In the early 1970s, Chrysler started working on a "magic wagon" - a completely new passenger van that would fit into a normal garage. It was a daring project for a company that was strapped for cash. This book taps the people who created the minivans, with previously unpublished photos of the original clay models. It is not just a story of a vehicle, but of the people who pushed it through the development process, brought it to life, and refreshed it in the face of intense competition. Engineers, planners, and designers started arguing over alternatives ten years before the first van left the factory. This book dives into the reasons behind their decisions, and some of the ways minivans could have been very different; it also covers electric and CNG minivans, engines and transmissions, concept cars, and the assembly plants. The paperback is generously illustrated with full-color design studies

and photos of the final product; the Kindle version has fewer photos, but still covers the original clay models and the concepts. "It's incredibly rare when the auto industry creates an entirely new class of vehicle, and rarer still when that innovation is an unqualified success story, but such was the case with Chrysler and the development of the minivan. "In Mopar Minivans, Zatz uses the people who were there to retell in vivid detail the largely forgotten story of how this innovative people mover evolved into a quintessential piece of American family life for two generations. It's a story that showcases not only how the automotive industry can work at its best, but also the ways that the industry's prevalent groupthink mentality can stifle innovation." -- Larry Vellequette, *Automotive News* "I am amazed how complete you are, having not been on-site in the front trenches during agreements, disagreements, and, yes, even skirmishes, at times." -- Chrysler employee David Zatz founded Chrysler-focused web site allpar.com; he also holds a Ph.D. in social and organizational psychology from Columbia University, and has been a business consultant for 20 years.

NATIONAL BESTSELLER • For anyone who wants to learn a foreign language, this is the method that will finally make the words stick.

"A brilliant and thoroughly modern guide to learning new languages."—Gary Marcus, cognitive psychologist and author of the New York Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Consumer Reports January-December 2003

In the haunting tradition of Joe McGinniss's *Fatal Vision* and Mikal Gilmore's *Shot in the Heart*, *True Story: Murder, Memoir, Mea Culpa* weaves a spellbinding tale of murder, love, and deceit with a deeply personal inquiry into the slippery nature of truth. The story begins in February of 2002, when a reporter in Oregon contacts New York Times Magazine writer Michael Finkel with a startling piece of news. A young, highly intelligent man named Christian Longo, on the FBI's Ten Most Wanted list for killing his

entire family, has recently been captured in Mexico, where he'd taken on a new identity—Michael Finkel of the New York Times. The next day, on page A-3 of the Times, comes another bit of troubling news: a note, written by the paper's editors, explaining that Finkel has falsified parts of an investigative article and has been fired. This unlikely confluence sets the stage for a bizarre and intense relationship. After Longo's arrest, the only journalist the accused murderer will speak with is the real Michael Finkel. And as the months until Longo's trial tick away, the two men talk for dozens of hours on the telephone, meet in the jailhouse

visiting room, and exchange nearly a thousand pages of handwritten letters. With Longo insisting he can prove his innocence, Finkel strives to uncover what really happened to Longo's family, and his quest becomes less a reporting job than a psychological cat-and-mouse game—sometimes redemptively honest, other times slyly manipulative. Finkel's pursuit pays off only at the end, when Longo, after a lifetime of deception, finally says what he wouldn't even admit in court—the whole, true story. Or so it seems.
