This book provides the foundations for understanding hardware security and trust, which have become major concerns for national security over the past decade. Coverage includes issues related to security and trust in a variety of electronic devices and systems related to the security of hardware, firmware and software, spanning system applications, online transactions and networking services. This serves as an invaluable reference to the state-of-the-art research that is of critical significance to the security of and trust in, modern society’s microelectronic-supported infrastructures.

O patrie noua si un neam mare este un manual pentru analiza textelor narative din Geneza, mai ales cele din capitolele 12–26, adica cele privitoare la biografia biblica a patriarhului Avraam. Cercetarea cartii Geneza, ce cunoaste o bogata istorie intinsa pe milenii, este trecuta in revista in primele doua capitole ale cartii. Cu o asemenea mostenire, este natural ca metoda prezentata aici sa fie una eclectica. In ea se regasesc: critica textuala, critica formei, critica literara – dintre metodele clasice –, analiza discursului si pragmatica – dintre cele de data mai recenta. Textele narative sunt analizate nu numai pentru a intelege dinamica relatiei dintre personaje si intriga actiunii in contextul istoric specific, ci si pentru a extrage principiile teologice si moralizatoare impartasite de personaje si de autorii textelor sacre. Silviu Tatu este profesor universitar si pastor. Printre publicatiile sale cu interes pentru publicul larg se numara: Dumnezeu a vorbit in vechime prin profeti, Leul din Sion, Revendicarea mostenirii si Domnul imparateste. In calitate de specialist in limba ebraica si Vechiul Testament, a tradus si editat lucrari de specialitate si a lucrat in colective de traducere a Bibliei ebraice in limba romana si de revizuire a traducerii lui D. Cornilescu. Istoria exegezei poate fi apreciata mai bine atunci cand sunt sesizate legaturile sale cu celelalte discipline, mai ales cu filosofia. Constatarea ca intre filosofie si retorica a existat o interactiune reciproca este mai mult decat naturala, din moment ce interpretarea textelor si coagularea unui sistem coerent de convingeri sunt etape absolut normale ale procesului intelectual de raportare a mintii la cunoastere. Drept urmare, s-au conturat cateva tendinte exegetice – studii de natura filologica, alegorica sau teologica – variind in complexitate in functie de nivelul tehnicilor seculare curente si de competenta autorilor in cauza. Fara a ridica pretentii de exhaustivitate, vom cauta sa ilustram dezvoltarea acestor tehnici, prin studiul unor cazuri concrete din perioada anterioara sec. al XVIII-lea, cand, odata cu aparitia criticii istorice, tehnicile exegetice se diversifica. Intrebari de studiu Bibliografie Indice de referinte biblice Indice de nume proprii O patrie nouă și un neam mare nu este un simplu comentariu la cartea Geneza, menit să ne intermedieze înțelesul acestei cărți biblice într-un mod mai mult sau mai puțin obiectiv, ci este mai degrabă un manual prin intermediul căruia colegul nostru, pastor prof. univ. dr. abil. Silviu Tatu, le pune la dispoziția tuturor celor interesați de studiul cărții Geneza o „nealță” exegetică adecvată, utilă pentru descoperirea sensului intenționat de autorul biblic inspirat de Duhul Sfânt. O exegeză corectă a cărților biblice implică metode adecvate, care să nu neglijeze nici contextul istoric în care au fost scrise acestea, nici specificul lor literar. Doar așa le putem pătrunde și articula mesajul teologic, mesaj ce trebuie aplicat zi de zi în viața noastră. O recomand tuturor celor care doresc să se echipeze cu uneltele necesare în arta exegetică; cu ajutorul acestora, textul biblic al Genezei le va deveni tot mai apropiat, iar ei vor reuși să identifice corect mesajul teologic, ca apoi să îl transpună, în mod adecvat, în viața de zi cu zi. —Lector univ. dr. The ten-volume set LNCS 12949 – 12958 constitutes the proceedings of the 21st International Conference on Computational Science and Its Applications, ICCSA 2021, which was held in Cagliari, Italy, during September 13 – 16, 2021. The event was organized in a hybrid mode due to the

Covid-19 pandemic.The 466 full and 18 short papers presented in these proceedings were carefully reviewed and selected from 1588 submissions. The books cover such topics as multicore architectures, blockchain, mobile and wireless security, sensor networks, open source software, collaborative and social computing systems and tools, cryptography, applied mathematics human computer interaction, software design engineering, and others. Part IX of the set includes the proceedings of the following events: 13th International Symposium on Software Engineering Processes and Applications (SEPA 2021); International Workshop on Sustainability Performance Assessment: models, approaches and applications toward interdisciplinary and integrated solutions (SPA 2021).

This new and expanded monograph improves upon Mohan's earlier book, Residue Number Systems (Springer, 2002) with a state of the art treatment of the subject. Replete with detailed illustrations and helpful examples, this book covers a host of cutting edge topics such as the core function, the quotient function, new Chinese Remainder theorems, and large integer operations. It also features many significant applications to practical communication systems and cryptography such as FIR filters and elliptic curve cryptography. Starting with a comprehensive introduction to the basics and leading up to current research trends that are not yet widely distributed in other publications, this book will be of interest to both researchers and students alike.

