“If I Was You I Wouldn’t
Be Startin From Here”

This is the story of a

working class boy born before the last war and tells the story of his life. His early life living in Ireland and the tumultuous times in Ireland before and after the war. The astonishing events of his Mother's death and the turmoil that ensued. The quaint and different attitude of the culture of youth at that time. His struggle to understand himself and the world. He tells of his experience in the RAF and his emergence into the Trade Union movement after University and he tries to show that in some way he had enjoyed an immensity of good luck which as his story unfolds has a certain rhythm which he is sure has order and cohesion. He demonstrates this with humour and irony. This

is his story. Time Warps Creativity in Education Ashis Nandy, one of India's foremost public intellectuals, contends in this book that India's political and cultural élites have been trying to impose a secular ideology on their country. This ideology makes little sense to most Indians, who have their own religious and cultural lives, their own diverse pasts, and their own principles of tolerance and hospitality. Religious extremists have exploited this tension by offering packaged forms of ancient faiths, with ready-made theories of violence and hatred. The resulting clash has fragmented Indians' views of their precolonial past as well as their increasingly

globalized present. In a country with deep roots in legendary pasts, some of these pasts have been made “silent” or “evasive” in the service of modern ideological agendas. They are no longer as easily drawn upon to oppose the forces of intolerance and hatred. Most of the essays survey the ways in which India's colonial secularism has produced some of the conditions for the current rise of Hindu nationalism. He shows how both religious nationalists and secular modernists have employed the colonial state's ideology-producing power to blend the “religious” and “secular” domains. In the process, the indigenous traditions battling sectarianism

and religious extremism have been marginalized. Nandy argues that it is possible to reclaim India's rich, multicultural pasts and alternative forms of cosmopolitanism in order to rescue a truly multicultural present. *Creativity in Education* Rutgers University Press

story unfolds in the

Genie, his real

second volume, looks

at conscientious

behaviour under the

pressures of

expediency in an idealized version of the main events, from the intervention of Genie onward when active conscience turns a loser into a winner. The story moves out of personal contexts and gradually includes other 'actors' beside the main protagonists, now Dr. Mir and his Genie. The question is to what extent is conscientious psychology private, as contrasted with collective or public behaviour. The question of whether there are any rules or laws of conscientious behaviour is dealt with. *Theatre and the Politics of Culture in Contemporary Singapore* Wadsworth Publishing Company This is a story that had to be told, a book that had to be written. For it

is the description of a man's life lived simply, without glory, uncomplicated, and based solely on the principles of love for family, honesty, and knowing right from wrong. It is the story of my father's life, beginning with his death, and then looking back on what were the most extraordinary and cherished childhood memories of living with him. My father was a strong, fun-loving man with a great sense of humour and fun. He was born in a time of great depression in Northwest England in the late 1920s. His father worked dockside in the port of Liverpool, pulling horses and traps that transported coal and food stuff all over the county of Lancashire, and was

similarly a man who enjoyed life and watching their beloved Liverpool FC playing at Anfield on Saturday afternoons. My dad only ever loved one woman, Marjorie, a Scouse lass of strong Irish heritage. Together they rode the highs and lows of marriage for nearly sixty years. Four children, eleven grandchildren, and six great grandchildren are the testament to a marriage that he and she made work. The lessons he taught me as a boy have helped me to become the man I am today. The guidance he gave me as a teenager enabled me to become the father I have become. And for all this, I thank the Most Extraordinary Ordinary Man who ever lived, and hereby present My Dad's

Story.

At a time when Cotton was no longer King and the mills remained idle, the Etherow-O'Donnell and Akroyd families, together with their friends, find themselves battling against a new enemy – a lack of work and widespread starvation. Famine stalked the land in the North West of England, as the forces of the Confederacy and the Union battled it out in a war between Americans – brother against brother – sister against sister. The outcome of the Civil War would determine the future of the United States – whether democracy and liberty

would triumph, or a new Confederate States of America emerge – a separate country with a distinct form of government based on chattel-slavery and despotism. Just as Americans found themselves divided, so too did the antagonistic classes in the cotton-manufacturing region of England. Once again the author skilfully weaves his weft of fiction into the warp of historical reality. An exciting read from start to finish.

As the pace of change has grown more rapid, an emphasis on survival and short-term thinking has increasingly pervaded the realm of leadership and political decision-making. In a bold response to this problem, the Israeli Knesset established the Commission for

Future Generations and appointed the former judge, Shlomo Shoham, as head of the Commission in 2001. Shoham was tasked with the difficult work of representing the needs, interests and rights of those not yet born. Drawing upon his legal and political experience, Shoham today demonstrates how we can overcome the pitfalls of short-term thinking by developing our "future intelligence." This kind of intelligence, he argues, is the key to infusing public administration with visionary thinking and creative foresight.

