This book explores the transmedial nature of the storyworlds created by and/or affiliated with television auteur, writer, and filmmaker, Joss Whedon. As such, the book addresses the ways in which Whedon's storyworlds, or 'verses, employ transmedia, both intrinsically as texts and extrinsically as these texts are consumed and, in some cases, reworked, by audiences. This collection walks readers through fan and scholar-fan engagement, intrinsic textual transmediality, and Whedon's lasting influence on televisual and transmedia texts. In closing, the editors argue for the need to continue research into how the Whedonverse(s) lend themselves to transmedial study, engage audiences in ways that take advantage of multiple media, and encourage textual internalization of these engagements within audiences.

Hadoop: The Definitive Guide McFarland While many people think true crime is a new phenomenon, Americans have been obsessed with the genre for over a century, and popular culture continuously tries to cash in. The names of infamous serial killers are well-known, but the identities of their often-female victims are frequently lost to history. This text flips the script and focuses on the women to keep their identities known and remembered. This is the first book to examine how popular culture has mistreated women as both perpetrators and victims of crime, covering a hundred-year span from 1920 to 2020. Detailed is popular culture's interest in true crime and how women in true crime documentation have largely been sexualized and victim-blamed over the decades.
