**A Biography** Yale

University Press

Satyendra Nath Bose became a legendary figure of science in the 20th century in India with his revolutionary discovery on the nature of radiation.

Despite the association with Einstein, however,

little is known about him outside of India. This book highlights the remarkable intellect and the extraordinary personality of Bose set against the backdrop of a rich Bengali cultural tradition and British-Indian politics. Unlike other books covering the significance of Bose's discovery, this book describes his diverse scientific contributions to India's scientific community by bringing together selected articles and addresses by Bose as well as contributions from some well-known scientists on the many-faceted life of Bose, thus making it a truly unique volume.

Financial Times and Goldman Sachs Business Book of the Year Prize 2008 The Snowball is the first and will be the only biography of the world's richest man, Warren Buffett, written with his full cooperation and collaboration. Combining a unique blend of "The Sage of Omaha's" business savvy, life story and philosophy, The Snowball is essential reading for anyone wishing to discover and replicate the secrets of his business and life success. Warren Buffett is arguably the world's greatest investor. Even as a child he was fascinated by the concept of risk and probability, setting up his first business at the age of six. In 1964 he bought struggling

Massachusetts textile firm Berkshire Hathaway and grew it to be the 12th largest corporation in the US purely through the exercise of sound investing principles - a feat never equalled in the annals of business. Despite an estimated net worth of around US\$62 billion, Buffett leads an intriguingly frugal life taking home a salary of only £50,000 a year. His only indulgence is a private jet, an extravagance he wryly acknowledges by calling it "The Indefensible". In 2006, he made the largest charitable donation on record, with most of it going to the Bill & Melinda Gates Foundation. The Snowball provides a comprehensive, richly detailed insight one of

the world's most extraordinary and much loved public figures.

The Spiritual Odyssey of a Man of Science  
Routledge

"The eternal mystery of the world is its comprehensibility ... The fact that it is comprehensible is a miracle." —Albert Einstein, 1936

Albert Einstein's universal appeal is only partially explained by his brilliant work in physics, as Andrew Robinson demonstrates in this authoritative, accessible, and richly illustrated biography. The main narrative is enriched by twelve essays by well-known scientists, scholars, and artists, including three Nobel Laureates. The book presents clearly the beautiful simplicity at the heart

of Einstein's greatest discoveries, and explains how his ideas have continued to influence scientific developments such as lasers, the theory of the big bang, and "theories of everything." Einstein's life and activities outside of science are also considered, including his encounters with famous contemporaries such as Chaplin, Roosevelt, and Tagore, his love of music, and his troubled family life. The book recognizes that Einstein's striking originality was expressed in many ways, from his political and humanitarian campaigns against nuclear weapons, anti-Semitism, McCarthyism, and social injustices, to his

unconventional personal appearance. Published in association with the Albert Einstein Archives at the Hebrew University of Jerusalem, the book draws on this exceptional resource of Einstein's private papers and personal photographs. This new edition, published to recognize the centenary of the publication of Einstein's General Theory of Relativity, includes an important new afterword by Diana Kormos Buchwald, the director of the Einstein Papers Project at the California Institute of Technology. The contributors are Philip Anderson, Arthur C. Clarke, I. Bernard Cohen, Freeman Dyson, Philip Glass, Stephen Hawking, Max

Jammer, Diana Kormos Buchwald, João Magueijo, Joseph Rotblat, Robert Schulmann, and Steven Weinberg.

*The Scientific Life in a Statistical Age*  
Chronicle Books

This new text is a detailed study of an important process in modern Indian history.

During the late nineteenth and early twentieth century, India experienced an intellectual renaissance, which owed as much to the influx of new ideas from the West as to traditional religious and cultural insights. Gosling examines the effects of the introduction of Western science into India, and the relationship between Indian traditions of thought and secular Western scientific doctrine. He charts the early development of science in India, its role in the secularization of Indian society, and the subsequent reassertion, adaptation and rejection of traditional modes of thought. The beliefs of key Indian scientists, including Jagadish

Chandra Bose, P.C. Roy and S.N. Bose are explored and the book goes on to reflect upon how individual scientists could still accept particular religious beliefs such as reincarnation, cosmology, miracles and prayer. Science and the Indian Tradition gives an in-depth assessment of results of the introduction of Western science into India, and will be of interest to scholars of Indian history and those interested in the interaction between Western and Indian traditions of intellectual thought. Karl Pearson Princeton University Press The End-Century Edition Of The Who'S Who Of Indian Writers, Is An Invaluable Work Of Reference For

Writers, Publishers, Readers And Students Of Literary History. For Ease Of Use, The Entries Are Arranged Alphabetically By Surname Or Part Of The Name Preferred By The Writers Themselves. A Large Number Of Cross-References Are Provided To Facilitate The Location And Identification Of The Writers.