Endorsements: From Shimon Peres, President of the State of Israel In his book *Future Intelligence*, Judge (ret.) Shlomo Shoham provides a

practical model on how to enhance sustainability in government and policy-defining bodies to serve the future of mankind and nature in a changing planet. *Future Intelligence* turns to the decision-makers of today to break away from the conservative outlook and adopt a long-term vision for posterity. From Horst Köhler, former President of the Federal Republic of Germany Shlomo Shoham presented the work of the Commission for Future Generations at the First Forum on Demographic Change of the former German President in 2005. For President Horst Köhler and other participants, Shoham's conceptual contributions proved immensely valuable in

helping lay out new means of dealing with the fundamental challenges facing all countries, including Germany.

How can dystopian futures help provide the motivation to change the ways we operate day to day? *Futures Beyond Dystopia* takes the view that the dominant trends in the world suggest a long-term decline into unliveable Dystopian futures. The human prospect is therefore very challenging, yet the perception of dangers and dysfunctions is the first step towards dealing with them. The motivation to avoid future dangers is matched by the human need to create plans

and move forward. These twin motivations can be very powerful and help to stimulate the fields of Futures Studies and Applied Foresight. This analysis of current Futures practice is split into six sections: * The Case Against Hegemony * Expanding and Deepening a Futures Frame * Futures Studies and the Integral Agenda * Social Learning through Applied Foresight * Strategies and Outlooks * The Dialectic of Foresight and Experience. This fascinating book will stimulate anyone involved in Futures work around the world and will challenge practitioners and others to re-examine many of their assumptions, methodologies and

practices.

Outrageous Fortune

Sometimes the events of life can leave us resigned to feeling trapped within a seemingly inescapable maze of intolerable suffering. A constant struggle with challenges can be a sign of living from the ego. The good news is that there are ways to transform an attitude from ego limitation to one of infinite possibilities and abundance. In a guide to improving the whole self, Geoff Keall interweaves personal stories inspired by his family's recovery from generational childhood sexual assault with practical wisdom to guide others through a simple formula that encourages a change in perspective to

escape limiting views and constant mental chatter and move toward greater self-awareness in all areas of life. Through his insight and tips, others will learn how to: • overcome early misunderstandings to eliminate anxiety, fears, and frustration; • quiet self-defeating mind chatter; • create abundance from thoughts; and • live in a state of grace and calm. The Semantics of i AM shares personal anecdotes, tips, and revelations that reveal a different way of thinking that leads to inner peace and a better view of what it means to be alive.

With All Your Mind makes a compelling case for the value of thinking deeply about education in America from a historically orthodox and broadly ecumenical Christian point of view. Few people dispute that education in America is in a state of crisis. But not many have posed workable solutions to this serious problem. Michael Peterson contends that thinking philosophically about education is our only hope for meaningful progress. In this refreshing book, he invites all who are concerned about education in America to "participate" in his study, which analyzes

representative theories and practical strategies that reveal the power of Christian ideas in this vital area.

Peterson addresses the most fundamental questions facing educators, and society in general, such as: What is the purpose of education? What goals do new techniques and methods serve? What kind of person is our educational system supposed to produce? He also explores questions of unique importance to Christians, such as: What is the relation between Christianity and the pursuit of intellectual excellence? How can Christians bring their faith to bear on all areas of knowledge? Can educated Christians significantly influence culture? With All Your

Mind examines the key assumptions and implications of influential classical and contemporary philosophies with respect to education, including idealism, naturalism, Thomism, experimentalism, existentialism, linguistic analysis, and postmodernism. Based on this analysis, Peterson develops an unapologetically Christian philosophy of education in regard to curriculum design, instilling ethics and values, and the nature of teaching and learning. Peterson further advances the merits of an ecumenical Christian philosophy of education by showing how it can be used to analyze key issues in educational theory, such as the relation of

general education to liberal learning, the integration of faith and learning, and the demand for professional and technical training. From a practical standpoint, Peterson's approach brings balance and common sense to issues such as the clash between public and private education, the rise of multiculturalism, the changing demographic and psychological profile of America's youth, and the impact of computer and Internet technology. *With All Your Mind* concludes with a stirring vision for education that is embedded in an all-encompassing Christian view of life. Using clear, jargon-free language, Peterson teaches a good deal of

basic philosophy while developing a powerful argument for the value of liberal arts education interacting with Christian faith at all levels of schooling. A New Social Contract for Education Strategic Book Publishing & Rights Agency
