is not on prescriptions but rather on developing effective teaching through understanding the various factors that interact in second language learning and in the second language classroom.

Drawing on techniques she originally developed for Harvard and MIT, Cabane breaks charisma down into its components. Becoming more charismatic doesn't mean transforming your fundamental personality. It's about adopting a series of specific practices that fit in with the personality you already have. *The Charisma Myth* shows you how to become more influential, more persuasive, and more inspiring.
