As the number of older patients surge, so too will the medication management challenges pharmacists and other healthcare providers face with this population. Providing care for these often complex cases means not only staying on top of new medications and therapies, but dealing with a wide range of other issues as well. Now in its second edition, *Fundamentals of Geriatric Pharmacotherapy*, by Lisa C. Hutchison and Rebecca B. Sleeper, offers the full support you need to provide the most effective medication management and therapeutic decisions. This text is unique, not only as a comprehensive overview of major issues in geriatric pharmacotherapy and a core textbook for students, but as a resource for all healthcare professionals who treat elderly patients. Covering all major topics and issues, the second edition provides the most current information and proven strategies in one comprehensive guide, including associated issues that impact therapy, such as the coordination of care across multiple venues and caregivers. Inside this edition, you will find: Summarized treatment guidelines Evidence-based reviews Recommendations for the frail elderly Case studies and clinical pearls Key points, terms, and definitions Self-assessment questions Extensively referenced New chapters on Palliative and Hospice Care and Infections and Antimicrobial Stewardship The demands of an aging population mean that a greater understanding of geriatric pharmacotherapy is now essential for all healthcare providers. Written by practicing geriatric specialists, *Fundamentals of Geriatric Pharmacotherapy* provides all the detailed information and practical guidance you need.

Evidence-based Medicine CRC Press

Now in its fourth edition, this best-selling book is fully updated to address the ever increasing demands on healthcare professionals to deliver high-quality patient care. A multitude of factors impinge on healthcare delivery today, including an ageing population, more sophisticated medicines, high patient expectation and changing health service infrastructure. Time demands on primary care doctors have caused other models of service delivery to be adopted across the world, leading to ongoing changes in the traditional boundaries of care between doctors, nurses, and pharmacists. Certain medical tasks are now being performed by nurses and pharmacists, for example prescribing. Healthcare policies to encourage patients to manage their own health have led to more medicines becoming available over the counter, allowing community pharmacists to manage and treat a wide range of conditions. Further deregulation of medicines to treat acute illness from different therapeutic areas seems likely. Government policy now encourages chronic disease management as a self-care activity, and could well be the largest area for future growth of reclassification of medicines. Pharmacists, now more than ever before, need to be able to recognise the signs and symptoms, and use an evidence-based approach to treatment. Community Pharmacy is intended for all non-medical prescribers but especially for pharmacists, from undergraduate students to experienced practitioners. Key features - Guidance for arriving at a differential diagnosis - Practical prescribing tips - Trigger points for referral boxes - Other hints and tips boxes - Specific questions to ask boxes - Case studies - Self-assessment questions Consistent approach gives: - Anatomy overview - History taking and physical examination - Prevalence and epidemiology - Aetiology - Arriving at a differential diagnosis - Clinical features - Conditions to eliminate Likely causes Unlikely causes Very unlikely causes - Evidence base for OTC medicine - Practical prescribing and product selection - More on the examination of eyes, ears and mouth - New sections on future-proofing (vaccinations etc.) - New material covering inter-professional education for clinical skills. Now with a free accompanying e-book on StudentConsult which also gives additional material on: - evidence-based medicine - videos on physical examination - additional written case studies - more multiple-choice questions

Pharmaceuticals for Advanced Practice Lippincott Williams & Wilkins

Quality Assurance of Aseptic Preparation Services Standards Handbook (also known as the Yellow Guide) provides standards for unlicensed aseptic preparation in the UK, as well as practical information to aid implementation of the standards. The handbook delivers essential standards in a practical way and in a format that will be useful for pharmacy management, staff working in aseptic preparation units and those whose role it is to audit the services. The accompanying support resources help with understanding the complexities of relevant topics including microbiology, radiopharmaceuticals, advanced therapy medicinal products, technical (quality) agreements and capacity planning. All the standards have been revised and updated for this 5th edition. The text is produced on behalf of the Royal Pharmaceutical Society (RPS) and the NHS Pharmaceutical Quality Assurance Committee. New in this edition: Replaces the 4th edition standards and forms the basis for an ongoing audit program in the NHS Many new and revised standards Greater emphasis on Pharmaceutical Quality Systems; the responsibilities of pharmacy management, Chief Pharmacists (or equivalent), has been expanded in line with developments in Good Manufacturing Practice Reformatted into 2 parts: standards and support resources. This is a new collaboration between the RPS and NHS. Since the previous edition the RPS has become the professional body for pharmacists and pharmaceutical scientists. RPS launched these standards as part of a library of professional standards and a programme of work to create standards for all areas of pharmacy. The Handbook is essential for pharmacists, hospital pharmacy management and technical services teams, and auditors of unlicensed NHS hospital pharmacy aseptic preparation services in the UK, pharmacists and regulators. The text is used to inform standards used in several other countries.
