11+ Vocabulary Cartoons

To improve your memory you must increase the number and variety of your mental associations. When you learn new words, make sure you learn them in a context. It is far easier to remember a picture than an abstract concept. So the trick to remember an abstract

word, is to turn it into a picture. And..... It is much easier to picture a sentence rather than picture a word in isolation. When you create the picture, make sure it meets one or more of the following criteria so that it 'sticks'. **OUT OF PROPORTION** - In all your images, try to distort size and shape. You can imagine things much larger than their normal size or conversely, microscopically small. **SUBSTITUTION** - You could visualise footballers kicking a television

around a football pitch instead of a football, or pens growing on a tree instead of leaves. Substituting an out of place item in an image increases the probability of recall. **EXAGGERATION** - Try to picture a very large quantity in your images. **MOVEMENT** - Any movement or action is always easy to remember. **HUMOUR** - The funnier, more absurd and zany you can make your images, the more memorable they will be. Applying multiple combination of these five

principles when forming your images will help make your mental associations truly outstanding and memorable. At first, you may find that you need to consciously apply one or more of the five principles in order to make your pictures sufficiently ludicrous. After a little practice however, you should find that applying the principles becomes an automatic and natural process. Some UNIQUE features of this book; -All the hard work done for you. Over 200 words

converted into pictures utilizing the concepts above! -Focus on words likely to appear in the 11 plus Exam - Synonyms/Antonyms and sentences for EACH word - Over 1500 high frequency 11+ words in total!

11+ Vocabulary: 1400 words testing Synonyms/ Antonyms/ Homophones/ Homographs/ Idioms/ Cloze In 10 minute Verbal Reasoning tests This book tests over 1400 words that frequently appear in the 11 plus exam, both CEM as well as GL and Independent schools exams. Apart from testing Synonyms, Antonyms, Word Usage, Odd one out and cloze, this book also

tests Homonyms and Idioms which have been seen to occasionally appear in certain 11 plus tests. There are 43 sets containing 34 questions each. Each set should be done in 10 minutes. Try to set aside a period of 30-60 minutes each day and do one or two tests. Short periods of regular study are more effective than long irregular sessions. Make a note of the questions you get wrong, and revise them with the help of the answers and Explanations given at the end of this

book. At the end of each test, blank space is provided for you to write down the words you do not know, enabling easier revision.

The proposed book on child second language (L2) development and assessment will be a state-of-the-art account of what we currently know about how children learn L2s in formal contexts and how that knowledge impacts on the design,

development, and evaluation of language assessment products for young learners. The uniqueness of child L2 development within the classroom is highlighted by considering children's L2 needs, typical patterns of development, and the role of instruction and assessment in how children learn. Common issues shared in child L2 acquisition studies, language testing and educational assessment are explored by linking research carried out within the educational,

academic and testing communities. Several case studies are described from different educational contexts around the world where teaching and assessment of young language learners takes place. In particular, the book presents the Cambridge English approach to assessing young learners of English and presents a framework for the development, research and validation activities around the Cambridge English suite battery for children.
