"[A] beguiling memoir of family and culture."—O, The Oprah Magazine In a story that travels beyond borders and between families, acclaimed Dominican novelist and poet Julia Alvarez reflects on the joys and burdens of love—for her parents, for her husband, and for a young Haitian boy known as Piti. In this intimate true account of a promise kept, Alvarez takes us on a journey into experiences that challenge our way of thinking about history and how it can be reimagined when people from two countries—traditional enemies and strangers—become friends. Julia Alvarez's new novel, *Afterlife*, is available now.

Nuclear reactor systems Motorbooks

Since the 1990's, researchers, practitioners and public administrations have given more thought to urban logistics. However, their interests and goals are not the same, and several approaches do not produce efficient logistics systems as a result. This book aims to provide both a conceptual framework for urban logistics planning and management and to create a basis for deploying solutions that aim to reduce the main nuisances related to urban goods. The proposed book is divided in two parts. The first proposes a set of methodological chapters, written by key authors, which aim to support decision makers in their current choices related to urban logistics. In addition to public authorities' aims and goals, the book highlights the importance of private actors, and shows how supply chain management can deal with the problems of the last urban mile and its integration in global logistics chains. The second presents several applied research works that deal with current planning and practice issues in urban logistics, such as the role of city planning, the place of night deliveries in carrier organization, the limits of logistics pooling, and the real estate market, among others. The book was written by key authors, all having considerable research experience and recognised as experts in their respective fields. Each chapter presents methods and results of research works, written for a broad audience, and more precisely directed to both academics and practitioners.

Original Citroen DS Algonquin Books

There are profound, extensive, and surprising universals in literature, which are bound up with universals in emotion. Hogan maintains that debates over the cultural specificity of emotion are

misdirected because they have ignored a vast body of data that bear directly on the way different cultures imagine and experience emotion - literature. This is the first empirically and cognitively based discussion of narrative universals. Professor Hogan argues that, to a remarkable degree, the stories people admire in different cultures follow a limited number of patterns and that these patterns are determined by cross-culturally constant ideas about emotion. In formulating his argument, Professor Hogan draws on his extensive reading in world literature, experimental research treating emotion and emotion concepts, and methodological principles from the contemporary linguistics and the philosophy of science. He concludes with a discussion of the relations among narrative, emotion concepts, and the biological and social components of emotion.

Kashmir in Conflict Haynes Publishing

The Citroen DS launched in 1955 and continued for 20 years. It remains highly collectible and desirable for enthusiasts of European auto. As with all of our Original titles, this book aims to guide collectors, restorers, and enthusiasts through the various production changes between model years to make sure their restoration or prospective purchase is correct, original, and legitimate. With thorough text and detailed photography, every part of the car is cataloged.

Sustainable Urban Logistics: Concepts, Methods and Information Systems EDP Sciences

Ce livre aborde l'historique du développement scientifique des différents réacteurs nucléaires. This book introduces scientific and historical developments of nuclear reactors systems.

Hypereides Cambridge University Press

This volume presents the basics about emulsifiers as well as practical advice about their uses in products from baked goods to dressings and sauces. To make technical topics accessible to a broader audience, *Emulsifiers* provides easy-to-use tables and illustrations, as well as definitions of key terms. The broad scope encompasses emulsions and foams, molecular organization and structure of food emulsifiers, milk and dairy emulsions, and beverages.

The Mind and its Stories Oxford University Press, USA

With its highly readable text and stunning illustrations, this masterpiece of a book tells the story of the creation, evolution and exploitation of the V12 engine. From the big American V12s of the early 1900s to today's Aston Martin Vanquish V12, these glorious engines have been revered as more than just feats of engineering; in many cases they are respected as works of art. Here is an insightful, analytical and technical history of the V12 engines that have powered some of the most exciting and dramatic cars ever built for road or track.

The British Library General Catalogue of Printed Books 1976 to 1982 Springer Science & Business Media

Professor Whitehead has provided a new translation of the five surviving forensic speeches of the Athenian lawyer-politician Hypereides (390/89-322 BC). Hypereides' importance lies not only in his speeches, but also in his centrality in the political life of ancient Athens, as a contemporary of Demosthenes, and one of the canonical Ten Attic Orators. This book, which includes a general introduction and lavish historical and literary commentary, represents the first complete collection of Hypereides' works in any language.

Citroen C3 Chapel Hill, N.C. : University of North Carolina Press

The French automobile pioneer and entrepreneur Andre Citroen is one of the neglected founding figures of the industry. Although his name remains a familiar household word, his colourful personality and spectacular achievements are now largely unrecognized. This illustrated biography reviews Citroen's life and work and catalogues the cars he produced. It restores his reputation as one of the most progressive and imaginative characters in the history of the motor car.

A Wedding in Haiti American Association of Cereal Chemists

"Why has the valley of Kashmir, famed for its beauty and tranquillity, become a major flashpoint, threatening the stability of a region of great strategic importance and challenging the integrity of the Indian state? This book examines the Kashmir conflict in its historical context, from the period when the valley was an independent kingdom right up to the struggles of the present day. Located on the borders of China, Central Asia and the Sub-Continent, the insurgency in the valley has also created serious tensions between India and Pakistan. Drawing upon research in India and Pakistan, as well as historical sources, this book traces the origins of the state in the 19th century and the controversial "sale" by the British of the predominantly Muslim valley to a Hindu Maharaja in 1846. Through an exploration of the implications for Kashmir of independence in 1947, it gives a critical account of why, for Kashmir, self-determination may seem a more attractive option than affiliation to a larger multi-racial whole."--Bloomsbury Publishing.
