Counter-Claims and Obligations Erga Omnes Before the International Court of Justice Simon and Schuster

Featuring a new introduction, this updated edition of the New York Times bestselling classic by Pulitzer Prize and National Book Award-winning author and one of the most revered figures in American letters is “profound and priceless as guidance for anyone who aspires to write” (Los Angeles Times). Born in 1909 in Jackson, Mississippi, Eudora Welty shares details of her upbringing that show us how her family and her surroundings contributed to the shaping not only of her personality but of her writing as well. Everyday sights, sounds, and objects resonate with the emotions of recollection: the striking clocks, the Victrola, her orphaned father’s coverless little book saved since boyhood, the tall mountains of the West Virginia back country that

became a metaphor for her mother’s sturdy independence, Eudora’s earliest box camera that suspended a moment forever and taught her that every feeling awaits a gesture. In her vivid descriptions of growing up in the South—of the interplay between black and white, between town and countryside, between dedicated schoolteachers and the children they taught—she recreates the vanished world of her youth with the same subtlety and insight that mark her fiction, capturing “the mysterious transfiguring gift by which dream, memory, and experience become art” (Los Angeles Times Book Review). Part memoir, part exploration of the seeds of creativity, this unique distillation of a writer’s beginnings offers a rare glimpse into the Mississippi childhood that made Eudora Welty the acclaimed and important writer she would become.

In December 1997 the International Court of Justice issued an order, for the first time, allowing a counter-claim. The Court found that the counter-claim submitted by Yugoslavia in the case concerning the Application of the Convention on the Prevention and Punishment of the Crime of Genocide was admissible under Article 80 para. 1 of the rules. This raised the question whether a counter-claim may be presented in a case concerning the violation of an obligation. The nature of counter-claims and their admissibility are analysed in this comment in relation to such cases. It is argued that counter-claims should be admitted before the Court only if built on defences on the merits and if strictly connected with the merits of the case in which they are raised. The author concludes that these conditions for the admissibility of a counter-claim cannot be fulfilled when the violation of an obligation is alleged. The defensive character cannot be maintained as the Respondent State cannot invoke a previous violation of its rights committed by the Applicant in order to justify conduct that infringes an obligation. Furthermore, connection in fact and in law is also lacking.

Counterclaims

This book aspires to examine international law-making concerning genocide. The genocide phenomenon is explored from the perspective of a protected group emerging from the Convention on the Prevention and Punishment of the Crime of Genocide. The focus is given to the concept of judicial law-making and judicial activism. Its legitimacy is discussed against legal background of a decision of the International Criminal Tribunal for Rwanda in the Akayesu Case. It was contended that due to the proliferation of international judicial bodies and globalisation of the concept of 'justice', the role of international judges should be viewed from a different approach. After examining the process of international law-making relating to genocide, this book, however, concludes that the role of the international judge has remained the same (i. e. to decide a case providing reasoning supported by a relevant set of norms). Although judges decide a broad interpretation of genocide, this does not mean that they create international law. States remain the primary law-makers of the system. Consequently, it is upon state practice to enhance the progressive development of these judicial decisions.

"... this project seeks not to take a position on, but to further an ongoing process of, poetics. It seeks not to assert a claim but to perform a heuristic, not to settle on one aesthetic or one institutional arrangement for poetry, but to fulfill a principle of continuing dialogue and distributed engagement." In *Counterclaims*, renowned poet H. L. Hix has amassed the responses of more than one hundred and fifty of his fellow writers, scholars, and artists to a singular problem, simultaneously a set of questions and a call-to-arms: whether the old truths inherent in 20th-century poetics can still be adhered to today, or whether new truths might take their place and what might they be? The answers collected in this volume from many of the greatest luminaries of their generation, writers young and old, from diverse backgrounds and cultures, form the basis of a new conversation; a step forward, not toward any one monolithic thesis or manifesto, but toward a new and ever adapting notion of poetry"--
