The American Educational Monthly for the School and the Family Lark Books (NC)

We all are fascinated as well as perplexed by our unimaginably vast Universe and the mysteries surrounding it. Our Universe comprises of trillions of stars, galaxies, black holes, enormous clouds of gases, and many other fascinating objects in the Universe. Right from our childhood, we have been curious to unwind the mysteries of the Universe and the following questions always came to our mind: - How did the Universe evolve? How vast is the Universe?- What are galaxies and stars? What are constellations?- What is the solar system? What are planets, moons, asteroids, meteorites, dwarf planets, comets?- What are solar & lunar eclipses; How moon keeps changing its shape?- What is your weight & age on different planets?- How did mankind land on the Moon?- Who are the pioneers in

astronomy?- And the list goes on....This interesting Quiz Book on Astronomy for kids answers the above questions by bringing out well-planned quizzes on a variety of topics in Multiple Choice Question format. This exciting quiz book is the perfect learning and entertainment tool for kids of all ages, aspirants to various competitive examinations, and quiz buffs. This fun-filled quiz book takes you on a journey to the mysterious world of the Universe, galaxies, stars, constellations, solar system, planets, asteroids, comets, etc. Additional quizzes on Moon exploration, solar & lunar eclipses, phases of moons, picture quizzes, comparison of planets, weight & age on different planets, pioneers of astronomy, puzzles, jumbled word, search the word etc. are also given. The answers to all the questions are also given. So, enjoy your journey to the mysteries of the Universe!  
*Central School Journal* John Wiley & Sons

What are stars? Why does the moon change shape? How close is the nearest planet? Budding astronomers will find answers to all their questions about the night sky--and far more--in these 50 eye-opening activities. Three-hundred color photos and illustrations, some from NASA's magnificent collection, help kids soar out into the solar system, get their bearings among the stars, and see the size of Earth as compared to the neighboring planets. Youngsters will learn how to use binoculars and a telescope. To remember what they see up above, children can create a stargazing notebook to chart viewing highlights or take pictures of star trails. A photographic trip to the Moon will inspire kids to map its many phases, calculate their lunar weight, or find out what happens during an eclipse. Voyaging farther out also reveals why the other planets wouldn't make a good home for humans, and will help children understand

why Earth is so very special, too.
