The Body Electric tells the fascinating story of our bioelectric selves. Robert O. Becker, a pioneer in the field of regeneration and its relationship to electrical currents in living things, challenges the established mechanistic understanding of the body. He found clues to the healing process in the long-discarded theory that electricity is vital to life. But as exciting as Becker's discoveries are, pointing to the day when human limbs, spinal cords, and organs may be regenerated after they have been damaged, equally fascinating is the story of Becker's struggle to do such original work. The Body Electric explores new pathways in our understanding of evolution, acupuncture, psychic phenomena, and healing.

Bioelectromagnetic and Subtle Energy Medicine focuses on a wide variety of evidence-based bioelectromagnetic and subtle energy therapies for disorders ranging from cancer, cardiomyopathy, and Parkinson's disease to depression, anxiety, and pain. Since publication of the first edition more than a decade ago, there have been so many advances in these and other diseases, that a thorough revision is required for this resource to remain the gold standard in a burgeoning field. This second edition updates previous topics and features many new chapters describing novel approaches that promise to replace drugs or surgery because they are more effective and much safer, such as rTMS for depression, MRI-Guided Focused Ultrasound for bone and uterine tumors, and TheraBionic LEET for liver cancer. Others discuss biological water (H<sub>2</sub>O) that acts like a battery, health benefits of Earthing, malignant and other brain tumors from cell and cordless phones, visualizing and measuring energy fields in humans and nature, making sense of homeopathy and "memory of water," basic science support for acupuncture, electrosensitivity, ion cyclotron resonance, the role of the pineal gland, the health effects of solar storms and terrestrial influences, and why Bioelectric Resonance Therapy bridges Chinese and Western medicine. This is only a sampling of

the 50 chapters contributed by authorities from the United States, Europe, Scandinavia, Russia, China, Japan, and Iran.

Using today's most leading-edge therapies and breakthroughs in the science of longevity, C. Norman Shealy, one of the pioneering holistic physicians of our time, shows how we can healthfully age to one hundred, and beyond. The idea of living well beyond one hundred years-and enjoying those years in good health-used to be the stuff of science fiction. No longer. C. Norman Shealy, M.D., Ph.D., whom Caroline Myss calls a "wizard-genius-scientist-mystic-physician," offers Life Beyond 100: Secrets of the Fountain of Youth. In this deeply learned and revolutionary book, Dr. Shealy provides a new concept of longevity, one that reveals that we can live far longer than current science suggests. Basic healthy living and the use of alternative therapies have long been touted as "the way" to well-being, but Dr. Shealy takes these tenets a step further. From the physiology of stress and its effect on the human mind and body to the importance of DHEA; from the proven techniques of photostimulation and biofeedback training to groundbreaking suggestions for alleviating depression; from Shealy's electromagnetic framework of life to his recommendations for optimal health, Life Beyond 100 presents a detailed roadmap to achieve healthy aging-or "youthing." The result of years of clinical practice and cutting-edge research, Life Beyond 100 also exposes the fallacies behind many of the claims made by the medical establishment and the pharmaceutical industry. Shealy argues that rather than increasing people's life expectancy, these two groups create the opposite effect, consigning hundreds of thousands of people to an often

miserable and premature old age by treating symptoms with an antidote-prescription medicine-that is often worse than the ailment itself. As a counterpoint, Life Beyond 100 provides the most ambitious- yet medically grounded and commonsensical-longevity program available. Easy to follow and supported by advanced research, Dr. Shealy's guide to uncovering the secrets of youthful aging redefines the concept of human longevity and offers a new vision of healthy living to one hundred and beyond.

Annotation The study of the effects of electromagnetic fields on biological systems has been recently called bioelectromagnetics (BEMs). Though electromagnetic fields have sometimes been associated with potential for harm to the body, there are many BEM instruments and devices re-emerging in the 21st century, based on high voltage Tesla coils, that apparently bring beneficial health improvements to human organisms. The Tesla coil class of therapy devices constitute pulsed electromagnetic fields (PEMF) that deliver broadband, wide spectrum, nonthermal photons and electrons deep into biological tissue. Electromedicine or electromagnetic medicine are the terms applied to such developments in the ELF, RF, IR, visible or UV band. With short term, non-contacting exposures of several minutes at a time, such high voltage Tesla PEMF devices may represent the ideal, noninvasive therapy of the future, accompanied by a surprising lack of harmful side effects. A biophysical rationale for the benefits of BEM healing a wide variety of illnesses including cancer, proposes a correlation between a bioelectromagnetically restored transmembrane potential, and the electron transport

across cell membranes by electroporation, with normal cell metabolism and immune system enhancement. The century-long historical record of these devices is also traced, revealing highly questionable behavior from the medical and public health institutions toward such remarkable innovations. This book also reviews the highlights of several BEM inventions but does not present an exhaustive nor comprehensive review of bioelectromagnetic healing devices. It should not be construed as an attempt to prescribe or recommend treatment of any kind. This report is simply designed to provide referenced information on an energy science that is almost impossible to learn about otherwise. Patients should seek medical advice from a qualified medical practitioner at all times.

#### Suppression and Manipulation in American Medicine

It is now well established that all living systems emit a weak but permanent photon flux in the visible and ultraviolet range. This biophoton emission is correlated with many, if not all, biological and physiological functions. There are indications of a hitherto-overlooked information channel within the living system. Biophotons may trigger chemical reactivity in cells, growth control, differentiation and intercellular communication, i.e. biological rhythms. The basic experimental and theoretical framework, the technical problems and the wide field of applications in the food industry, medicine, pharmacology, environmental science and basic sciences are presented in this book, which also includes the rapidly growing literature. This book is written by the most outstanding international scientists familiar with this topic who have been working in this field for many years.

### The Conquest of Cancer

This is the original book published in 1985 on the pioneering work of Dr. Virginia Livingston-Wheeler. It is being republished to make it widely available to the general public. Quotes from the original book: "Dr. Virginia Livingston-Wheeler is one of the great, unsung scientists of present day medicine. When her discovery of the 'cancer microbe' becomes... accepted, she will undoubtedly be known as the Pasteur of this century." Alan R. Cantwell, Jr. M.D. "Dr. Virginia has long been pioneering in new concepts of cancer cause and treatment... the many successes she has had in treating advanced cancer patients demonstrate what can be

accomplished when a physician in cooperation with understanding patients tries to expand the limits of cancer treatment." Ray G. Crispen, Ph.D "This important book could very well save your life or the life of someone you love. Dr. Virginia Livingston-Wheeler has succeeded in devising a scientifically rational program for the prevention and treatment of cancer." Richard A. Kunin, M.D.
