NATIONAL BESTSELLER • ECPA BESTSELLER • The husband and wife behind the popular Earls Family Vlogs share their inspiring love story of how an expedition to climb Mount Everest deepened their faith, strengthened their commitment, and sharpened their vision to make a difference in the world. As a senior at West Point, Harold Earls dreamed of summiting Mount Everest after graduation and bringing awareness to the issue of PTSD in soldiers and veterans. But as a novice mountain climber and newlywed, could he really leave his wife, Rachel, on the other side of the world to pursue such a dangerous quest? After all, Rachel's dream was to be a wife and mother. She knew that her husband's audacious goal might lead to her to give up everything. A Higher Calling takes us on a beautiful journey through the ups and downs of their relationship, from their unlikely introduction and whirlwind romance to their fairy-tale wedding and the dreams they shared. Dreams that required tremendous sacrifice and faith—in each other and in God. As their dreams are realized, witness how Harold and Rachel used their powerful bond of love to overcome obstacles and learn that life is about doing versus having, serving versus getting, being versus wanting. A Higher Calling shows each of us that when God's purpose and our passion meet, we can transcend any sacrifice we make on the mountains of adversity. And as we approach life with an attitude of thanksgiving, we realize that being joyful and living in love is worth it. Every time.

Women in Clothes The Mountaineers Books

Snow avalanches are the greatest source of danger for mountain travellers in winter. This book focuses on two basic user groups: those who wish to avoid avalanche hazard by careful route-finding, and those who deliberately seek steep slopes to ski or board. It explains the basics of snow and avalanches, and identifies the avalanche terrain.

On January 20, 2003, at 10:45 a.m., a massive avalanche in the Selkirk Range of British Columbia struck three members of two guided backcountry skiing groups and buried them. After a frantic hour of digging by those still standing, an unthinkable outcome became reality: seven people were dead. The tragedy made international news, splashing photos of the seven dead Canadian and US skiers on television screens and newspaper pages. The official analysis was that guide error was not a contributing factor in the accident. This interpretation was insufficient for some of the victims' families, the public and some members of the guiding community. Buried is the assistant guide's story. It renders an answerable truth about what happened by delving deep into the human factors that played into putting people in harm's way as well as the peace that comes from accountability

and the personal growth that results from understanding.

Century of Northwest wilderness skiing stories by noted expert 150 black-and-white and color photographs Celebrates the friluftsliv, or open-air living spirit, of backcountry skiing In Written in the Snows, renowned local skiing historian Lowell Skoog presents a definitive and visually rich history of the past century of Northwest ski culture, from stirring and colorful stories of wilderness exploration to the evolution of gear and technique. He traces the development of skiing in Washington from the late 1800s to the present, covering the beginnings of ski resorts and competitions, the importance of wild places in the Olympic and Cascade mountains (including Oregon's Mount Hood), and the friluftsliv, or open-air living spirit, of backcountry skiing. Skoog addresses how skiing has been shaped by larger social trends, including immigration, the Great Depression, war, economic growth, conservation, and the media. In turn, Northwest skiers have affected their region in ways that transcend the sport, producing local legends like Milnor Roberts, Olga Bolstad, Hans Otto Giese, Bill Maxwell, and more. While weaving his own impressions and experiences into the larger history, Skoog shows that skiing is far more than mere sport or recreation.

Edward Power sets the reader down in the midst of a February 2017 blizzard that raked Utah's Uinta Range as nine snowboarders made their way into the backcountry for a day of intense adventure. As the boarders were taking their first turns, expert avalanche forecaster Craig Gordon was tracking the storm and its impact, posting one of the most dire avalanche forecasts and warnings in his career. In *Dragons in the Snow*, Power delves into the research and science behind avalanche forecasting and rescue, weaving in the art of backcountry skiing as well as dramatic tales of avalanche accidents, rescues, and recoveries. And he paints compelling portraits of the men and women who have made the study of avalanches their life's

work. The tales told by these avalanche forecasters, as well as the stories of the backcountry riders who may "wake the dragon" make for not just a compelling read, but also a powerful tool for raising avalanche awareness in everyone who plays in the winter backcountry.
