Lives in Context Prentice Hall
Recipient of the 2017 Most Promising New Textbook Award from the Textbook & Academic Authors Association (TAA)
Chronologically organized, Lifespan Development: Lives in Context offers a unique perspective on the field by focusing on the importance of context—examining how the places, sociocultural environments, and ways in which we are raised influence who we

become and how we grow and change. Author Tara L. Kuther integrates cutting-edge and classic research throughout the text to present a unified story of developmental science and its applications to everyday life. Robust pedagogy, student-friendly writing, and an inviting design enhance this exciting and inclusive exploration of the ways in which context informs our understanding of the lifespan. *Prenatal Through Middle Childhood, Books a la Carte Edition* Cram101
For courses in Child Development that take a chronological approach Laura Berk's most concise child development

text! Exploring Child and Adolescent Development provides students with a clear, efficient survey of the most important concepts and research findings in the field of child development. In just 12 chapters, Berk makes classic, contemporary, and cutting-edge theories and research accessible in a manageable and relevant way, with an especially strong emphasis on real-world applications and an exceptional multicultural and cross-cultural focus. Chronologically organized, the text offers a complete introduction to the field, highlighting the most important concepts and research

findings. This combination of rich content with concise presentation offers instructors unparalleled flexibility in designing their courses to meet both curricular and student needs. Available as a standalone text or via Revel(tm) Revel is Pearson's newest, fully digital method of delivering course content. A less expensive alternative to the printed textbook, Revel is an immersive learning environment that enables students to read, practice, and study in one continuous experience.

Handbook of Life-Span Development
Pearson College Division

Since the publication of Vygotsky's Thought and Language in the United States, a number of North American and European investigators have conducted systematic observations of children's spontaneous private speech, giving substantial support to Vygotsky's major hypotheses — particularly those regarding the social origins of higher psychological functions. However, there still remain many vital questions about the origins, significance, and functions of private speech: How can social and private speech be validly differentiated? What kinds of social interactions promote the use of private speech? What are the sources of individual differences in the use of private speech? This unique volume addresses these and many other important questions. Characterized by a strong emphasis on original data, it reports on systematic observations of spontaneous private speech in children and adults in both laboratory and naturalistic settings. In addition to its systematic analysis of common methodological problems in the field, the book contains the most

comprehensive bibliography of the private speech literature currently available.

Studyguide for Exploring Lifespan Development by Berk, Laura E., ISBN 9780205958702 Pearson

This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Laura Berk's Development Through the Lifespan is relied upon in classrooms worldwide for its clear, engaging writing style, exceptional multicultural and cross-cultural focus, cutting-edge consideration of the interrelationships between heredity and environment, rich examples, and long-standing commitment to presenting the most up-to-date scholarship. This new edition continues to offer students research-based practical applications that they can relate to their personal and professional lives. Laura Berk, renowned professor and researcher, has revised the text with new pedagogy, a heightened emphasis on the interplay between heredity and environment, and an enhanced focus on many social policy issues, while emphasizing the lifespan perspective throughout. The latest

theories and findings in the field are made accessible to students in a manageable and relevant way. Berk's signature storytelling style invites students to actively learn beside the text's "characters." Students are provided with an especially clear and coherent understanding of the sequence and underlying processes of human development, emphasizing the interrelatedness of all domains—physical, cognitive, emotional, social—throughout the text narrative and in special features. Berk also helps students connect their learning to their personal and professional areas of interest. Her voice comes through when speaking directly about issues students will face in their future pursuits as parents, educators, health care providers, social workers, and researchers. As members of a global and diverse human community, students are called to intelligently approach the responsibility of understanding and responding to the needs and concerns of both young and old. While carefully considering the complexities of human development, Berk presents classic and emerging theories in an especially clear, engaging writing style,

with a multitude of research-based, real-world, cross-cultural, and multicultural examples. Strengthening the connections among developmental domains and of theory and research with applications, this edition's extensive revision brings forth the most recent scholarship, representing the changing field of human development. Lifespan Development Pearson College Division

Balanced coverage of the entire life span is just one thing that distinguishes HUMAN DEVELOPMENT: A LIFE-SPAN VIEW, Seventh Edition. With its comprehensive, succinct, and applied coverage, the text has proven its ability to capture students' interest while introducing them to the issues, forces, and outcomes that make us who we are. Robert V. Kail's expertise in childhood and adolescence, combined with John C. Cavanaugh's extensive research in gerontology, result in a book with a rich description of all life-span stages and important topics. A modified chronological approach traces development in sequential order from conception through late life, while also dedicating several chapters to key topical issues. This organization also allows the book to be relatively briefer than other texts, a

benefit given the enormous amount of information covered in the course. The authors provide theoretical and empirical foundations that enable students to become educated, critical interpreters of developmental information. A blend of basic and applied research, as well as coverage of controversial topics and emergent trends, demonstrates connections between the laboratory and life. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Outlines and Highlights for Exploring Lifespan Development by Berk, ISBN Oxford University Press

Laura Berk, renowned professor and researcher in the field of child development, has updated her successful chronological text with heightened attention to the relationship between theory, research, and applications. In her signature storytelling style, Berk presents a "cast of characters" based on real children and families for each unit, and actually uses these characters, by telling their "stories," to illustrate the sequence and processes of child development.

Using diverse examples from published research, the Third Edition of *The Process of Research in Psychology* by Dawn M. McBride provides step-by-step coverage on how to design, conduct, and present a research study. Early chapters introduce important concepts for developing research ideas while subsequent "nuts and bolts" chapters provide more detailed coverage of topics and examine the types of research relevant to the field. This logical two-part structure creates an excellent foundation upon which students can build their knowledge of the entire research process.
