Control Engineering - Course Introduction Welcome to UNIST ECE's EE 313 Introduction to Control Course! This video covers instructor, text, and flipped-learning format information. Intro to Control - 0.1 Course

Introduction This course provides an introduction to linear systems, transfer functions, and Laplace transforms. It covers stability and feedback, and provides basic design tools for specifications of transient response. It also briefly covers frequency-domain techniques. This course includes laboratory experiments and a control design project.
