Whether titans of industry, influential business leaders, or creators of history's most recognizable brands, these entrepreneurs had the vision, innovation, and ruthless determination to make their marks on our society in indelible ways. Boldly illustrated and comprehensive in its scope and depth, *Entrepreneurs Who Changed History* profiles more than 90 industry leaders across the world and throughout the ages - from the enterprising bankers of the medieval world and the merchants of an empire to the titans of industry and the geniuses of Silicon Valley. Combining accessible text with specially-commissioned illustrated portraits in a range of bold artwork styles, photographs, and infographics, entries showcase each individual in a fresh, visual way. The towering personalities behind some of history's most recognizable brands and companies - their ruthlessness, tenacity, creativity, and sheer grit - are all brought to vivid life. Profiling the kings and queens of commerce and trade, *Entrepreneurs Who Changed History* features the familiar faces of Vanderbilt and Rockefeller, Ford and Ferrari, Gates and Zuckerberg, alongside lesser-known figures such as the enterprising women of colonial America, the emancipated enslaved people who became millionaires against all odds, and the individuals powering today's emerging economies.

Radio Frequency Identification (RFID) is the technology applied for unambiguous and contactless identification of all types of objects. Varying magnetic fields or radio waves enable contactless data transfer as well as fast, automatic data collection. In addition, the importance of optical codes gains further importance due to their specific advantages. RFID and Auto ID systems are used in a wide range of sectors - from the consumer goods industry and trade via the automobile and aerospace industries to the chemicals and pharmaceuticals industries, as well as logistics and transport facilities. New potentials to secure competitive advantages can be utilized with early planning of the application of RFID and Auto ID in procurement, manufacturing and logistics. In addition to RFID and Auto ID technology, this book presents applications from different areas of application which have already been tried and tested. They demonstrate the approach, the process and the selection of RFID and Auto ID systems for various problems. A perspective on trends and innovative security solutions shows possible future application options for this technology.
