A devoted employee of the FIA (Federal Intelligence Agency), Eurian lives a comfortable and secure life, spanned with bureaucratic conflicts and desires for promotion. He will find himself thrust into an international conflict to track down and stop a subversive cyberterrorist movement. His desire for a foreign assignment will finally be met, but not in the way he expected. Assigned to Kerploueck, a sleepy village at the far edge of the world, he will be forced to let go of the comfort and stability of his previous lifestyle. With this temporary assignment, the complacent bureaucrat finds himself a spy-but with none of the excitement and adventure he had dreamed of. He now must find new objectives to survive this wholly uninteresting assignment. What happens to the FIA and to the success of the worldwide search for the subversive cyber-terrorists will slowly drift away from Eurian's mind. Interestingly enough, when this book was started, internet spying, hacking, and cyberterrorism were rhetorical discussions. Today, we live in a different reality. Truth and facts are not as important as swaying unmindful, gullible populations. George Orwell's "alternative facts" are common place and universally acceptable. With the ocean of information now accessible to anyone, individuals, organizations, and even governments are scrambling to control its sources and promulgate their agendas. This is the essence of "The Happy Fools." Following Eurian and his unanticipated quest for truth, many topics of modern society will be discussed. This book also serves as a compendium of the latest technologies, sciences, ideas and movements. Focusing primarily on the most pertinent latest developments, each providing hope and insights that could change our lives. The underlying prerequisite of being happy is to avoid stress and the unknown. Therein lies a potential philosophical issue. Shutting the doors to outside turmoil, to world problems and issues, is a good safeguard for happiness. Close-mindedness brings confidence, as the world's problems appear simple and the solutions two-sided. Inversely, knowledge creates a spirit of inquiry, a burning desire for more knowledge, spurring new questions that beg for answers, ultimately resulting in a loss of conviction and an understanding that we will never truly understand the world in its endless complexities. Do we choose closed-minded confidence, or a life dedicated to the pursuit of knowledge with the uncertainties, frustrations, and complexities that it yields?

"The very first bridge I crossed was choosing to study for the priesthood, a decision that took me and everyone who knew me by surprise. Then came a series of bridges that once crossed brought me into contact with diverse peoples and their incredibly different yet similar needs." Father Vavrina has served as a priest for many years, and has served several missions trips to help the needy. Father Ken worked with lepers in Yemen, and was ultimately arrested and thrown in jail under false suspicions of spying. After being forcibly removed from Yemen, he began his tenure with Catholic Relief Services. First in the extreme poverty and over-population of Calcutta in India. Then with warlords in Liberia to deliver food and supplies to refugees in need. Father Ken also spent several years working with Mother Teresa to heal the sick and comfort the dying. Crossing Bridges: A Priest's Uplifting Life Among the Downtrodden is the story of Father Ken Vavrina's life and travels - simple acts that moved him, people that inspired him, and places that astonished him. Father Ken has spent his life selflessly serving the Lord and the neediest around him, while always striving to remain a simple, humble man of God. "I pray this account of my life is not a personal spectacle but a recounting of a most wonderful journey serving God. May its discoveries and experiences inspire your own life story of service."