Edie Falco, Sheryl Crow, Athena Jones, and other breast cancer survivors and “previvors” tell their powerful, inspiring stories in this collection. Drawing from first-hand interviews of successful, high-profile women from myriad industries and perspectives, award-winning journalist Ali Rogin brings together an all-star support and recovery team to inspire anyone confronting a cancer diagnosis, along with their loved ones. Learn how preeminent actresses, musicians, politicians, journalists, and entrepreneurs faced a formidable disease and put it in its place. In their own words, the women of Beat Breast Cancer Like a Boss inform and encourage other women by sharing their experiences and advice. Learn how they told loved ones about their diagnoses, navigated treatment options, and managed the work/life/cancer balance. Rogin, too, faced great uncertainty when she tested positively for the BRCA1 genetic mutation at age twenty. She found answers in the vibrant community of breast cancer survivors and “previvors” who also stared down the odds. With her brave decision to undergo a prophylactic bilateral mastectomy before even graduating college, Rogin joined this diverse sisterhood of women confronting breast cancer in its many forms with dignity, strength, and humor.

The International Conference on Signals, Systems and Automation (ICSSA 2011) aims to spread awareness in the research and academic community regarding cutting-edge technological advancements revolutionizing the world. The main emphasis of this conference is on dissemination of information, experience, and research results on the current topics of interest through in-depth discussions and participation of researchers from all over the world. The objective is to provide a platform to scientists, research scholars, and industrialists for interacting and exchanging ideas in

a number of research areas. This will facilitate communication among researchers in different fields of Electronics and Communication Engineering. The International Conference on Intelligent System and Data Processing (ICISD 2011) is organized to address various issues that will foster the creation of intelligent solutions in the future. The primary goal of the conference is to bring together worldwide leading researchers, developers, practitioners, and educators interested in advancing the state of the art in computational intelligence and data processing for exchanging knowledge that encompasses a broad range of disciplines among various distinct communities. Another goal is to promote scientific information interchange between researchers, developers, engineers, students, and practitioners working in India and abroad.

In this book the reader will find a collection of chapters authored/co-authored by a large number of experts around the world, covering the broad field of digital signal processing. This book intends to provide highlights of the current research in the digital signal processing area, showing the recent advances in this field. This work is mainly destined to researchers in the digital signal processing and related areas but it is also accessible to anyone with a scientific background desiring to have an up-to-date overview of this domain. Each chapter is self-contained and can be read independently of the others. These nineteenth chapters present methodological advances and recent applications of digital signal processing in various domains as communications, filtering, medicine, astronomy, and image processing.

Mekhilta De-Rabbi Shimon Bar Yo (Edward E. Elson Classic) Springer Nature

The Mekhilta de-Rabbi Shimon bar Yohai is a collection of classical midrashic interpretation of the biblical Book of Exodus. Lost for centuries, the text was reconstructed and recovered in the 19th and 20th centuries by both German and Israeli scholars from a variety of source materials, including medieval manuscripts of the text and midrashic anthologies. As one of the first collections of rabbinic biblical interpretation, the Mekhilta de-Rabbi Shimon bar Yohai is an indispensable source for understanding the history, beliefs, and practices of the earliest rabbis. This edition, translated and explicated for the first time in English by W. David Nelson, is The Jewish Publication Society's latest contribution to making ancient Jewish literature accessible to modern readers. A critical introduction provides the reader with a firm grounding in the historical setting of the text, as well as its source material, reconstruction, subject matter, and significance for understanding the history of Judaism. Set in a modern, readable typeface, the Hebrew text faces the English translation with the author's annotation beneath. Indexes include scriptural verse citations and rabbinic sages named in the text.

In the last few decades, natural fibers have received growing attention as an alternative to the synthetic fibers used in the reinforcement of polymeric composites, thanks to their specific properties, low price, health advantages, renewability, and recyclability. Furthermore, natural fibers have a CO<sub>2</sub>-neutral life cycle, in contrast to their synthetic counterparts. As is widely known, natural fibers also possess some drawbacks, e.g., a hydrophilic nature, low and variable mechanical properties, poor adhesion to polymeric matrices, high susceptibility to moisture absorption, low aging resistance, etc. This implies that their applications are limited to non-structural interior products. To overcome this problem, the hybridization of natural fibers with synthetic ones (i.e., glass, carbon, and basalt) or different natural fibers can be a solution. For this reason, extensive research concerning natural-synthetic and natural-natural hybrid composites has been done in the last years. In this context, this book aims to collect some interesting papers concerning the use of natural fibers together with synthetic ones with the aim of obtaining hybrid structures with good compromise between high properties (e.g., mechanical performances, thermal behavior, aging tolerance in humid or aggressive environments, and so on) and environment care.

The Global Conference on Artificial Intelligence and Applications (GCAIA 2021) provides a prominent venue for researchers, engineers, entrepreneurs, and scholar students to share their research ideas in the area of AI. Academic researchers would reveal the results and conclusions of laboratory based investigations via the GCAIA 21 platform, which bridges the gap between academia, industry, and government ethics. The GCAIA 21 platform will also bring together regional and worldwide issues to explore current advancements in contemporary Computation Intelligence. This Conference Proceedings volume contains the written versions of most of the contributions presented during the conference of GCAIA 2021. The conference has provided an excellent chance for researchers from diverse locations to present and debate their work in the field of artificial intelligence and its applications. It includes a selection of 62 papers. All accepted papers were subjected to strict peer-review by 2–4 expert referees. The papers have been selected for this volume because of their quality and their relevance to the theme of the conference.
